accuracy in motion. accuracy in motion.

## loader scale

The **Legaloader EZ** loader scale is absolutely the easiest scale to use and maintain. The accuracy is well within 1% on most loaders and the bright easy to read display makes loading 24 hours a day a breeze. On-site supervised installation will ensure that when finished you will know from then on your trucks will be loaded properly and your operators are more productive as a result.

The **Legaloader EZ** loader scale provides all the features an operator needs for fast, accurate readouts of single and accumulated load weight totals in front-end loaders, fork lifts, container lifts or other hydraulic lift equipment.

## Features

- Continuous Lifting Movement
- Time Proven Magnetic Switch Operation
- Bright LCD display
- Full-Digit Weight Display up to 999,990
- Automatic "zero"
- Automatic "add"
- Reweigh option for last bucket weight
- Simple Calibration Procedure
- Rugged, Durable, and Shock Resistant
- Space-Saving size
- On-site supervised installation anywhere in North America

## Legaloader EZ Loader Scale

The **Legaloader EZ** has all the features an operator needs for fast, accurate readouts of single and accumulated load weight totals in front-end loaders, fork lifts or other hydraulic lift equipment.

### How the Legaloader EZ system works

Two pressure transducers tapped into the loader's main hydraulic lift lines sense the pressure required to lift the bucket. The **Legaloader EZ** converts this pressure reading into a weight reading when the bucket is raised past the magnetic switches. Digital display in the cab shows the weight of each bucket and the accumulation reading, which can be reset for the next load.

### What's new about the Legaloader EZ

This redesigned scale is a refinement of the popular Legaloader series of scales, first put into service over a three decades ago. The new design is smaller and lighter yet retains durability and accuracy demanded by industry professionals.

### Viking Scales, Inc. Provides a Technical Representative For Installation and Supervision

The small 5.5"H x 5.5"W x 2.75"D **Legaloader EZ** can be installed in any front-end loader, fork lift, and most hydraulic lifting devices (call us for specific application), and we send a Technical Rep to supervise installation and instruct your personnel in the most efficient usage. **Legaloader EZ's** are sold and serviced world-wide by "the folks who don't mind a little dirt on their boots."

### Field Tested and Proven

Each **Legaloader EZ** has been thoroughly field-tested and is so rugged and reliable, we back it with a full two-year limited warranty. The durable all-metal enclosure is highly resistant to extreme conditions of dust, moisture, heat and cold.

### Features

Time Proven Magnetic Switch Permits Continuous Lifting Movement

Bright LCD displays

Full-Digit Weight Display up to 999,990

Automatic "zero"

Automatic "add"

Reweigh feature lets the operator adjust the final bucket before the it's loaded into the truck.

Universal Shock Absorbent Mounting System to permit installation almost anywhere in the cab.

Optional Printer Available

### Specifications

Maximum bucket weight 99,990

Maximum accumulated weight 999,990

Accuracy +/- 1/2 of 1 percent to 1 1/2 percent

Power supply 12 VDC or 24 VDC

Size of unit 5.5" x 5.5" x 2.75"

Shipping weight approx. 20 pounds

Can be calibrated to read in pounds, tons or kilos.

Made, with pride, in the USA and warranted for a full 2 years.
