

The Latest News from AeroSouth - June 2022

AeroSouth at the 2022 Nationals

Congratulations to all 79 participants in the [2022 USSCA Sunfish North American Championship Regatta](#), held on June 15-18 at the Hyannis Yacht Club. Among the sailors making use of our popular [mainsheet hanger clips](#) were **Ricardo Seguel Lacámara** of Chile, who finished in 2nd place behind **Jean Paul de Trazegnies** of Peru, and Sunfish expert **Lee Montes** of Long Island, who finished in place 24.

[Order your own set of clips](#) today and you'll be one step closer to performing among the world's best Sunfish sailors.

FS Rudder Blades Win Praise

We're kept busy these days filling numerous orders for our beautiful, high-performance **FS Rudder Blades** and **Sabre Daggerboards**. We appreciate customer comments, such as this one from Scott Bailey: "I just received one of your rudder blades along with a tiller, purchased through Sunfish Direct. I love the rudder and can't wait to try it out!"

Dinghy Bob Proves Itself in 22mph Winds

Recently Michael Pad of West Bloomfield, Michigan wrote to report on his first experiences with his new **Dinghy Bob**:

"The winds were 22 mph when we went sailing today. We were going practice capsizing with my daughter, but with the winds so crazy, we decided not to. My daughter then did capsize, but Bob worked great and kept us from turtling - Great invention!"

Dinghy Bob is available for Sunfish- and Laser-

class dinghies [at the AeroSouth Store](#).

FS Rudder Blade for the MX-RAY

Some people just can't go fast enough on the water!

Derek McKesson of Texas sent us a picture of his sleek **MX-RAY** sailboat, a design from Russian naval architect Vlad Murnikov and formerly produced by M-Yachts. Sail Magazine described Murnikov and his avant-garde creations in an article in August, 2017 entitled "mxNext" found [at this link online](#).

"Ever since Russian naval architect Vlad Murnikov burst onto the scene with his Whitbread racer Fazisi back in 1989—a time when Russia was still the Soviet Union—his designs have defied the norm. And with the passage of time, his vision has only become that much more exuberant."

Not satisfied with his MX-RAY's 20-knot speed, Derek plans on adding an **AeroSouth FS rudder blade** for even greater performance. Good Sailing, Derek!
