VISUALERT

Photos of the house needed:

Photo 1: Roof (outside), an **outside photo of the whole house (for an idea of size)**. These can be done in one photo. See Examples below:

Photo 1: Roof (outside), an **outside photo of the whole house (for an idea of size)**. These can be done in one photo. See Examples below:

**Photo 2: Ceilings (inside). Requires 3 - 4 pictures depending on size of the house. See examples below**

**Photo 3: Photo of the switchboard:**

FLOORPLANS:

A hand drawn floorplan is fine, but it **needs to be neat, and contain any relevant information**.

Relevant information includes:

- Location of the Visualert lights
- Which lights the client will need (fire, doorbell, baby, duress, phone)
- Location of the switchboard
- Location of any manholes (access to the roof)

Panel Builder - The U-Fire Panel

It is incredibly important that you get notified of your smoke alarm in your premises. Our U-Fire Panel is completely hardwired and makes sure that you receive visual and sensory notification in your residence in case of a fire.
