2023 WORKSHOPS

Welcome to The Neuro-Inclusion Experience

We've re-engineered our approach to DEI to construct a transformational process where experts, peers and leaders are brought together to engage in discussion around identity, challenges, goals, ideas & solutions.

NEURO-INCLUSION METHODOLOGY

For the first time in history, we have detailed information about the brains inherent processes, and how they clearly influence our experiences, perceptions, and beliefs – all under the watch of our conscious awareness.

From neuroscience we now have information into how biases operate, what we can do to overrule them, and how we can work with the brain to develop higher level Cultural IQ, Emotional Intelligence & Inclusion Capabilities.

The Neuro-Inclusion Experience focuses on the actionable application of DEI Learning. We introduce new skills to reduce defensiveness, build trust and create transformative outcomes.

No More Traditional “Training”
