

# Homeowners Association of Covered Bridge

## Tree Removal Process and Application

Trees greater than 4" in diameter at chest height must have an Architectural Control Committee (ACC) approval before removal. Homeowners should mark the tree(s) with a ribbon and take pictures of the tree(s) in question. This completed form and photos (attach additional documentation or explanation if necessary) can be emailed to:

[Savannah@Sentrymgt.com](mailto:Savannah@Sentrymgt.com)

### **Removal due to dead, diseased, lightning strike, or leaning**

- The ACC has contracted with an independent certified arborist who will review the request. The required fee must be submitted with the completed tree removal form and photos. Submitting the application gives the arborist permission to review the trees on site.

1-3 Trees \$50.00

4+ Trees \$75.00

New Construction or large ACC Builds \$150.00

- After reviewing the recommendation of the arborist, the ACC may request a landscape plan. A landscape plan, either from your own vendor or the arborist, will be required for any request of more than four trees.
- The arborist will submit a report of his findings to the ACC for a decision. If the homeowner disagrees with the arborist report they may submit their own certified arborist report for reconsideration by the ACC.
- In emergency situations, the ACC may make a decision regarding removal without the use of an arborist.

### **Removal for other reasons**

- In the case of a new landscape plan, this request should be accompanied by a plan completed by an ISA-certified arborist or landscape architect. While not required, the ACC arborist can prepare a plan for the homeowner for a \$250 fee.

**General pruning does not require ACC approval.**
