

FLOORPLANS:

A hand drawn floorplan is fine, but it **needs to be neat, and contain any relevant information**. Relevant information includes:

- Location of the Visualert lights
- Location of smoke detector
- Location of the switchboard
- Location of any manholes for access to the roof (if there is any)

1. Visualert U-Fire Panel Floorplan example

2. Visualert All-in-one Alert Panel Floorplan example
