

Swami Vivekananda said “Education is Manifestation of the Perfection Already in the Man”. His immense concern for uplift of our unfortunate fellow citizens has been a foundational driver for all of Tapassya’s actions. Through ‘**TAPASSYA Jyoti**’, the flagship stream for education, we have the experience in educating and enabling first generation learners over more than a decade now, we feel the need of personalized education model as opposed to the traditional approach and bridge the gap between perceived vs required knowledge level.

Having seen the skill-based livelihood their parents lead, the first-generation learners will relate to practical knowledge more than a pure pursuit of theory. Keeping this in view, we will have interactive teaching aids as a key tool for educating them for enhanced visualization and better assimilation. To do this, we need **knowledgeable and passionate teachers, a conducive infrastructure, and above all collective wish and support.**

With your blessings, we have envisaged to start a primary co-educational school at our Duttapukur premises (District: North 24 Parganas, approx. 35 kms from Kolkata) in West Bengal. The premises houses Administration, School and Ashram buildings spread across three adjoining plots.

Our school will be registered with the West Bengal Board of Primary Education. The primary school under the Government of West Bengal grants affiliation up to class V.

Current status: We have initiated the project and received corporate CSR support in the form of capital grant. The work is in progress with structure up to second floor. To fulfil the guidelines for government affiliation, we would need further support for construction of the third floor of the building and meet the minimum numbers of distinct rooms’ requirement. The new building is an extension of an existing two storeyed infrastructure, where currently a children morning proactive intervention school operates to supplement their learning beyond formal institution.

School premises entrance

Proposed Playground and Assembly point

Our plan is to use our existing Ashram and Admin building premises for playground, rest room, library and computer centre. These would also require refurbishing and revamping of those structures.

Therefore, we earnestly request your contribution and support. It will help in early start of the school to meet the aspiration of the children and their families in Duttapukur. Your cooperation will enable us fulfilling our stated mission of educating first generation learners.

A summary of the support requirement is furnished below:

Parts	Details	INR
CORE PART	JOB Value - Upto First Floor including Toilet, Plumbing, Electrical, Wooden & External fencing	17,05,351.20
