

Tummy Tickles Day Care

Risk assessment for apprentices and inexperienced staff members who don't count in the ratio

What are the hazards?	Who may be harmed?	What are we doing already?	Do we need to do anything else to manage the risk?
<ul style="list-style-type: none"> ● Lack of experience ● May pick up a child the wrong way ● May leave items out or not recognise trip hazards ● Unaware of potential risks to safety of children, themselves and others ● Use of inappropriate language ● More of a hindrance than a help ● Lack of health and hygiene knowledge ● Lack of awareness of dangerous chemical and harmful substances 	<ul style="list-style-type: none"> ● Children ● Staff ● Themselves 	<ul style="list-style-type: none"> ● No sole charge ● No personal care ● On-going training on the job ● First aid training needs to be completed as soon as possible after starting at the setting ● College have risk assessed the setting ● Booked on to child protection course ● Level food 2 hygiene to be completed as soon as possible after start date ● Training on the correct use of chemicals in the setting 	<ul style="list-style-type: none"> ● Review meetings and ongoing discussions to check for understanding of the roles and responsibilities of caring for children ● Give clear instructions of tasks to be carried out ● Supervision given when apprentice embarks on a new task ● Supervised when new to the setting ● Carry out induction training in first week of placement ● Ensure all training has been completed.
