479-370-3555 BentonvilleCerakote@gmail.com

Cerakote Price List (before .095% State and Local taxes)

We are an FFL Type 01 Licensed Dealer

2/3 down-payment required, balance before or at delivery. No payment = No delivery.

Call, text, or FB Messenger for a quote.

Disassembly / Reassembly (D&R Fee) (always on top if required)

Some firearms will require extra time and will be billed at an hourly rate for gunsmithing.

Precision tolerance machine parts will not be coated as it would interfere with their operation

Prices are for completely stripped firearms. Add for disassembly/reassembly.

No work will be done without a purchase agreement.

When mailing or dropping of a firearm,

PLEASE clean the firearm first of any dirt, grit, grease, etc. prior to giving it to us.

Dirty firearms destroy the acetone bath in the degreasing tank rendering it useless.

If your firearm is dirty, we will automatically charge an acetone replacement fee of \$100.00

We are not trying to be dicks,

but we can't be swapping gallons and gallons of acetone with every project we do.

FFL Firearm Transfer

\$25.00

Pistol Cerakote

Disassembly / Reassembly (always on top if required)

\$49.00

					High Temp

Add for each additional common color				\$29.00
Add for uncommon colors (like "ruby red", "lemon zest", "lollypop purple", etc)				\$39.00
Add for High Temp Stencils for Multicam, ATACS, etc.		120		\$49.00
Add for High Temp fine line Stencils such as Octagonal, Kryptek.				\$149.00
Special note on Stencils: They don't stick very well on highly textured Polymer				
Add for Custom Logo / Graphics (add (+/-) 2 weeks)				\$59.00
Add for Battle Worn or "Bobba Fet" wear/distressing add				\$99.00
Add for clear coat (the strongest oven cured clear coat on the market)				\$49.00
Add for Cerakote FX color shifting finish				\$59.00
Add for pencil thin Cerakote in engravings, stamps, etc.				\$69.00
MARKINGS : For receivers, frames, slides, Pic rails which have painted on or lightly laser etched markings these markings will be lost during the surface preparation and coating unless they are machine engraved or stamped. If these markings are of great importance we can mask over them, but (if masked) those areas in and immediately around the markings will not be coated and, as such, will not blend. Manufacturer's serial numbers will be masked at no additional charge where needed or coated where possible. Some manufacturer model numbers, name etc which are laser engraved will be masked over. This is per BATFE (ATF) regulations.				
Please consult us for specific requirements.				
* Common Color List				
Matte Armor Clear Coat H-301, High Gloss Armor Clear Coat H-300				
Old Glory - H-167 USMC Red, H297 Stormtrooper White, H171 NRA Blue				
Multicam Colors – H-344 Olive, H-341 Dark Green, H-340 Light Green, H-339 Pale Green, H-342 Dark Brown,				
Multicam ARID - H-342 Dark Brown, H-258 Chocolate Brown, H-203 McMillan Tan, H-143 - Benelli Sand				
Kryptek Highlander - H-146 Graphite Black, H-265 Flat Dark Earth, H-226 Patriot Brown, H-269 Barrett Brown				
Gen II NV Reducing – HIR-265 FDE, HIR-253 Solid Leaf Green, HIR-199 Desert Sand, HIR-146 Graphite Black				
H-Series is rated to 500 degrees, some bbls and all suppressors NEED a higher temp rating.				
That's why we ONLY recommend C-Series Cerakote for High Temp Applications.				
H-Series Cures at 250 degrees for 2 hours.... This can DAMAGE night sights and sealed optice like Rifle Scoped and Red Dots... We ONLY recommend C-Series, V-Series, or Glacier Series for these items as these types of Cerakote, while marginally less durable, have an "AIR CURE"				
Final cure which is fully cured in 7 days.
