GO GREEN

98% RECYCLED GLASS

ONIX

ONIX has managed in just a few years to become the largest international manufacturer of glass mosaic. Our commitment to innovation, our technological potential and the continuous improvement of our production processes have allowed us to position ourselves as a benchmark in the world of decoration.

Our driving force is to offer the ideal ecological solution to commercial and residential projects that require sustainable construction materials and design. Our collections show our passion for transcending the limits of interior design and offering new aesthetic proposals every year, always in line with new trends and the needs of the market. More than two decades of experience with the same goal: to go as far as the imagination takes us.

ONIX

En ONIX hemos conseguido en tan sólo unos años convertirnos en el mayor fabricante de mosaico vitreo a nivel internacional. Nuestros esfuerzos en innovación, el potencial tecnológico con el que contamos y la mejora continua en los procesos productivos, nos ha permitido posicionarnos como referente en el universo de la decoración.

El motor que nos impulsa es ofrecer la solución ecológica ideal a proyectos comerciales y residenciales que requieran de materiales de construcción sostenibles y de diseño. En nuestras colecciones se hace patente nuestra pasión por trascender los límites del interiorismo y ofrecer cada año nuevas propuestas estéticas, siempre a la altura de las nuevas tendencias y las necesidades del sector. Más de dos décadas de experiencia y siempre el mismo objetivo: ir tan lejos como nos lleve la imaginación.

ONIX

ONIX a réussi en quelques années à devenir le plus grand fabricant international de mosaïque de verre. Notre engagement envers l'innovation, notre potentiel technologique et l'amélioration continue de nos processus de production nous ont permis de nous positionner comme une référence dans le monde de la décoration.

Notre force motrice est d'offrir la solution écologique idéale aux projets commerciaux et résidentiels qui nécessitent des matériaux de construction et un design durables. Nos collections témoignent de notre passion pour transcender les limites de la décoration intérieure et offrir chaque année de nouvelles propositions esthétiques, toujours en phase avec les nouvelles tendances et les besoins du marché.

Plus de deux décennies d'expérience avec toujours le même objectif: aller aussi loin que l'imagination nous porte.

ONIX Environmental Commitment

We are responsible for the legacy of future generations, which is why we maintain a firm commitment to offer a product that is environmentally friendly, healthy and energy efficient in order to reduce the excess of CO2 emissions on the planet.

Our glass mosaic tiles are made from 98% recycled glass, which, in addition to contributing to the circular economy, is an added value to the quality of our products. And, because we are committed to optimizing the use of each and every resource, we use recyclable packaging.

Meanwhile, we have incorporated a number of measures aimed at energy sustainability. For example, we do not use fossil fuels in our production process, and the energy used to drive our operations comes from renewable sources, specifically solar PV energy generated at our own facilities.

ONIX Compromiso Medioambiental

Nos sentimos responsables del legado de las futuras generaciones, por ello mantenemos un firme compromiso en ofrecer un producto respetuoso con el medio ambiente.

Nuestras teselas de mosaico vitrero están fabricadas a partir de un 98% de vidrio reciclado, lo que además de promover la economía circular, proporciona un valor añadido a la calidad de nuestro producto. Este compromiso con la optimización de los recursos y su aprovechamiento también lo aplicamos a nuestro embalaje, siendo éste reciclable.

Paralelamente llevamos a cabo medidas orientadas hacia la sostenibilidad energética, entre ellas no emplear combustibles fósiles en el proceso productivo y funcionar con energía basada en fuentes renovables, en concreto con la energía solar fotovoltaica que generamos en nuestras propias instalaciones.

ONIX Engagement Environnemental

Nous sommes responsables de l'héritage des générations futures, c'est pourquoi nous maintenons un engagement ferme pour offrir un produit respectueux de l'environnement, sain et économique en énergie afin de réduire l'excès d'émissions de CO2 sur la planète.

Les tesselles de nos mosaïques de verre sont composées à 98 % de verre recyclé, ce qui en plus de favoriser l'économie circulaire, apporte une valeur ajoutée et un plus de qualité à nos produits. Le fait que nos emballages soient recyclables confirme également notre engagement envers l'optimisation et l'utilisation des ressources.

Dans le même temps, nous avons mis en œuvre, un ensemble de mesures ayant pour objectif la durabilité énergétique, notamment en renonçant à l'utilisation de combustibles fossiles dans nos processus de production, au profit d'énergies issues de sources renouvelables, telle que l'énergie solaire photovoltaïque, que nous produisons sur notre propre site.

Versatility and Efficiency

We design and conceive glass mosaic as a fundamental element for indoor and outdoor decoration, not only because of its aesthetic possibilities, which allow for great customization, decoration and design, but also because of its functional properties.

Its high resistance to humid environments, non-porosity and resistance to thermal shocks, make our product the perfect choice for all types of rooms. In addition to its hygienic and antibacterial properties and its ease of cleaning, which explains the increasing use of this material in all types of projects.

Versatilidad y Eficiencia

Diseñamos y concebimos el mosaico vitreo como un elemento fundamental en la decoración de interiores y exteriores, no sólo por sus posibilidades estéticas, que nos aportan una gran capacidad de personalización, decoración y diseño; sino también por sus propiedades funcionales.

Su alta resistencia a ambientes húmedos, nula porosidad y resistencia a choques térmicos, convierten a nuestro producto en la opción perfecta para todo tipo de estancias. Además de destacar sus propiedades higiénicas y antibacterianas y su facilidad de limpieza, que justifican el crecimiento en la elección de este material en todo tipo de proyectos.

Versatilité et Efficacité

Nous dessinons et concevons la mosaïque de verre comme un élément fondamental de la décoration intérieure et extérieure, non seulement en raison de ses possibilités esthétiques, qui permettent une grande capacité de personnalisation, de décoration et de design, mais aussi en raison de ses propriétés fonctionnelles.

Sa grande résistance aux environnements humides, sa non-porosité et sa résistance aux chocs thermiques, font de notre produit le choix idéal pour tous les types de pièces. Sans compter ses propriétés hygiéniques et antibactériennes et sa facilité de nettoyage, ce qui explique l'utilisation croissante de ce matériau dans tous types de projets.

Water Color Chart

Water Color Chart

Advise

The images displayed are approximate simulations and ONIX cannot guarantee that the color of the water will have the exact same resemblance. Several factors vary the tone of swimming pools after installation like weather conditions, amount of direct sunlight, time of day, depth of the pool, color of the grout applied, surroundings, geo location with respect to the hemisphere...

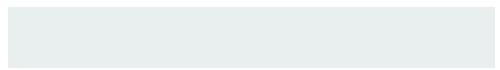

Aviso

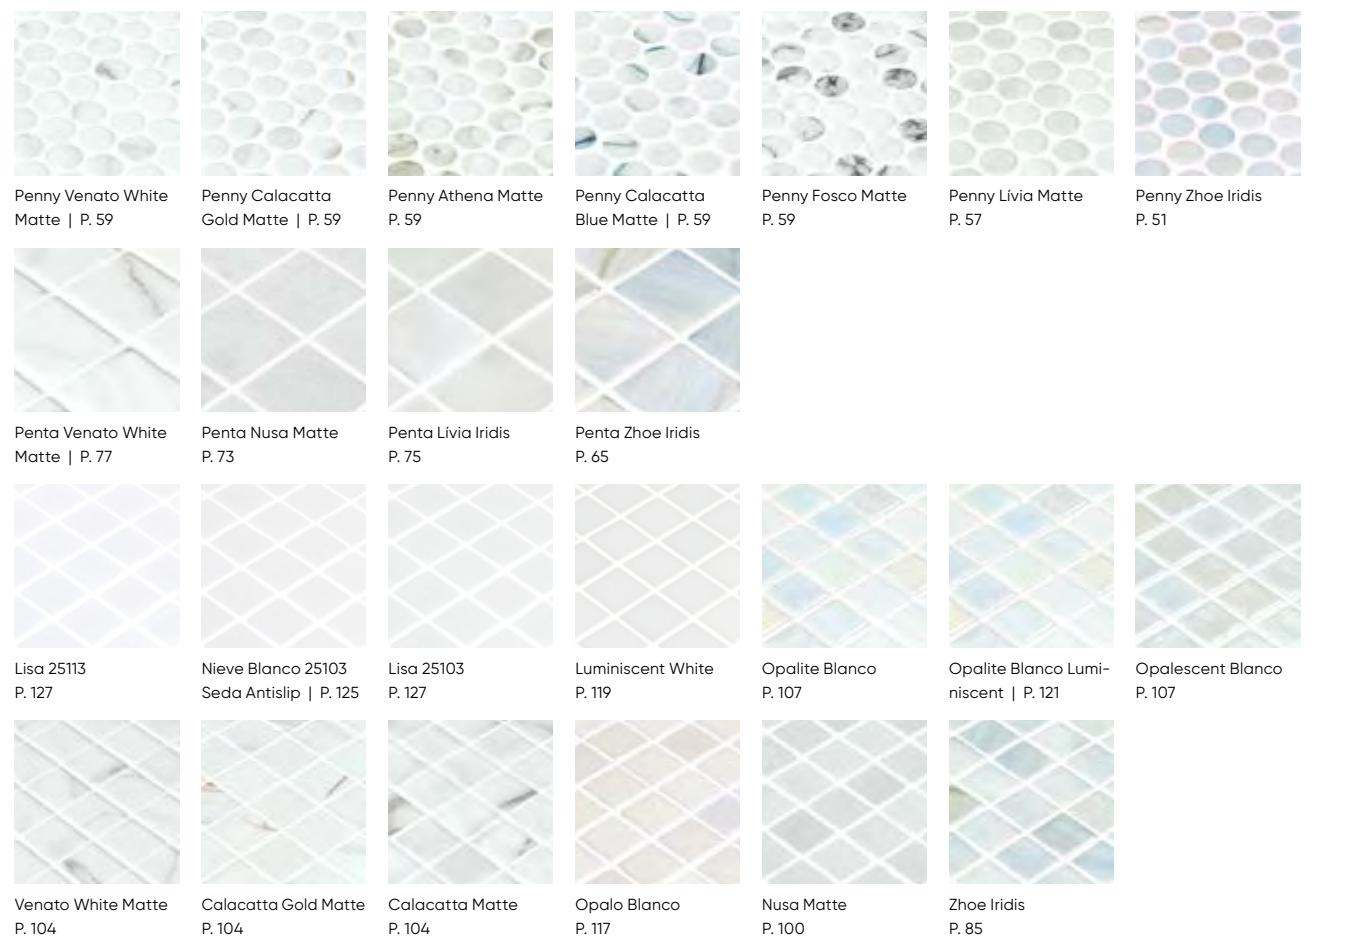

ONIX no puede garantizar la exactitud respecto al tono del color del agua, las imágenes mostradas son simulaciones aproximadas. Hay muchos factores que pueden variar el tono: incidencia del sol y nubes, hora del día, profundidad de la piscina, el color de la junta, ubicación respecto al hemisferio...

Remarques

Ces photos sont des simulations, Onix ne peut pas garantir l'exactitude de la couleur de l'eau présentée. Plusieurs facteurs peuvent en effet influer sur la nuance de la couleur comme par exemple: l'ensoleillement, les nuages, l'heure du jour, la localisation par rapport à l'hémisphère, la profondeur de la piscine, l'environnement de la piscine, la couleur du joint utilisé...

The art of glass mosaic with details in gold is a unique expression that combines the delicacy of glass with the opulence of precious metal. This creative process merges meticulous craftsmanship with sublime elegance.

ONIX offers you the opportunity to create custom combinations by embedding 24K Gold tesserae into any Square or Penta format mosaic. The glow of gold adds a dimension of wealth and exclusivity to the mosaic, elevating it to an unparalleled level of luxury and sophistication, creating luminous glimmers and contrasts that bring the composition to life.

El arte del mosaico de vidrio con detalles en oro es una expresión única que combina la delicadeza del vidrio con la opulencia del metal precioso. Este proceso creativo fusiona la artesanía meticulosa con la elegancia sublime.

ONIX te ofrece la posibilidad de crear combinaciones personalizadas incrustando teselas de Oro 24 carats en cualquier mosaico de formato Square o Penta. El resplandor del oro añade una dimensión de riqueza y exclusividad al mosaico elevándolo a un nivel de lujo y sofisticación incomparables, creando destellos luminosos y contrastes que dan vida a la composición.

L'art de la mosaïque en verre avec des détails en or est une expression unique qui marie la délicatesse du verre à l'opulence du métal précieux. Ce processus créatif fusionne un savoir-faire méticuleux avec une élégance sublime.

ONIX vous offre la possibilité de créer des combinaisons personnalisées en incrustant des tesselles d'or 24 carats dans n'importe quelle mosaïque au format Square ou Penta. L'éclat de l'or ajoute une dimension de richesse et d'exclusivité à la mosaïque, la hissant à un niveau de luxe et de sophistication inégalé, créant des lueurs lumineuses et des contrastes qui donnent vie à la composition.

Luminiscent

Luminiscent

ONIX's luminescent glass mosaic glows in the dark for hours after being charged with light, both natural or artificial (fluorescent, ultraviolet or halogen). This cycle may be repeated indefinitely.

The glow endurance depends on how long it has been exposed to light and also with the type of light it has been energized with. The luminescent will then gradually fade away after hours in the darkness.

This mosaic is weatherproof so it is suitable for any use: swimming pools, indoors & outdoors, walls, residential floors... It can be used as a plain color or mixed with the rest of ONIX.

Luminiscente

El mosaico vitro luminiscente brilla en la oscuridad durante horas después de haber estado expuesto a la luz, tanto natural como artificial fluorescente, ultravioleta o halógena. Este proceso puede repetirse indefinidamente.

El tiempo de emisión dependerá del tipo de luz con el que se haya efectuado la carga, así como del tiempo que haya estado cargando el mosaico luminiscente. La intensidad de la emisión es gradual, disminuyendo poco a poco con el paso de las horas.

Este mosaico es resistente a condiciones meteorológicas y, por tanto, apto para cualquier uso: piscinas, interiores y exteriores, paredes, suelos residenciales... Se puede utilizar como base o se puede mezclar con otro producto de ONIX.

Luminescence

La mosaïque de verre phosphorescente brille dans l'obscurité pendant des heures après avoir été explosée à la lumière tant naturelle qu'artificielle (fluorescents, ultraviolets, halogènes). Cette opération peut être répétée de manière indéfinie.

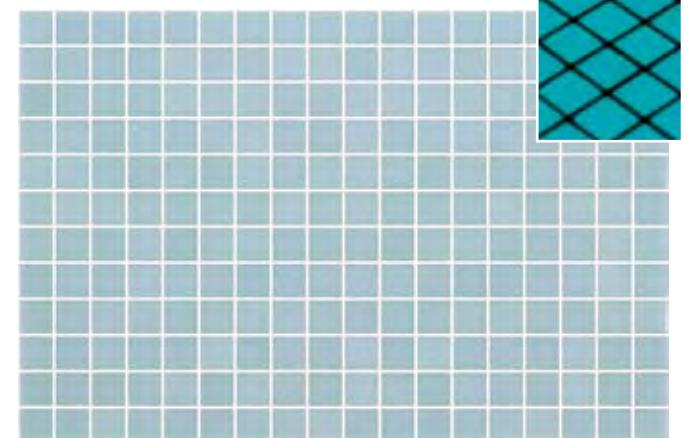

Le temps d'émission dépendra du type de lumière utilisée mais aussi du temps durant lequel la mosaïque phosphorescente aura été explosée. Le temps d'émission est gradué et diminuera peu à peu au fil des heures.

Cette mosaïque est résistante aux conditions météorologiques. Elle peut donc être utilisée dans n'importe quelle application: piscines, intérieurs et extérieurs, murs, sols résidentiels... Elle peut être posée seule ou en mélange avec d'autres références d'ONIX.

Pixel Art

At ONIX, we capture your images and designs on glass mosaic by converting each pixel into a tile and creating highly attractive customized compositions that will make your space original and unique.

- Tell us all about the concept or motif you wish to reproduce; you can send us an image as reference or send us your own design, with as much definition as possible.
- Select the materials that will make up the space to be decorated. We make it possible for you to choose between multiple colors, finishes, and mosaic textures: smooth, metallic, luminescent, etc.
- Tell us the dimensions of the space to be decorated; please keep in mind that the larger the space, the greater the detail you can achieve.
- And that's it. Our design team will then have all the information they need to be able to send you a simulation of your project.

En ONIX plasmamos tus imágenes o diseños en mosaico vitreo convirtiendo cada píxel en una tesela, creando composiciones personalizadas de gran atractivo que harán de tu espacio un lugar único.

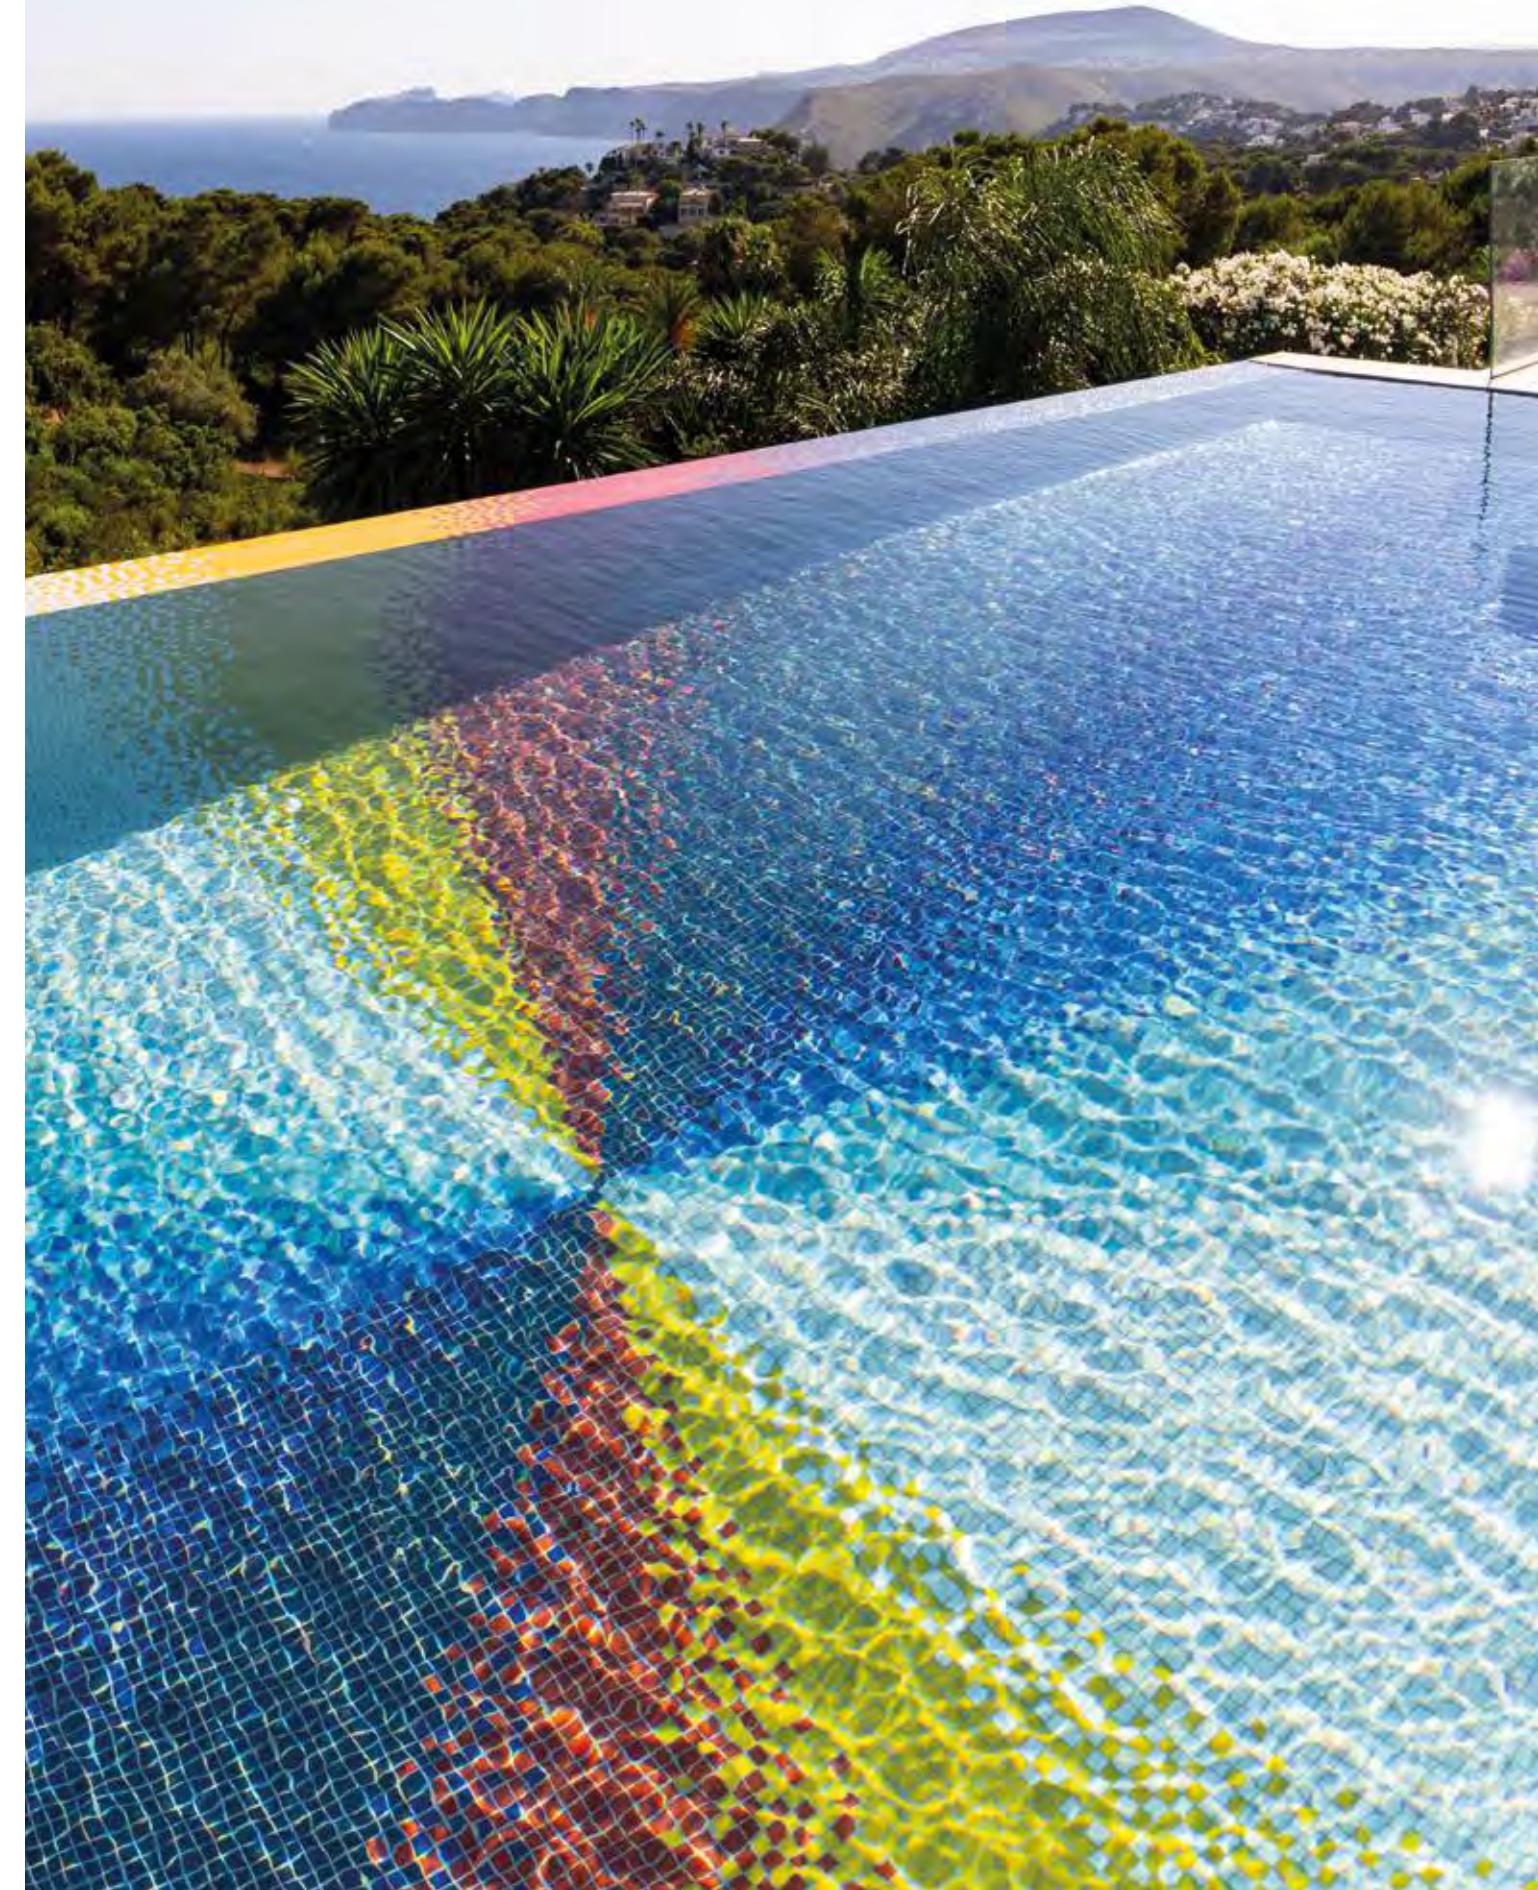

- Explícanos bien la idea o motivo a reproducir; puedes hacernos llegar una imagen de referencia o enviarnos tu propio diseño, con la máxima definición posible.
- Elige los materiales que van a componer el decorado. Te ofrecemos la posibilidad de escoger entre múltiples colores, acabados y texturas de mosaico: lisos, metalizados, luminiscentes, etc.
- Indícanos las dimensiones del decorado; para conseguir mayor detalle, las dimensiones del decorado también han de ser de mayor tamaño.
- Con esto, el equipo de diseño tendrá la información necesaria para poder hacerte llegar una simulación de tu proyecto.

Chez ONIX, nous reproduisons vos images ou vos conceptions en mosaïque de verre, transformant chaque pixel en tesselles, créant ainsi des compositions personnalisées très attrayantes qui rendront votre espace unique.

- Expliquez-nous l'idée ou le motif à reproduire; vous pouvez nous envoyer une image de référence ou votre propre conception, avec la plus haute définition possible.
- Choisissez les matériaux qui composeront le décor. Nous vous offrons la possibilité de choisir entre de multiples couleurs, finitions et textures de mosaïque : lisse, métallique, luminescente, etc.
- Veuillez nous indiquer les dimensions de l'ensemble. Pour obtenir plus de détails, les dimensions de l'ensemble doivent également être plus grandes.
- L'équipe de conception disposera ainsi des informations nécessaires pour pouvoir vous envoyer une simulation de votre projet.

Residential Javea, Felipe Pantone | Pixel Art.

Digital Print

With the ONIX digital printing system, we can reproduce any image or vector file onto glass mosaic. Achieve spectacular results thanks to the high resolution and precise use of color this technique employs.

Mediante el sistema de impresión digital de ONIX logramos reproducir cualquier imagen o archivo vectorial sobre mosaico vitreo. Consigue un resultado espectacular gracias a la gran resolución y cromatismo que esta técnica ofrece.

Grâce au système d'impression numérique ONIX, nous pouvons reproduire n'importe quelle image ou fichier vectoriel sur de la mosaïque de verre. Il permet d'obtenir un résultat spectaculaire grâce à la grande résolution et au chromatisme de cette technique.

- Select the base material.
- Tell us the dimensions of the decoration.
- Send us the image you wish to reproduce. For best results, we recommend that the file be in JPEG or TIFF format with a resolution of 300 dpi for digital images, or in EPS or Ai for vector files.
- If the image does not have the appropriate resolution or measurements, ONIX will propose a similar image as an alternative.
- This is all the information our design team needs to be able to send you a simulation of your project.

- Elige el material base.
- Indícanos las dimensiones del decorado.
- Envíanos la imagen que deseas reproducir. Para conseguir mejores resultados, recomendamos que el archivo esté en formato JPEG o TIFF con una resolución de 300 ppp si se trata de una imagen digital o en EPS o Ai si se trata de un archivo vectorial.
- Si la imagen no tiene la resolución o medidas adecuadas, ONIX propondrá una imagen alternativa similar.
- Con todo esto, el equipo de diseño tendrá la información necesaria para poder hacerte llegar una simulación de tu proyecto.

Sustainability Information

At ONIX we strive to contribute to environmental sustainability hence we manufacture ecological and eco-friendly mosaics. In addition, we promote circular economy through the reuse of production surplus.

En ONIX nos preocupamos por el medio ambiente y la sostenibilidad, por eso fabricamos un producto ecológico y respetuoso con el entorno. Además de promover la economía circular, mediante la reutilización de mermas de producción, para la fabricación de vidrios menos exigentes respecto a la pureza de esta materia prima.

Production

- Fossil fuels are not used during our production process therefore greenhouse gases or polluting particles are not emitted into the atmosphere.
- Residual oils from presses and enamel wastes are collected for purification by a certified company.
- Our electric kilns are equipped with frequency converters in order to maximize energy efficiency by allowing the adjustment & control of working temperatures in a stable manner.
- Haulage of ground-glass within our facilities is carried out under sealed conditions. Pneumatic transport avoids the propagation of glass particles & subsequent environmental pollution.
- No water is used during our entire manufacturing process, therefore avoiding liquid residues.

Producción

- En ONIX no utilizamos combustibles fósiles en nuestros procesos de producción, no emitimos ni gases de efecto invernadero, ni partículas contaminantes a la atmósfera.
- Los aceites residuales de prensas y restos de esmaltes se recogen para su depuración mediante una empresa certificada para este propósito.
- Nuestros hornos son eléctricos y controlados por variadores de frecuencia que aseguran una alta eficiencia, lo cual permite ajustar las temperaturas de trabajo de forma estable y consumir solamente la energía necesaria.
- El transporte de polvo de vidrio que se realiza en nuestras instalaciones se efectúa bajo unas condiciones de estanqueidad proporcionada por transportes neumáticos, evitando así su propagación y contaminación del entorno.
- En nuestros procesos de limpieza no se emplea agua, por lo que no generamos aguas residuales en el proceso y al mismo tiempo, minimizamos su consumo.

Logistics

- Big-Bags and pallets are returned to our suppliers so they can be re-utilized. In addition, all the Euro pallets are recycled in order to favour circular economy.
- Brown cardboard is used for packaging as it is far less polluting than white cardboard. Boxes are designed to minimize the information carried by applying black ink only in order to optimize screen printing.

Logística

- En ONIX se reutilizan todos los Big-Bag y palets empleados en el proceso para enviarlos de nuevo a proveedores y que estos los llenen con nueva materia prima. Además, todos los Europalets que usamos son reciclados, favoreciendo una vez más la economía circular.
- Para el encajado de nuestro producto se emplea cartón marrón, cuyo proceso productivo es mucho menos contaminante que los cartones blanqueados. Las cajas se diseñan minimizando al máximo la información que contienen y utilizando únicamente tinta negra, a fin de reducir la cantidad de serigrafía empleada.

GO GREEN
Sustainability
Information

Chez ONIX, nous nous soucions de l'environnement et de la durabilité, c'est pourquoi nous fabriquons un produit écologique et respectueux de l'environnement, en plus de promouvoir l'économie circulaire par la réutilisation des surplus de production, pour produire du verre moins exigeant en termes de pureté de cette matière première.

Production

- Nous n'utilisons pas de combustibles fossiles dans nos productions, et nous n'émettons pas non plus de gaz à effet de serre ou de particules polluantes dans l'atmosphère.
- Les huiles résiduelles des presses et les déchets de vernis sont collectés pour être purifiés par une entreprise spécialement certifiée.
- Nos fours sont électriques et contrôlés par des variateurs de fréquence pour assurer un rendement élevé, permettant d'ajuster les températures de travail de manière stable et de ne consommer que l'énergie nécessaire.
- Le transport de la poudre de verre effectué dans nos installations se fait dans des conditions d'étanchéité grâce au transport pneumatique, ce qui permet d'éviter sa propagation et la pollution de l'environnement.
- Aucune eau n'est utilisée dans nos processus de nettoyage, ce qui signifie que nous ne générerons pas d'eaux usées et, en même temps, nous minimisons leur consommation.

Logistique

- Tous les Big-Bags et les palettes utilisées dans le processus sont réutilisés pour être renvoyés aux fournisseurs qui les remplissent avec une nouvelle matière première. En outre, toutes les palettes Euro que nous utilisons sont recyclées, ce qui favorise une fois de plus l'économie circulaire.
- Le carton brun est utilisé pour l'emballage de nos produits, et son processus de production est beaucoup moins polluant que celui du carton blanc. Les boîtes sont conçues de manière à minimiser les informations qu'elles contiennent tout en n'utilisant que de l'encre noire, afin de réduire la quantité de sérigraphie utilisée.

Private Villa | Opalescent Azul Celeste.

Types of Support

Dots

Great Grip

The dot backing system allows up to 91% of surface free for the adhesive.

El soporte por puntos deja libre hasta el 91% de la superficie para adhesivo.

Le système de montage sur points laisse jusqu'à 91% de surface libre pour l'adhésion du ciment colle.

Fast Installation

The size of 12 x 18 tesserae and the ease of installation allows up to a 27% time saving during the installation.

Este mayor tamaño de 12 x 18 teselas y la facilidad de colocación de las láminas permite un ahorro permaneciendo inalterable.

La dimension des plaques 12 x 18 permet un gain de temps de 27% durant la pose.

Maximum Flexibility

Full adaptability to any type of surface: corners, curved, irregular finishes...

Total adaptabilidad a cualquier tipo de superficie: esquinas, curvadas, acabados irregulares...

Adaptabilité totale à tout type de surface: angles, finitions courbes, irrégulières...

Minimum Thickness

An even thickness which conceals the surface of the grouting.

Un grosor homogéneo que se oculta por completo con el rejunte.

Une épaisseur homogène parfaitement cachée avec le rejoint du produit.

High Resistance

The dot backing is damp proof, so it can be stored outside and it will remain unaltered.

Este sistema por puntos es insensible a la humedad. Es posible almacenarlo en el exterior permaneciendo inalterable.

Ce système ne craint pas l'humidité. Le matériel peut donc être stocké à l'extérieur sans que celui-ci ne subisse aucunes altérations.

Mesh

Great Grip

Mesh mounting system leaves the 75% of the back free for the adhesive.

El sistema de soporte por malla deja libre el 75% de la superficie del mosaico para el adhesivo.

Le montage de la mosaïque sur filet laisse 75% de la surface libre pour le ciment colle.

Important Advice

Penta Glass Mosaic

This Artisan-edge glass mosaic is made with recycled glass pieces and may include irregular edges, rustic appearances, minimal imperfections or slight variations in sizing and squareness. These characteristics are inherent to this product due to the manufacturing process. The slight size or shape variations may affect the grout joint appearance, further enhancing the natural aspect of this product. Use constitutes acceptance.

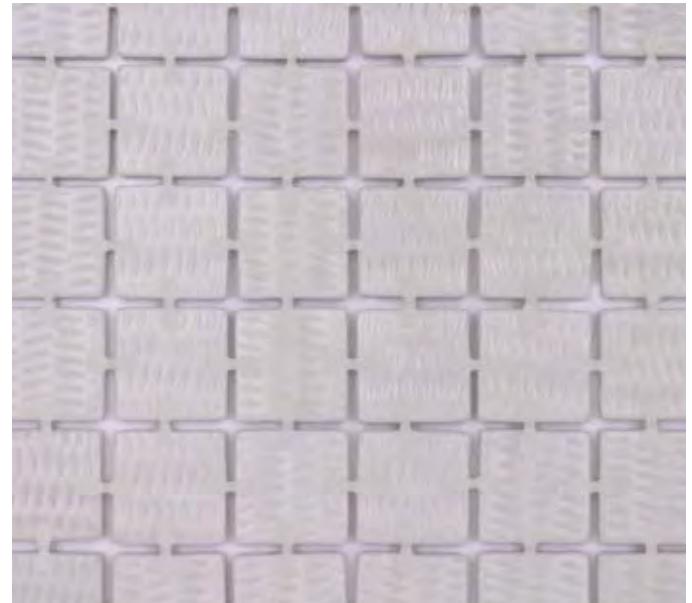

El aspecto artesanal del mosaico vitreo en formato PENTA es una calidad inherente en estos productos por el proceso de fabricación. Las teselas podrían incluir ciertas irregularidades y mínimas imperfecciones en el tamaño aportando cierta apariencia rústica más alejada de la perfección cuadrangular. Además la reducción de tamaño y variaciones de tono pueden afectar al aspecto del rejunte y modificar la apariencia natural de estos mosaicos. El uso constituye aceptación de esta advertencia.

Onix Glass Mosaic

All ONIX 98% recycled glass mosaics series are made of molten glass. Molten glass characteristics may include irregular edges and small variations in size. These characteristics are inherent to the product and to the standard production. The small size and shape variations can affect the grout joint appearance and enhance the natural aspect of these products. Use constitutes acceptance.

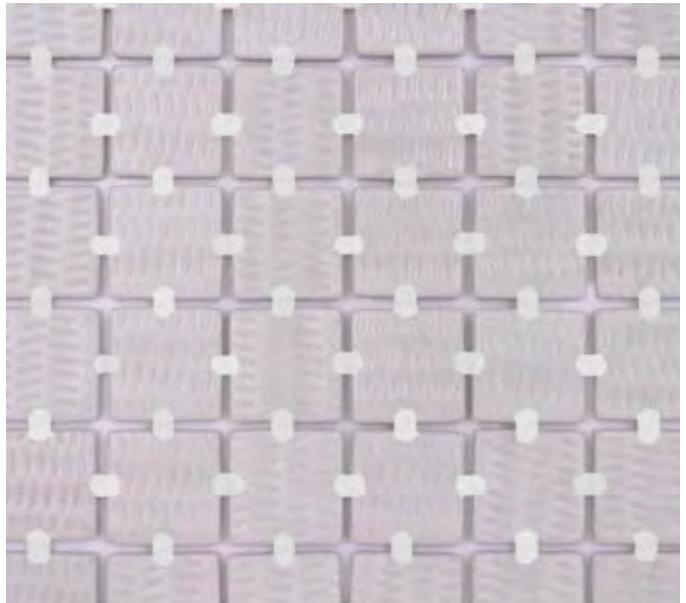

Todas las series ONIX con un 98% de vidrio reciclado están hechas con vidrio molido. Esta materia posee unas características particulares que podría ocasionalmente presentar irregularidades y variaciones de tamaño en las fichas. Es una calidad inherente al producto y a la producción estándar. La reducción de tamaño y variaciones de tono pueden afectar al aspecto del rejunte y modificar la apariencia natural de estos mosaicos. El uso constituye aceptación de esta advertencia.

- 98% Recycled Glass

- Eco Friendly

- Green & Sustainable Products

Installation Guide

ONIX glass Mosaics can be installed on interior and exterior areas and in wet and dry locations. Please refer to the Suitability area product guide and composition and check if the mosaic is suitable for the required application.

Glass tiles should not be exposed to high abrasion and high impact and or installed over flexible surfaces. Breakages or cracks are very noticeable in glass tiles so the use of a crack suppression membrane is recommended when mosaics are installed over a mortar bed but note that this is not applicable if mosaics are used as an accent. Some substrates could continue to cure and shrink and a crack suppression membrane prevents shrinkage to affect the mosaic tiles. Install only over well-cured, stable substrates. Expansion joint are recommended when substrates change.

Adhesives

Use of white thin set mortar adhesives is recommended. C2 as per EN 12004 norm or two component flexible acrylic or epoxy adhesives. Note that some glass mosaics may contain resins in the composition so when using a C2 adhesive make sure that it does not affect the resins and it is safe for glass mosaics containing resins. For pool and submerged installations check with adhesive manufacturers if additional steps or procedures are required.

Grouting

In order not to scratch the surface of the mosaics, non sanded grout is the recommended option. RG type and Epoxy grouts are the recommended options for installations. Float the grout into the joints to avoid scratching the surface of the mosaics. Special care and attention must be followed with the metallic and precious metals finishes to avoid scratches. Please refer to the Suitability area product guide composition and to the Tips for precious metals section and check if the mosaic selected contains these products.

Cutting and Drilling

Ceramic tiles cutting blades are not recommended for glass. Always use diamond blades designed for cutting glass on a wet saw. For drilling use of use a coring drill that is designed for glass.

Cleaning

The use of non-abrasive cleaning products is recommended.

Important note: All ONIX 98% recycled glass mosaics series are made of molten glass. Molten glass characteristics may include irregular edges and small variations in size. These characteristics are inherent to the product and to the standard production. The small size and shape variations can affect the grout joint appearance and enhance the natural aspect of these products.

PLAY VIDEO

Mosaic Installation
Guide for Pools.

Mosaic Laying Advice

El mosaico vitreo ONIX puede ser instalado en paredes interiores o exteriores, en zonas secas o humedas. Por favor consultar la Guía de productos y áreas de aplicación para comprobar si el producto es el adecuado para la aplicación.

El mosaico vitreo no debe ser expuesto a grandes abrasiones, grandes impactos o choques térmicos o instalarse sobre superficies flexibles. Las grietas en mosaicos son muy visibles por lo que se recomienda la utilización de membranas antifissuras cuando se instale sobre un lecho de mortero a no ser que se utilice como cenefa. Algunos sustratos pueden continuar secándose y contraerse a lo largo del tiempo y una membrana antifissuras prevendrá que traslade al mosaico la contracción o el movimiento del sustrato. Instalar solo sobre sustratos bien secos y estables e instalar una junta de expansión cuando haya cambios de sustrato.

Adhesivos

Usar un mortero blanco de capa fina C2 de normativa EN 12004 o un sistema bicomponente de flexible acrílico o epóxico formulado para la instalación de mosaico vitreo en paredes, tanto de interior como de exterior. Algunos mosaicos vitreos pueden contener resinas, por lo que cuando se utilice un C2 se necesita comprobar que este no afecte a las resinas. Para instalaciones en piscinas o superficies sumergidas comprobar con el fabricante de adhesivos si son requeridos algunos pasos o materiales adicionales.

Rejuntado

Utilizar junta sin arena con mosaico vitreo para evitar el rayado de la superficie. Juntas RG o Epóxicas son las recomendadas. Cuidadosamente llenar las juntas y evitar el rallar la superficie del mosaico. Especial atención se debe tener con los materiales que contienen acabados metálicos y metales preciosos como oro. Por favor consultar la Guía de productos y áreas de aplicación y los Consejos para metales preciosos y comprobar si el mosaico elegido los contiene y seguir las instrucciones para evitar rayados y otros problemas.

Cortes y perforaciones

Los cortadores o perforadores diseñados para la cerámica no están indicados para el mosaico vitreo. Para cortar utilice un disco de diamante en mojado, el disco para cortar mosaico es un disco fino con diamantes más pequeños que un disco para cortar cerámica. Para perforar un agujero use una broca que esté diseñada para cristal.

Limpieza

Se recomienda el uso de productos de limpieza no abrasivos.

Nota especial: Las series de ONIX de 98% de vidrio reciclado están hechas con cristal molteno y fundido. Las características del cristal fundido incluyen algunos bordes irregulares y pequeñas variaciones en el tamaño. Estas características son inherentes al producto y a la producción estándar. Las variaciones en forma y aspecto tienen un pequeño impacto en la apariencia final del producto rejuntado e intensifican el aspecto natural de estas series.

La mosaïque de verre ONIX peut être posée en murs intérieurs et extérieurs, en zones sèches et humides. Veuillez consulter notre Guide de produits et zones d'applications pour vérifier si le produit est le adapté pour l'application voulue.

La mosaïque de verre ne doit pas être exposée à de grandes abrasions, de grands impacts ou d'importants chocs thermiques ou ne peut être posée sur des surfaces flexibles. Les fissures sont très visibles sur la mosaïque. Nous recommandons donc l'utilisation d'une membrane anti-fissures quand la mosaïque doit être posée sur un lit de mortier sauf quand elle est utilisée en frise. Certains substrats pourraient continuer à sécher et à se rétracter avec le temps et la membrane anti-fissures empêcherait que l'action de contraction et de mouvement affecte la mosaïque. Poser seulement sur des substrats secs et stables et faire un joint d'expansion quand il y a un changement de substrats.

Asthésifs

Utiliser un mortier blanc de couche fine type C2 selon la norme EN 12004 ou un système bicomposant de flexibles acryliques ou epoxy de couleur blanche prévu pour la pose de mosaïques sur murs tant à l'intérieur qu'à l'extérieur. Certaines mosaïques de verre peuvent contenir des résines dans leur composition. Lors de l'utilisation d'un mortier C2, veillez vous assurer que celui-ci n'affectera pas les résines et la mosaïque. Pour une pose en piscines ou submergée, veillez vérifier auprès du fabricant d'adhésifs qu'aucune action ou matériaux additionnels sont nécessaires.

Joints

Utiliser un joint sans grain pour éviter les rayures de la surface. Les joints RG ou epoxy sont les joints recommandés. Remplir soigneusement les joints en évitant toutes rayures. Une extrême précaution est recommandée dans la manipulation de matériaux aux finitions métalliques ou contenant des métaux précieux comme l'or. Veuillez consulter notre Guide de produits et zones d'applications et les conseils pour métaux précieux pour vérifier si la mosaïque choisie en contient et suivez les instructions pour éviter les rayures et autres problèmes.

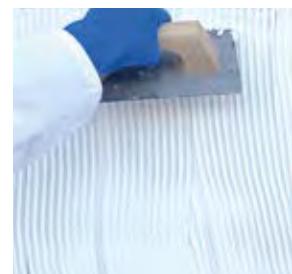

Coupe et perforations

Les coupeuses et perforateurs pour céramiques ne sont pas indiqués pour la mosaïque de verre. Pour couper, utiliser un disque de diamant à eau, le disque pour couper la mosaïque étant un disque fin à diamants plus petit que celui utilisé dans la céramique. Pour percer un trou utiliser un foret spécial verre.

Nettoyage

L'utilisation de produits de nettoyage non abrasifs est recommandée.

NB: Les séries d'ONIX de 98% de verre recyclé sont fabriquées avec du verre broyé et fondu. Les caractéristiques de ce verre incluent donc des bords irréguliers et des petites variations dans la taille de la mosaïque. Ces caractéristiques sont inhérentes au produit et à la production standard. Les variations en forme et aspect ont un impact sur l'apparence finale du produit rejunté et intensifient l'aspect naturel de ces séries.

Preparation of the base

The base on which the laying will be effected, must be perfectly smooth, uniform and white. A different colour damages the aesthetic look of the final result.

The glueing operation

White C2 glue, as per EN-12004, must be used. By using the smooth side of the trowel, the glue has to be spread out uniformly on the base (2 sq.m. approximately). By using the jagged side of the trowel (2 or 3 mm.), comb the glue.

The laying of mosaic tiles

Adhere the sheet to the surface by pressing with a rubber trowel. It is important to make sure that the distance between one sheet and another is the same as the one among the tesserae so that all the joints look alike. We suggest to join the sheets when it comes to laying.

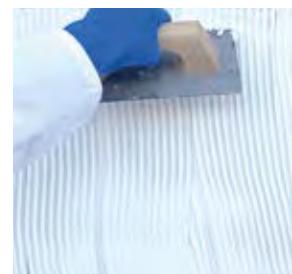

Grouting

Joints must be clean, dry and free from dust. The remains of adhesive, after laying, must be removed while it is still fresh. Use grouting paste, RG type, as per EN 13888, spread it out with a rubber trowel.

Cleaning

Let it dry until the paste gets brightless, superficially, and then proceed to clean it with a sponge soaked in water. Once it gets dry, remove it with a dry cloth.

Preparación del soporte

El soporte sobre el cual se efectuará la colocación deberá de estar liso, uniforme y de color blanco. Un color diferente perjudica la estética del resultado final.

Operación de encolado

Usar cemento cola tipo C2 color blanco, según EN-12004. Usando el lado liso de la llana extender el adhesivo uniformemente sobre el soporte (aproximadamente 2 m²). Con el lado dentado de la llana (2 ó 3 mm.) peinar el cemento cola.

Colocación mosaico

Adherir las láminas a la superficie presionando con una llana de goma. Es importante asegurarse que la distancia entre hoja y hoja es igual a la que hay entre las teselas para que todas las juntas sean iguales entre sí. Aconsejamos tratar las hojas a la hora de su colocación.

Rejuntado

Las juntas deben estar limpias, secas y exentas de polvo. El adhesivo sobrante de la colocación se debe eliminar cuando esté todavía fresco. Utilizar pasta de rejuntar tipo RG según EN 13888, extendiéndola con una llana de goma.

Limpieza

Dejar secar hasta que la masa pierda el brillo superficial y proceder a su limpieza con una esponja húmeda en agua. Una vez seco eliminar con un trapo seco.

Préparation de la surface

La surface sur laquelle on va effectuer la pose, doit être parfaitement lisse, uniforme et blanche. Une couleur différente nuit l'aspect esthétique du résultat final.

Opération de collage

Employer une colle de type C2 de couleur blanche, selon la norme EN-12004. Tout en employant le côté lisse de la truelle, la colle doit être répartie uniformément sur la surface (2 m² approximativement). Tout en employant le côté denté de la truelle (2 ou 3 mm.), peigner la colle.

La pose de la mosaïque

Adhérer la feuille à la surface tout en pressant avec une truelle en caoutchouc. Il est important de s'assurer que la distance entre chaque plaque est identique à celle entre les tesselles, de façon à ce que tous les joints soient égaux entre eux. Nous conseillons une pose des plaques en quinconce.

Remplissage des joints

Les joints doivent être propres, secs et sans poussière. Le surplus de colle suite à la pose doit être éliminé lorsqu'il est encore frais. Utiliser un joint de type RG selon la norme EN13888, tout en répartissant avec une truelle en caoutchouc.

Nettoyage

Laisser sécher jusqu'à ce que le joint perde son éclat superficiel et procéder à son nettoyage avec une éponge humide. Une fois que tout est sec, nettoyer avec un chiffon sec.

Mosaic Laying Advice Shading Blends

Application Shading Blends

Our gradients allow for a smooth transition from one tone to the next, from darkest to lightest.

They are sold in modules of eight sheets, or levels, from levels L1 to L8.

Each level consists of a specific percentage of tiles, which allows for the transition between different levels to take place gradually, harmoniously and seamlessly, so that the eye is unaware of where one section ends and the next begins.

Individual levels are available for purchase and can be used to complement flooring, overlays, ceilings or any other surface.

Aplicación Shading Blends

Los degradados proporcionan una suave transición entre tonalidades, desde la más oscura a la más clara.

Se comercializan en módulos de ocho láminas o niveles, que van desde el nivel L1 al L8.

Cada nivel está formado por un porcentaje de teselas determinado, de forma que la transición entre los diferentes niveles se produce de manera gradual y armónica, sin apreciarse cortes entre las diferentes secciones.

Es posible adquirir niveles independientes para complementar el pavimento, revestimiento, techo u otra superficie.

Application Shading Blends

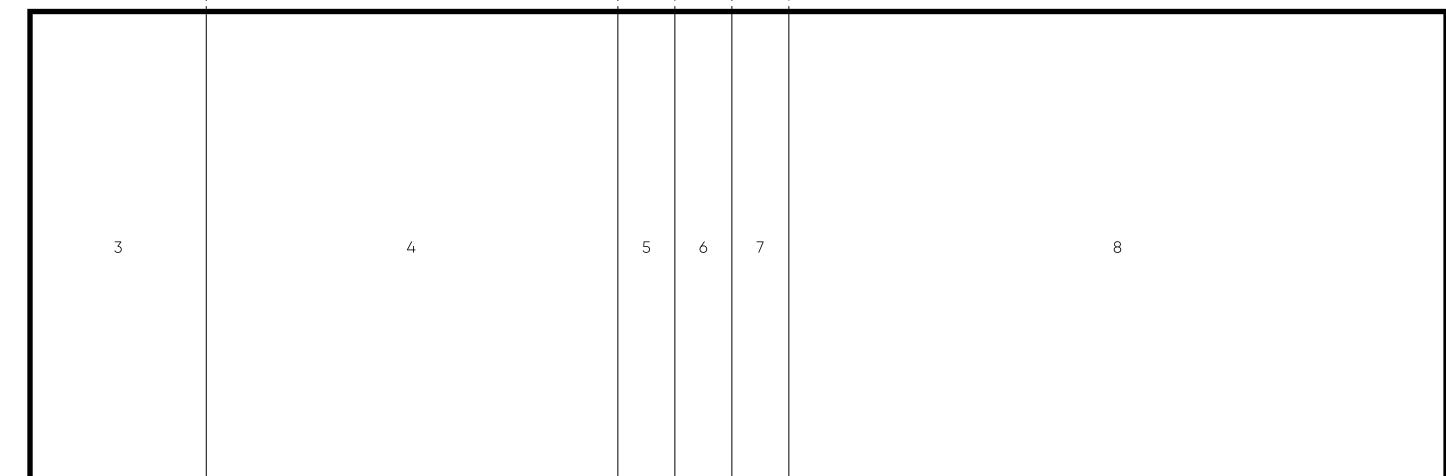

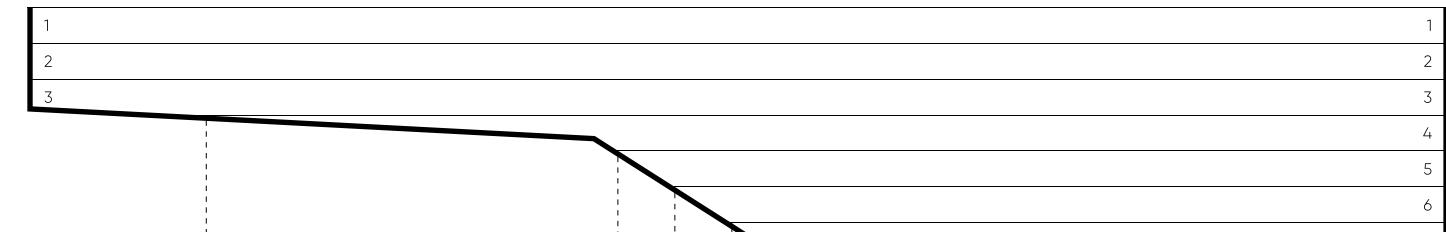

Les dégradés permettent une transition en douceur entre les nuances, de la plus sombre à la plus claire.

Ils sont commercialisés en modules de huit feuilles ou niveaux, allant du niveau L1 au niveau L8.

Chaque niveau est composé d'un certain pourcentage de tesselles, de sorte que la transition entre les différents niveaux est graduelle et harmonieuse, sans rupture entre les différentes sections.

Il est possible d'acheter des niveaux indépendants pour compléter le sol, le revêtement, le plafond ou toute autre surface.

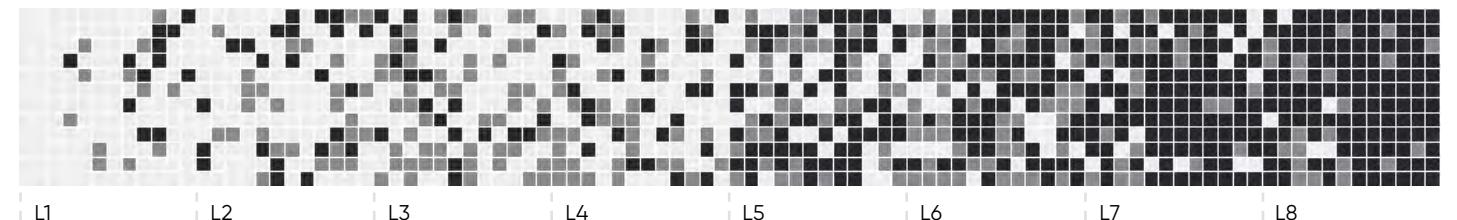

Use in swimming Pool

Mesh

1 Module | 12X12.

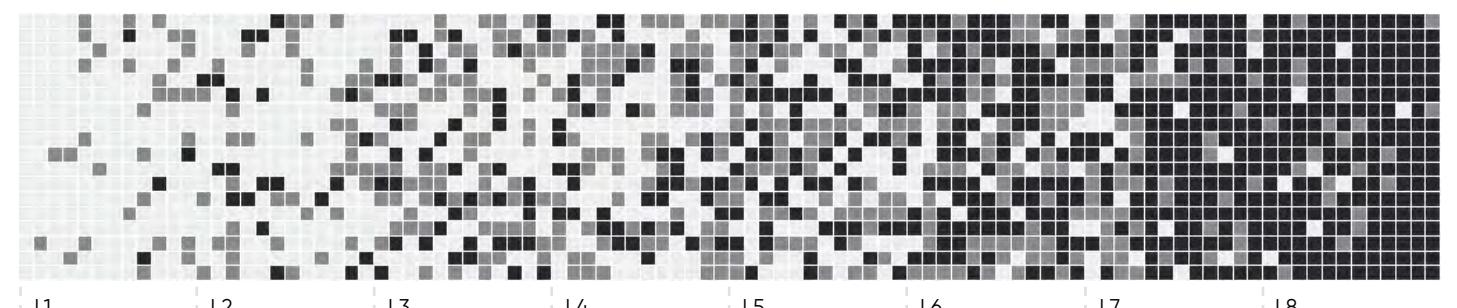

2488 x 311 mm | 0,77m² - 8.28 sqft

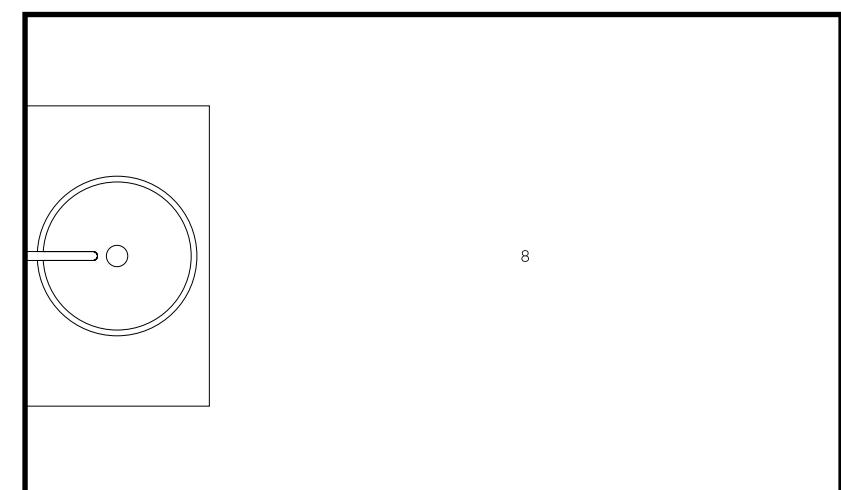

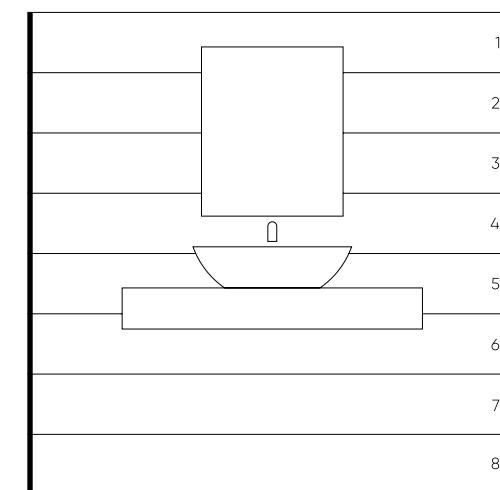

Dots

1 Module | 12X18.

2488 x 467 mm | 1,16 m² - 12.5 sqft

Use in interior
