What is Bluebeam?

Bluebeam Revu, a comprehensive PDF management & collaboration software tool that is used by electrical estimators, journeymen, technologists, project managers &engineers throughout the lifecycle of a building project Bluebeam Revu software brings everyone on the team onto the documents together. You solve project problems through the drawings. All the content is online all the time.

Why use Bluebeam?

More than 80 percent of the top North American electrical design firms use Bluebeam because it **saves time, boosts efficiency and allows team members to simultaneously work together.** Essentially, Bluebeam links everyone through all the documents at the same time, as if they were sitting in one room.
