Orthopedic Plaster Technician – Volunteer Opportunities

This is a volunteer opportunity, but meals and lodging aboard the ship are provided at no cost. The minimum service commitment for this role is 10 weeks.
We're hoping to connect with experienced orthopedic casting professionals who may be interested in using their skills to make a meaningful difference in the lives of patients who otherwise have limited access to surgical care. Please feel free to share my contact information with anyone who may be interested!

I'd be happy to provide additional information or answer any questions. Thank you so much for your time and consideration!

Together we bring hope and healing!

Together we bring hope and healing.
