

**WE ARE A GROUP OF
PASSIONATE PROFESSIONAL
INDIVIDUALS - ALL EXPERTS
IN OUR FIELDS SHARING A
COMMON GOAL...**

Our Goal

This goal is to provide high level joined-up thinking, advice and support to individuals and their families, who are in need of specialist care at any stage in life. All too often help comes or is sought out when a crisis occurs...which can be distressing, time consuming and costly!

Our Mission

By working together and pooling knowledge, members of the ECF are extremely well equipped to guide their clients to the best place from which to access the information they need. This allows clients to find their way through the sometimes confusing information available and to make considered decisions. If not experts in an area themselves, ECF members can source advice on care related issues from fellow members who are trusted experts in those areas.

Our experts are here to offer friendly advice on a wide range of complementary services to help people plan, organise and make educated and informed choices around their individual circumstances and care requirements.

If not experts in an area themselves, ECF members can source advice on care-related issues from fellow members who are trusted experts in those areas...potentially saving the client from attending a number of meetings when one is sufficient.

The people we have helped have told us that they have felt much more in control and able to make sense of the sometimes confusing information available in order to make considered decisions.

Because we care

ECF can help you with...

- Sourcing the best residential and home care providers
- Financial Planning and care cost funding advice
- Understanding the care and benefits system in Scotland
- Letting out and managing the family home
- Powers of Attorney and Guardianships
- Making or updating a Will
- Providing general Legal advice
- Relationship Banking
- Estate Agency services
- Advising on Tax issues
- Matters relating to Home Insurance
- House Valuation and Clearance services
- Funeral Planning

Our members...

“The average cost for a residential care home in the UK can start at around £2,880† a month. This can rise quite substantially depending on what sort of care is required, where you live and your savings. The average residency is about three years so the costs can be substantial.”

†Payingforcare.org, 2022
