

# GEORGETOWN TEXAS AREA CAR CLUB

This picture kinda says it all! Texas in July!

# GEORGETOWN TEXAS AREA CAR CLUB

---

July is a slow month for club activities. Other than the regular monthly activities; Pistons on the Square, Round Rock Show, etc., there's not much going on to report.

We started off the month with a good turnout for our July meeting with 30+ members & guests present.

New Member: Henry Savage, 1982 Rolls Royce. Henry, Send us a picture of your Rolls!!

## Club Activities:

July 9 Cruise In to Mexicano Grill, Jarrell, TX. 16 members & guests braved the heat to enjoy some great food and visit among members.

# GEORGETOWN TEXAS AREA CAR CLUB

Saturday July 16, Pistons on the Square. As usual, an early arrival is required to get a good parking space as the square is mostly parked full by 7:30. Every month we see some vehicles that we hadn't seen before.

Sunday, July 17, Round Rock Car Show, Any members attend? If so forward picture!

## June Mystery tool, trivia question:

Fred Moser was the first to identify the June mystery tool as pitman arm puller, Ernie Pauley was the first to answer the trivia questions: A) What US auto manufacturer was first to use alternators? Answer: Chrysler 1960, B) What was the first year GM used the internal Regulator (SI) alternator? Answer: GM, 1969 Corvette, '69 Olds 442, '69 Pontiac Firebird 400.

June mystery tool: pitman arm puller

July mystery tool:

Trivia: Name the car, Name the Place (1971)

In last month's newsletter I asked for members to submit their current projects (as I'm scrambling for content!). I received one in return, and it's quite a project:

Member Ernie Pauley is in the process of marrying a 1949 Dodge Pickup body to a 1983 Dodge frame! The finished vehicle will have a MOPAR 360 cu in engine with an A-833 New Process 4-speed overdrive tranny.

Ernie reports: "There is a lot of fabrication to make it all fit well, make cab mounting brackets, cut firewall for the engine clearance and shorten the frame for wheel spacing. The floor and firewall will be a challenge to make the swing pedals work for the clutch and brake pedals.

Once I get the body and all the components in place and aligned up and functioning, I will disassemble it totally, sandblast and do the body work and paint."

# GEORGETOWN TEXAS AREA CAR CLUB

I can't wait to see the finished product!!

How's this for a body lift!

Original 1949 Dodge

Some cleaning was needed!

Hhmm...a little difference in wheelbase!

# GEORGETOWN TEXAS AREA CAR CLUB

Some fabrication needed!

It Just may fit!

This is going to be impressive!

Thanks Ernie for sharing,

Whats your project?
