Welcome to Visum Contracting Group's 2025 -2026 Catalog

Dear Valued Partners,

At Visum Contracting Group, our mission is to empower law enforcement, military, and security professionals with the tools, training, and expertise needed to protect and serve with confidence. With over a decade of experience, we are proud to deliver cutting-edge, scenario-based training programs and high-performance tactical equipment tailored to meet the demands of an ever-changing world.

This catalog showcases our comprehensive range of solutions—top-tier firearms, gear, and body armor from brands we trust with our own lives. Each offering is designed to enhance operational readiness, strengthen community safety, and preserve human life through innovation and precision.

We understand the challenges you face, and we are committed to being your trusted partner in preparedness. Thank you for choosing Visum Contracting Group. Together, we can unlock excellence in training and equip you to face any challenge.

Sincerely,
Anthony Gizzi
Chief Executive Officer
Visum Contracting Group

Plate Carriers

LBAC PLATE CARRIER

"Load Bearing Adaptive Carrier" is a multi-role load bearing plate carrier that is designed to be extremely modular allowing user to navigate obstacles while providing comfort and support with additional weight.

RAC PLATE CARRIER

The HRT RAC Plate Carrier is a multi role versatile plate carrier that is designed to be extremely modular allowing users to navigate obstacles. The base model is easy to don and doff, while holding life-saving plates.

HRAC ADAPTIVE CARRIER

The HRT HRAC is a no-nonsense plate carrier that is designed to be extremely modular. This base model is easy to don and doff. The carrier is made from 500 Denier Cordura treated with DuPont Teflon.

MODULAR PLATE CARRIER

The Burn Proof Gear Modular Plate Carrier System is the result of over four years of dedicated research, development, and rigorous testing. Designed with direct input from members of the U.S. Special Operations community, law enforcement professionals, and civilian users, this system stands out as a lightweight, ergonomic, and adaptable solution tailored for the demands of real-world operations.

QUICK RELEASE CUMMERBUND

The HRT Quick Release Cummerbund was designed with the purpose to quickly doff and don your carrier, but still maintain the function of a MOLLE cummerbund. The Quick Release Cummerbund utilizes Duraflex buckles for quick detach, featuring 3 rows of PALS webbing to attach your MOLLE pouches or side plates.

2-BAND MOLLE CUMMERBUND

The HRT 2-Band MOLLE Cummerbund was designed with the purpose to reduce weight, but still maintain the function of a MOLLE cummerbund. The 2-band cummerbund is roughly 2/3rds the weight of standard cummerbunds on the market, featuring 2 rows of PALS webbing to attach your MOLLE pouches or side plates.

MAXIMUS PLACARD

The HRT Maximus placard was designed to attach to our HRT HRAC and RAC plate carrier or work in conjunction with Duraflex buckle system. Our Maximus placard features triple M4 style magazine inserts along with two handgun magazines with polymer inserts.

TRIPLE AR PLACARD

The HRT Triple AR Placard was designed to attach to our HRAC and RAC plate carriers or work in conjunction with Duraflex Buckle system. Our HRT Triple AR Placard holds three M4 style rifle magazines. The magazine pouches feature a polymer insert along with bungee retention to keep your magazines in place.

RESPONSE PLACARD

The Placard was designed to attach to our HRT HRAC and RAC plate carriers or work in conjunction with Duraflex Buckle system. Our Response Placard holds two M4 style rifle magazines along with two handgun magazines. The magazine pouches feature a polymer insert along with bungee retention to keep your magazines in place.

RECON EXPANDABLE PLACARD

The HRT RECON Placard was designed for maximum scalability and modularity, whether used as a standalone chest rig or mounted to any plate carrier. Built for mission adaptability, the RECON Placard features an expandable main pocket capable of holding up to (4) 5.56 AR15 magazines. It includes a (3) mag elastic AR15 insert and can be scaled to hold (2) heavy or (4) standard AR-style magazines based on operational needs.

MODULAR PLACARD

The BPG Modular Placard is specifically designed to accommodate AR15 and 5.56 magazines, offering a durable and reliable solution for operators who demand performance and versatility. Measuring 9 inches wide and 6 inches tall, this placard provides a secure and adaptable platform for carrying standard magazines while maintaining the exceptional quality you expect from Burn Proof Gear.

MODULAR PLACARD HEAVY

The BPG Modular Placard – Heavy is specifically designed to handle the demands of AR10 and 7.62 magazines, offering a durable and reliable solution for those needing a more robust setup. Measuring 10.5 inches wide and 6 inches tall, this heavy-duty placard provides a secure and versatile platform for carrying larger magazines while maintaining the adaptability and performance you expect from Burn Proof Gear.

ZIP-ON HYDROMAX PACK

The HRT HydroMax Pack Zip-On Back panel was designed with the purpose of versatility. The large single pocket design allows users to properly carry hydration along with supplies that can be easy access for team members. With the expandable design the HydroMax Pack can go from a compact profile to large profile capable of holding mission critical supplies like a jacket or helmet.

ZIP-ON MEDIUM PACK

The HRT Medium Pack Zip-On Back panel was designed with the purpose of versatility. With the expandable design this Medium Pack can fit a S/M helmet, jacket or any other mission essential equipment. Secured attachment with YKK zippers and button loops, our Zip-On panels provide several options for carrying extra gear, ammunition, and equipment for your operational needs.

ZIP-ON MOLLE PANEL

The HRT Molle Zip-On Back panel was designed with the purpose of versatility. With the 11 rows of pals webbing and 4 columns you can attached your favorite molle gear. Secured attachment with YKK zippers and button loops, our Zip-On panels provide several options for carrying extra gear, ammunition, and equipment for your operational needs. Compatible with the RAC Plate Carrier.

ZIP-ON DUAL REMOVABLE GP POUCHES

The HRT Dual Removable General-Purpose Pouches Zip-On Half Back panel was designed with the purpose of versatility. The Dual Removable GP Pouches Zip-On half back panel can be configured with another HRT half back panel to meet your operational needs. This back panel has two independent small GP that are secured by Velcro and elastic, but easily accessible when needed.

ZIP-ON GENERAL PURPOSE POUCH

The HRT General Purpose Zip-On Half Back panel was designed with the purpose of versatility. The GP Zip-On half back panel can be configured with another HRT half back panel to meet your operational needs. This low-profile GP pouch has a large internal storage area with a front facing zipper for easy access. There is enough Velcro for your unit identification or patches.

ZIP-ON MAXIMUS POUCH

The HRT Maximus Pouch Zip-On Half Back panel was designed with the purpose of versatility. The Maximus Pouch Zip-On half back panel can be configured with another HRT half back panel to meet your operational needs. This back panel features a two pocket designs that allows users to organize supplies that can be easy access for team members. This back panel features two independent Pouches.

SINGLE PISTOL KYWI POUCH

Fits 9mm, 40cal, 45acp Double Stack Magazines.

Glock19 magazines are the shortest you want to use in these pouches.

(Will not work for Glock 26 or similar magazines they too short in height).

DOUBLE PISTOL KYWI POUCH

Fits 9mm, 40cal, 45acp Double Stack Magazines.

Glock19 magazines are the shortest you want to use in these pouches.

(Will not work for Glock 26 or similar magazines they too short in height).

TRIPLE PISTOL KYWI POUCH

Fits 9mm, 40cal, 45acp Double Stack Magazines.

Glock19 magazines are the shortest you want to use in these pouches.

(Will not work for Glock 26 or similar magazines they too short in height).

SINGLE 5.56 MIDLENGTH KYWI POUCH

This pouch is made for STANAG magazines. "AR15 style magazines".

There are 4 rows of webbing on the back of the pouch. You only use the Top 3 rows of webbing when mounting (not 4).

pouch is 4.3" tall by 3.25" wide

DOUBLE 5.56 MIDLENGTH KYWI POUCH

This pouch is made for STANAG magazines. "AR15 style magazines".

There are 4 rows of webbing on the back of the pouch. You only use the Top 3 rows of webbing when mounting (not 4).

pouch is 4.3" tall by 3.25" wide

TRIPLE 5.56 MIDLENGTH KYWI POUCH

This pouch is made for STANAG magazines. "AR15 style magazines".

There are 4 rows of webbing on the back of the pouch. You only use the Top 3 rows of webbing when mounting (not 4).

pouch is 4.3" tall by 3.25" wide

SIDE BY SIDE 1+2 5.56 SHORTY KYWI POUCH

The 5.56 1+2 side by side kywi is made for STANAG and Double Stack Pistol magazines.

Can be used for right handed or left handed shooters. All you have to do is take the kywi's out and turn pouch around and reinsert the kywi's. This pouch is made for AR-15 style magazines.

****AK magazines and single stack 1911 magazines will NOT work in this pouch****

SKITTLES BAG (DUMP POUCH)

Simple Dump Pouch - 4"x6"x8" unrolled. Everyone knows you just stuff gloves and a bottle of water in a dump pouch so no reason to go crazy with all sorts of whiz bang options on one! And Skittles! Made from Laser cut Brookwood Squadron Laminate and Glorious one-wrap Velcro. Attachment is via one-wrap velcro to secure to belts. MOLLE/PALS attachment need not apply. Rolls up and secures with a one-wrap Velcro strap but rolling dump pouches is dumb so just ignore this feature!

HANDCUFF KYWI POUCH

Our handcuff pouch was designed for a Federal Agency with a need for an open top cuff pouch with retention. It comes with two inserts, the end user needs to try both and see which works best with their cuffs.

The Handcuff Kywi was designed around Smith and Wesson M-301 (hinged) cuffs and Peerless 700C (chain) cuffs. It is compatible with similar other makes/models

SMALL GP

Small General Purpose pouch

2 pals channel rear. Can be belt mounted via one-wrap or other attachments or mounted to a standard pals grid.

3.5" wide x 5" tall x 2.5" deep, roughly

MEDIUM GP

Medium General Purpose pouch

4 pals channel rear. Can be belt mounted via one-wrap or other attachments or mounted to a standard pals grid.

6" wide x 5.75" tall x 3" deep, roughly

ADMIN GP MID POUCH

Comes with 4 short WTF straps.

The Admin GP Pouch is specifically designed to mount to the front a Triple Tall/Mid KYWI Pouch or Triple Tall/Mid Daeodon Front Panel.

The midlength version matches the height of a triple midlength KYWI Pouch or front panel.

DST MEDICAL POUCH - GEN 2

Designed with ERT/SWAT members in mind, the DS Tactical Blow Out Pouch can be worn on a duty belt (up to 2-1/4") as well as PALS webbing compatible. The tear away pouch holds a CAT Tourniquet on the outside, just under the flap for quick access and accommodates up to a 6" Israeli bandage inside the pouch as well as other items in the internal mesh pocket. Pouch Sizing: 3.75" wide x 7" tall x 3.5" thick Pouch is made with non locking zipper so you can open the pouch up easy when you need it.

BELT MOUNTED ELASTIC TOURNIQUET/TQ HOLDER

Elastic TQ holder for belts.

Will interface with outer belts that have hook velcro on the inside.

AMMO LOG

Simple zippered log for ammo or "stuff"

Small 7" long x 7" wide x 3.5" deep (roughly)

Ask your mom to carry it for you if to heavy. I did

ZIP-ON QUAD FLASHBANG POUCH

The HRT Horizontal Quad Flashbang Pouch Zip-On Half Back panel was designed with the purpose of versatility. The Horizontal Quad Flashbang Pouch Zip-On half back panel can be configured with another HRT half back panel to meet your operational needs. This back panel features four independent pockets secured by a two-stage snap and cord retention, but easily accessible when needed.

ARC HANDCUFF POUCH

The HRT ARC Handcuff Pouch was purpose-built to provide rapid access and secure retention for your duty cuffs—without compromising on profile or performance. Designed to meet the real-world demands of law enforcement and tactical professionals, this pouch combines rugged construction with a sleek, low-visibility design.

FLASHBANG POUCH

Introducing the HRT Flashbang Pouch, a compact and versatile solution for securely carrying flashbangs, smoke grenades, and similar-sized ordnance. Its adjustable ride height allows for a customizable grip, ensuring rapid deployment when every second counts. The storable top hood offers flexibility, letting you choose between added retention or one-hand, open-top access for lightning-fast retrieval.

MICRO FLASHBANG POUCH

Introducing the HRT Micro Flashbang Pouch, a compact and versatile solution for securely carrying flashbangs, smoke grenades, and similar-sized ordnance. Its adjustable ride height allows for a customizable grip, ensuring rapid deployment when every second counts. The storable top hood offers flexibility, letting you choose between added retention or one-hand, open-top access for lightning-fast retrieval.

ARC DUMP POUCH

The HRT ARC Dump Pouch was designed to maintain a low profile when not in use but hold multiple full-size magazines, water bottles, evidence storage, and whatever you may need on the range or mission. The unique fold up design enables it to be stowed cleanly and match your existing ARC pouches. The bag can be instantly opened with a solid tug of one hand on the pull tab.

SPORRAN HANGER POUCH

The HRT Sporrán Hanger Pouch was designed as a universal utility pouch add-on to your plate carrier. It is a lightweight, durable and flexible organizer to ensure you always have what you need for the job. The location allows you to have your mission essential gear in a convenient location freeing up your sides and reducing your silhouette.

DANGLER

Is a quality pouch designed to wear under a chest rig or plate carrier. The dimensions of the Dangler are 8" wide by 5" tall. It has 4" tall by 6" wide velcro sewn into the top of the pouch which allows you to attach it directly to the surface or host of choice (Chestie or PC).

HANDCUFF INSERT

Handcuff insert designed to be used with most all popular micro chassis platforms. With pull-tab and secure bungee retention, the cuff insert provides an alternate means of quick handcuff storage and access.

RADIO INSERT

The Radio Insert is a simple, yet effective way to retain comms on your chassis system. Made of stretch elastic to accommodate various sized radios up to 3.5" wide.

TASER INSERT

Designed to secure taser in compatible chest rigs.

Packs & Jackets

BPG DAILY BACKPACK

The Burn Proof Gear Daily Backpack, or "The Daily," combines tactical durability with sleek simplicity, making it perfect for work, the gym, or as a reliable gear bag. Built to last with high-quality materials, it offers ample storage in a compact design.

BPG RAIDER BACKPACK

The Raider Backpack is made by Burn Proof Gear in Miami, FL. Made in the USA products are known to be quality. BPG takes pride in manufacturing in house, in the USA, and being Berry Compliant (100% made in USA with 100% USA components). This pack is designed with Night Vision operators in mind from all walks of life. A unique backpack that will solve many issues SWAT, SOF, and Civilians alike run into every time they go to the range or conduct an operation.

BPG SBR BACKPACK

designed to withstand the test of time. This backpack is built to last, no matter the conditions you face. With a spacious main compartment and 3 expandable mesh zipper pockets, you will have plenty of storage space for all your essentials. The well-organized interior ensures easy access and keeps your belongings secure and neatly arranged.

HD (HEAVY DUTY) RAID PACK 2.0

The Raid (HD) is ready for "no-pro" or "high-profile" missions, whether in a tactical scenario, traversing the backcountry, or navigating between cities; this is the pack that gets it done. Designed to carry combat weight while maintaining a sleek profile, the Raid features a robust and stowable 50mm waist strap to transfer weight to your hips, as well as load lifter straps and a height-adjustable yoke-style harness to give maximum user adjustability for a custom fit.

RAID PACK 2.0

The Raid Pack is ready for "no-pro" or "high-profile" missions, whether in a tactical scenario, traversing the backcountry, or navigating between cities; this is the pack that gets it done. Designed to carry a full mission load while maintaining a slim body profile. It features a height-adjustable yoke harness with form-fitting padded shoulder straps as well as a stowable 50mm waist strap and load lifter straps to transfer weight to your hips.

ALPINE HOODIE

The Alpine Hoodie is a top-tier synthetic insulated garment designed for excellent breathability. It performs exceptionally well both as an independent jacket and as a versatile layering component across diverse environments.

ALPHA SHELL

The Alpha Shell jacket uses Toray® Advanced Technology fabric, combining waterproof, breathable, and stretchy features to keep you dry and comfortable. Its quiet, soft fabric is ideal for tactical and field use. The Alpha Shell jacket has fully sealed seams and a durable Dermizax® membrane to keep out rain and wind while letting moisture escape. It features abrasion-resistant fabric, adjustable cuffs, a hood, and multiple pockets for a secure fit and convenient storage.

HRT WINDBREAKER JACKET

The HRT Windbreaker jacket was developed to keep you comfortable in light weather. HRT saw this need for a lightweight, easily stored rain and wind jacket that works with or without body armor and came up with a solution. The jacket offers light rain resistance and full wind coverage for your everyday use or operational needs.

Cobmat Belts

ARC BELT 2.0

The HRT ARC Belt 2.0 is the next evolution of our battle-proven first-line belt system—engineered for end-users who demand a lightweight, low-profile, and ultra-rigid platform without compromising comfort or modularity.

ARC BELT

The HRT ARC Belt is an innovative, rigid, lightweight, low-profile first line belt system. Its laser cut woven polymer Tegriss core offers an unparalleled strength to weight ratio and is contoured which conforms to the body for maximum comfort. The laser cut sleeve system enables the user to achieve the perfect fit with the largest size adjustment range in the industry.

ENHANCED SHOOTER'S BELT 1.75"

Our Enhanced Shooter's Belt is a Inner/Outer Belt combo that is different from all other's. Featuring a non adjustable 1.75" COBRA® Buckle, the Shooter's Belt is a two piece belt design utilizing 1.75" Inner & Outer belts. While the buckle is non adjustable, our belts are unique in that each side of the belt adjusts. It has an adjustment range of 5.5". Made for hard use to last a lifetime. The Enhanced shooters belts is made from Brookwood's Squadron® Laminate cordura with 12Layer Tegriss® plastic liner and one-wrap® velcro that are 100% laser cut for a strong and accurate belt. Depending on color the Enhanced belt has a massive weight savings over the original, Multicam alone is 26% lighter.

ENHANCED SHOOTER'S BELT 2"

Our Enhanced Shooter's Belt is a Inner/Outer Belt combo that is different from all other's. Featuring a non adjustable 2" COBRA® Buckle, the Shooter's Belt is a two piece belt design utilizing 1.75" Inner & 2" Outer belts. While the buckle is non adjustable, our belts are unique in that each side of the belt adjusts. It has an adjustment range of 5.5". Made for hard use to last a lifetime. The Enhanced shooters belts is made from Brookwood's Squadron® Laminated cordura with 12Layer Tegriss® plastic liner and one-wrap® velcro that are 100% laser cut for a strong and accurate belt. Depending on color the Enhanced belt has a massive weight savings over the original, Multicam alone is 26% lighter

SHOOTER'S BELT 1.75"

Our Shooter's Belt is a Inner/Outer Belt combo that is different from all other's. Featuring a non adjustable 1.75" COBRA® Buckle, the Shooter's Belt is a two piece belt design utilizing 1.75" Inner & Outer belts. While the buckle is non adjustable, our belts are unique in that each side of the belt adjusts. It has an adjustment range of 5.5". Made for hard use to last a lifetime.

INNER VELCRO BELT 1.75"

1.75" Inner Velcro Belt with Loop "fuzzy" Velcro on the outside of it.

ARC INNER BELT

The ARC Inner Belt is a low profile contoured belt intended for everyday use. The ARC Inner Belt can be used in conjunction with the ARC belt to provide a quick and secure attachment for your gun belt or can be used stand-alone to hold up your pants. The design allows for quick adjustment or a “set and forget” attachment with the G-Hook connection.

BPG INNER BELT

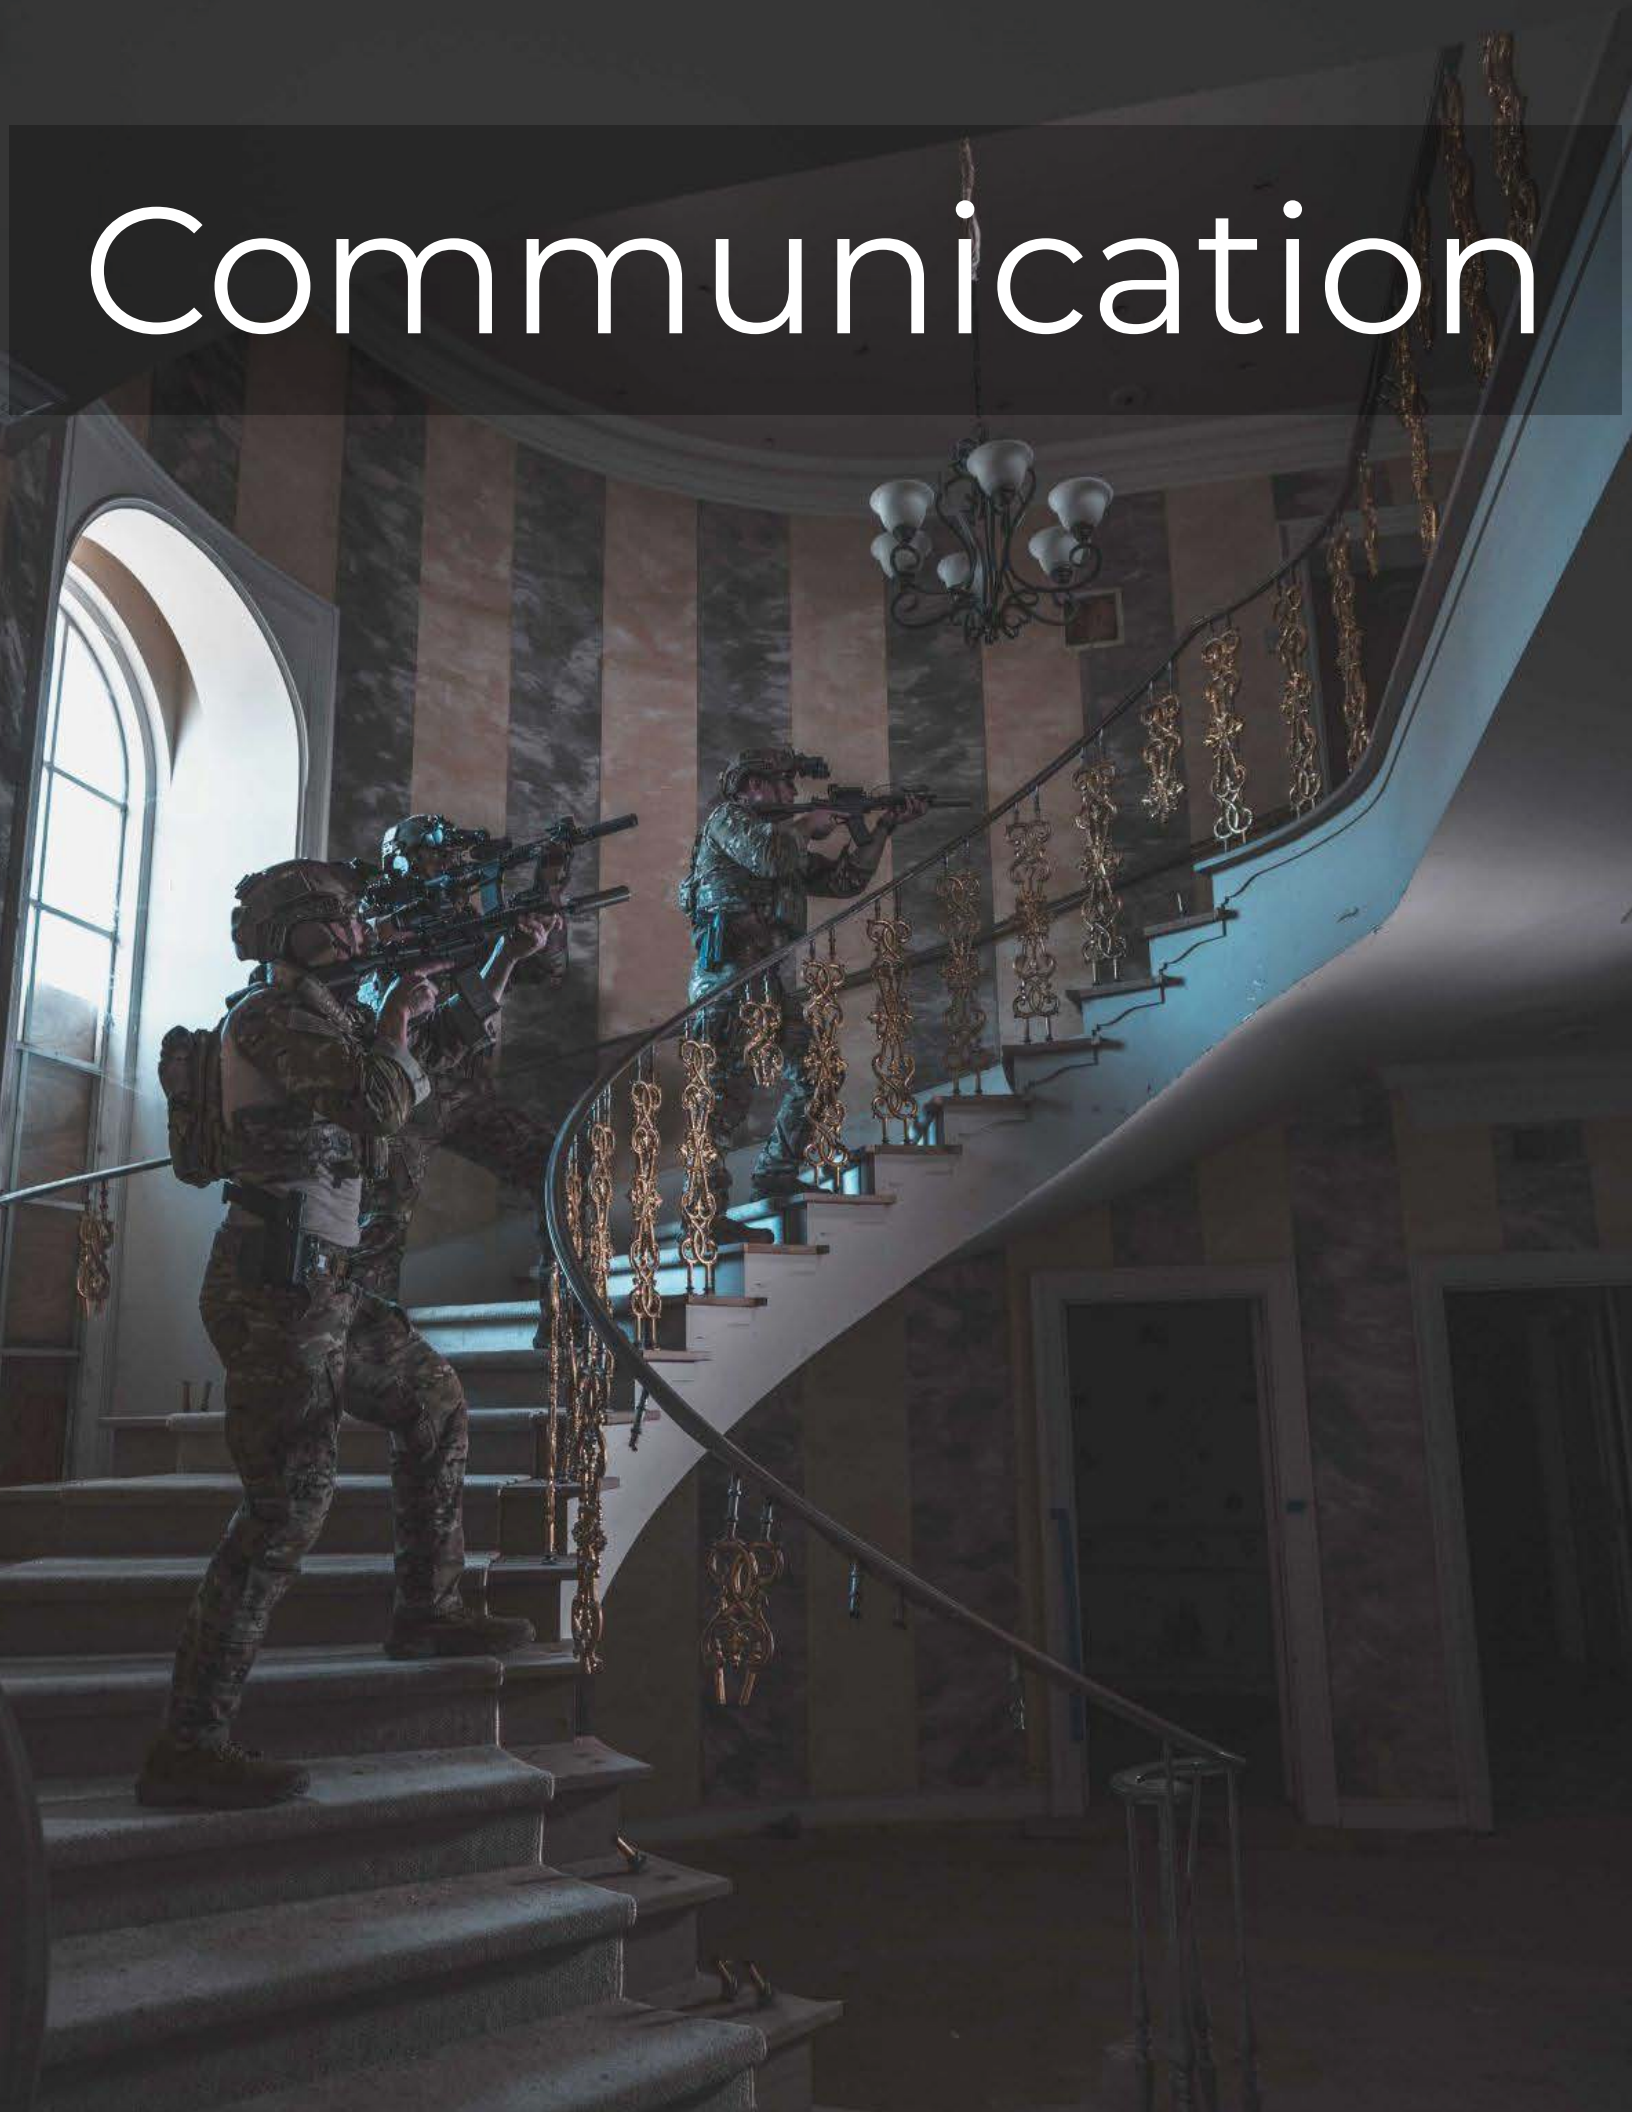

Perfect for Everyday Carry

ARC TEGRIS INNER BELT

The HRT ARC TEGRIS Inner Belt is a low-profile contoured belt intended for everyday use. The ARC Inner Belt can be used in conjunction with the ARC belt to provide a quick and secure attachment for your gun belt or can be used stand-alone to hold up your pants. The design allows for ultra-light weight, but yet rigid assisting in the uniform distribution of load across the user's waist.

Communication

OPS-CORE AMP HEADSET CONNECTORIZED

For leading-edge tactical ear protection and unprecedented audio quality, choose the Ops-Core AMP® Communication Headset. This advanced tactical communications headset integrates seamlessly with Ops-Core helmets and accessories to create a lightweight protective headborne system for any mission and environment.

OPS-CORE AMP HEADSET FIXED DOWNLEAD

The Ops-Core AMP® Communication Headset is an advanced communication headset that integrates seamlessly with Ops-Core helmets to create the ideal lightweight headborne system for any mission and environment.

OPS-CORE AMP® LITE (DE-FEATURED) HEADSET

For leading-edge ear protection and unprecedented audio quality, choose the Ops-Core AMP® de-featured Headset. This advanced headset integrates seamlessly with Ops-Core accessories to create a lightweight protective head borne system for any environment.

SILYNX PT20 U94 PTT

The SilynX U94 is a modernization version of the traditional U94, with two PTT buttons for ambidextrous operation. This is a rugged, light-weight single-com push-to-talk (PTT). The SilynX U94 can be configured for use with a variety of tactical radios with standard NEXUS connectivity, and the SilynX U94 is compatible with a wide range of tactical headsets. The heavy duty mounting clip can be configured for either left or right hand use. The SilynX U94 is a versatile, durable, and reliable PTT system.

3M PELTOR SMALL PTT ADAPTER - MOTOROLA APX/XPR

Small, durable and lightweight, this Push-To-Talk (PTT) adapter will connect 3M PELTOR COMTAC/SWATTAC headsets to select Motorola radios and provide reliable receive/transmit functionality. When the real estate on your tactical vest is valuable, rely on the quality 3M PELTOR FL4000 Series PTT. Connects with Motorola APX/XPR.

3M PELTOR PUSH-TO-TALK (PTT) MOTOROLA

The 3M PELTOR Brand is a respected global leader in hearing protection and communication solutions. With production facilities in several countries including the US, 3M PELTOR supplies both traditional over the ear and innovative in-ear solutions to industry worldwide as well as elite tactical military teams and law enforcement. The PELTOR brand is built tough for the working professional.

OPS-CORE AMP HELMET RAIL MOUNT KIT

For those end users that prefer a helmet mounted headset, the AMP Headset Rail Mount Kit provides unrivaled performance. Designed specifically for use with Ops-Core ARC rails by the same company that pioneered them and revolutionized the helmet industry.

OPS-CORE AMP HEADSET CABLES

Ops-Core AMP Headset Cables connect AMP Communication Headsets to various push-to-talk, intercom, and radio options. Multiple cable options are available for the AMP Communication Headset.

OPS-CORE U94 PTT (PUSH-TO-TALK) CABLE

standard PTT cables, used to connect the AMP Communication Headset to radios/intercom systems, feature a permanently attached radio connector. The AMP Communication Headset can be connected to communications systems via a fixed download or connectorized cable. With two options, end users can choose the option best suited to their mission needs. Used to connect the AMP Communication Headset to various radios.

Eye Protection

CROSSBLADE STD ONE LASER LPL-3B

The LPL-3B Lens technology is designed to block visible green, blue violet and non-visible InfraRed lasers from damaging the wearer's eyes. ESS LPL-3B lenses provide ballistic protection along with 4.0 Optical Density (OD) that blocks greater than or equal to 1064nm, 800-1090nm wavelengths, a 4.5 OD at 532nm wavelengths, a 3.0 OD at 445nm wavelengths, and a 5.0 at 405nm wavelengths from these lasers. At a VLT of 22% photopic (daytime) and 8.4% Scotopic (nighttime) this allows for optimum protection and operation versatility in both bright and low light conditions.

CROSSBLADE STD ONE SMOKE GRAY

The premium ESS CrossBlade™ offers our highest level of lens technology and frame design and function. The Tri-Tech Fit™ frame slides comfortably under hats and helmets while also offering enough arm tension to be worn alone. Advanced ClearZone™ Dual Flow Coated lenses are engineered to reduce fog inside and prevent scratches outside. Distortion-free ESSOPTICS™ keep your vision razor sharp and the DedBolt™ Lens Lock pivot allows for rapid lens exchanges.

CROSSBLADE STD ONE LASER LPL-5

ESS Laser Protective LPL-5 lenses protect against visible green lasers at 532 nm, with 2.5 OD, 48% VLT. ESS LPL-5 lenses are designed to protect against severe eye damage from green lasers, while allowing the user to see the origin of the laser and engage when necessary.

CROSSBOW ONE POLARIZED

The premium ESS CrossBlade™ offers our highest level of lens technology and frame design and function. The Tri-Tech Fit™ frame slides comfortably under hats and helmets while also offering enough arm tension to be worn alone. Advanced ClearZone™ Dual Flow Coated lenses are engineered to reduce fog inside and prevent scratches outside. Distortion-free ESSOPTICS™ keep your vision razor sharp and the DedBolt™ Lens Lock pivot allows for rapid lens exchanges.

CROSSBLADE STD ONE CLEAR

The premium ESS CrossBlade™ offers our highest level of lens technology and frame design and function. The Tri-Tech Fit™ frame slides comfortably under hats and helmets while also offering enough arm tension to be worn alone. Advanced ClearZone™ Dual Flow Coated lenses are engineered to reduce fog inside and prevent scratches outside. Distortion-free ESSOPTICS™ keep your vision razor sharp and the DedBolt™ Lens Lock pivot allows for rapid lens exchanges.

CROSSBOW ONE CLEAR

ESS Laser Protective LPL-5 lenses protect against visible green lasers at 532 nm, with 2.5 OD, 48% VLT. ESS LPL-5 lenses are designed to protect against severe eye damage from green lasers, while allowing the user to see the origin of the laser and engage when necessary.

CROSSBOW ONE SMOKE GRAY

The ESS Crossbow® has redefined performance and utility for eye protection. It's ClearZone™ FlowCoat technology minimizes scratches and provides unmatched anti-fog capability. Crossbow's Tri-Tech Fit™ ergonomics offer universal comfort and stability. Strikingly clear ESSOPTICS™ exceed rigorous standards, offering a true distortion-free view of your objective. The Crossbow's patented DedBolt™ Lens Lock pivots open for quick lens exchange or locks shut for rock-solid retention under impact.

CROSSBOW ONE PHOTOCHROMIC

ESS Photochromic Lenses Adapt Rapidly to Changing Light Conditions The ESS Crossbow Photochromic eyeshield is created using Transitions® lenses and has redefined performance and utility for eye protection. Its ClearZone™ FlowCoat technology minimizes scratches. The Tri-Tech™ Fit ergonomics offer universal comfort and stability with zero pressure points. Clear ESSOPTICS™ exceed rigorous standards, offering a true view of your objective. And the Crossbows patented DedBolt™ Lens Lock pivots open for quick lens exchange or locks shut for rock-solid retention under impact.

CROSSBOW SUPPRESSOR 2X+ LPL-B

Laser Protective LPL-B lenses protect against non-visible lasers at 820-1090 nm, with 4.0+ OD. The ESS Crossbow Suppressor™ is the first eyeshield designed to use with ear cup hearing protection and communications devices. Featuring Z-Bend™ Geometry, the frame's ultra-thin temple arms allow a tight seal to keep noise out while eliminating hot spots and pressure points that commonly occur when normal eyewear is worn under ear cups.

CROSSBOW RESPONSE WITH GASKET

The ESS Crossbow® has redefined performance and utility for eye protection. It's ClearZone™ FlowCoat technology minimizes scratches and provides unmatched anti-fog capability. Crossbow's Tri-Tech Fit™ ergonomics offer universal comfort and stability. Strikingly clear ESSOPTICS™ exceed rigorous standards, offering a true distortion-free view of your objective. The Crossbow's patented DedBolt™ Lens Lock pivots open for quick lens exchange or locks shut for rock-solid retention under impact.

PROFILE NVG LASER LPL-3B

The LPL-3B Lens technology is designed to block visible green, blue violet and non-visible InfraRed lasers from damaging the wearer's eyes. ESS LPL-3B lenses provide ballistic protection along with 4.0 Optical Density (OD) that blocks greater than or equal to 1064nm, 800-1090nm wavelengths, a 4.5 OD at 532nm wavelengths, a 3.0 OD at 445nm wavelengths, and a 5.0 at 405nm wavelengths from these lasers. At a VLT of 22% photopic (daytime) and 8.4% Scotopic (nighttime) this allows for optimum protection and operation versatility in both bright and low light conditions.

PROFILE TURBOFAN

A longtime favorite of U.S. Special Forces groups, the ESS Profile TurboFan is better and tougher than ever. Following a series of vast improvements, the Profile TurboFan represents one of the most effective night-vision-compatible weapon against lens fogging.

INFLUX

Trusted and issued by the U.S. Army, the premium ESS Influx™ goggle allows users to maintain full situational awareness in dynamic environments. The patented AVS™ (Adjustable Ventilation System) and the Influx RotoClip™ silently pivots the lens inside the goggle frame: choose either a dust-free, fully-sealed mode or a fog-free, open-ventilation mode.

INFLUX LASER LPL-3B

The LPL-3B Lens technology is designed to block visible green, blue violet and non-visible InfraRed lasers from damaging the wearer's eyes. ESS LPL-3B lenses provide ballistic protection along with 4.0 Optical Density (OD) that blocks greater than or equal to 1064nm, 800-1090nm wavelengths, a 4.5 OD at 532nm wavelengths, a 3.0 OD at 445nm wavelengths, and a 5.0 at 405nm wavelengths from these lasers. At a VLT of 22% photopic (daytime) and 8.4% Scotopic (nighttime) this allows for optimum protection and operation versatility in both bright and low light conditions.

INFLUX TERRAIN LASER LPL-B UNIT ISSUE

Laser Protective LPL-B lenses protect against non-visible lasers at 820-1090 nm, with 4.0+ OD.

INFLUX LASER LPL-5

ESS Laser Protective LPL-5 lenses protect against visible green lasers at 532 nm, with 2.5 OD, 48% VLT. ESS LPL-5 lenses are designed to protect against severe eye damage from green lasers, while allowing the user to see the origin of the laser.

FLIGHT PRO

The ESS Flight Pro™ is a low-profile goggle approved for use on U.S. Navy flight decks. Based on the ESS Profile NVG™ goggle, it has all the advantages of a low-profile, night-vision-compatible frame.

LAND OPS TERRAIN

One of the only goggles authorized by the U.S. Army for use over prescription eyewear, the ESS Land Ops is a high-performance goggle system for highly-active ground troops.

Helmets

OPS-CORE FAST SF NEXT GEN HIGH CUT HELMET

The New FAST SF is Ops-Core's lightest weight ballistic helmet system yet. This weight reduction is enabled by the introduction of three new subsystems: the next-generation FAST SF ballistic shell, the LockDown™ Liner, and the Head-Loc® Flex chinstrap.

OPS-CORE FAST SF SUPER HIGH CUT HELMET

The Ops-Core FAST® SF Super High Cut Helmet is a tactical ballistic helmet made for high performance in the toughest combat environments. With a super high cut shell made of a lightweight composite of cutting-edge Carbon, Unidirectional Polyethylene, and woven Aramid, the FAST SF is designed for ultimate protection.

OPS-CORE FAST XP LEGACY HIGH CUT HELMET

High cut shell made of a hybrid composite of Carbon, Uni-directional Polyethylene, and Woven Aramid. Raised ear cut allows for integration with communications headsets. Features an Ops-Core® 3-Point Skeleton™ Shroud for universal capability with most NVG mounts, Accessory Rail Connectors (ARCs) with hook bungees, and external VELCRO® brand loop. Scalable design allows for compatibility with Ops-Core visors, mandibles, handgun face shields, and ballistic appliques. Available with four suspension/retention options.

OPS-CORE FAST RFI HIGH CUT HELMET

The FAST RFI is the lightest helmet system on the market to offer protection against 7.62x39mm mild steel core rifle rounds. With a shell weight of only 2.59 lbs. (size L), the RFI allows for sustained wear in high-threat environments without compromising comfort.

OPS-CORE FAST XR HIGH CUT HELMET

The Ops-Core® FAST XR helmet is part of the FAST ballistic protection helmet family. Its innovative, lightweight design resists penetration of up to a 7.62x39mm lead core round and protects against Level IIIA / HG2 handgun projectiles and frag, at a weight of 2.81lbs (Large).

The FAST XR integrates into Ops-Core's total headborne system solutions which include situational awareness, optics, and respiratory protection.

TEAM WENDY EXFIL BALLISTIC HELMET

The EXFIL® Ballistic helmet with the 3.0 Rail features a hybrid composite shell for increased strength with a unique geometry for optimal fit. An innovative, boltless CAM FIT™ retention quickly adjusts to individual head shapes, providing a comfortable and stable fit. A Zorbium® foam liner protects against impact and allows for an overhead communications headband. Customizable fit is achieved through a set of moveable comfort pads. A lanyard compatible Wilcox® shroud secures any standard NVG mount.

OPS-CORE FAST XP HIGH CUT HELMET

The Ops-Core FAST XP High Cut Helmet provides pistol round protection for higher velocity 9mm rounds. With a slightly thicker shell than the SF, the XP offers a gain in protection: 205 ft/s increase in muzzle velocity for a 124g 9mm round in exchange for an increase of 0.28 lbs. in shell weight.

TEAM WENDY EXFIL BALLISTIC SL HELMET

The Team Wendy EXFIL® Ballistic SL features a new lightweight composite shell providing a 15% weight reduction over the original EXFIL Ballistic while offering the same unique EXFIL shell geometry for an optimal fit.

TEAM WENDY RIFLETECH BALLISTIC HELMET

The RIFLETECH helmet combines high performance cutting-edge materials, breakthrough no through hole design, and a new comfort liner system. This helmet delivers the perfect mix of level III rifle protection and comfort, allowing the wearers to focus on their mission.

TEAM WENDY EPIC PROTECTOR HIGH CUT

The EPIC™ Protector ballistic helmet, designed with mobile field force police officers in mind, is substantially lighter than the ACH. It provides premium comfort and comes configured with Team Wendy's CAM-FIT™ BOA Dial retention, EPIC Air® Fit liner system, new reverse dovetail accessory rails and front cover plate to ensure riot shield alignment.

TEAM WENDY EPIC SPECIALIST HIGH CUT BALLISTIC HELMET

The EPIC™ Specialist ballistic helmet features exceptional performance to meet the tactical operator's demands. Fully outfitted for SWAT or riot team members, it comes standard with a durable aluminum NVG shroud, new reverse dovetail rails, exterior VELCRO® loop patches, EPIC Air® Fit liner and CAM FIT™ retention.

GALVION VIPER A5 HELMET

Designed to meet the demands of tough tactical operations; manufactured to meet stringent quality standards. The Batlskin Viper® A5 is a battle-proven solution that provides blunt force and ballistic protection in a mission-modular ACH shape.

DFNDR ULTRA-LIGHT ADVANCED COMBAT HELMET

The DFNDR Armor® Ultra-Light Advanced Combat Helmet solution is the lightest version of the U.S. Army Advanced Combat Helmet (ACH / LWACH) on the market. Designed to minimize weight burden, this design has effectively reduced the weight of the traditional ACH helmet by more than 30% and that of LW-ACH helmets by more than 15%. All while exceeding the ballistic protection of the Lightweight ACH category as a whole.

DFNDR LAW ENFORCEMENT BALLISTIC HELMET

The DFNDR Armor® Law Enforcement (LE) helmet is designed to meet or exceed modern day Law Enforcement needs. With the most demanding users in mind, this Ultra-Lightweight Ballistic Helmet is an innovative, highly dependable and extremely comfortable solution for SWAT teams, National Guard and Patrol units. Featuring a high performance, lightweight PE based shell the E-III/ALE-H defeats a wide range of common handgun bullets and blunt force impact, making it the ideal helmet for operators serving in high threat scenarios.

DFNDR LEVEL IIIA BALLISTIC HELMET

The DFNDR Armor® Level IIIA Ballistic Helmet is one of the most affordable ACH/MICH Shape helmet on the market today. Offering proven fragmentation protection capabilities matched by our dedication to trim unwanted weight, the E-III/A200-H is adaptable for use with many accessories, including rails and shrouds and is relied on today by the U.S. Military and other military organizations worldwide.

OPS-CORE FAST HIGH CUT BUMP HELMET

The Ops-Core FAST® Bump high-cut shell is designed for less extreme environments where ballistic threats are not a priority, and the focus is on protection from blunt trauma forces, or where the primary need is for integration of mission-configured components.

OPS-CORE FAST SF CARBON COMPOSITE SUPER HIGH CUT HELMET

For low threat environments, the Ops-Core FAST® SF Carbon Composite helmet is the ideal choice for reliable protection and comfort. This durable non-ballistic helmet platform is designed with a super high cut, bump shell made from a hybrid of Unidirectional composite of the most advanced carbon and fiberglass materials. Featuring a shell geometry that delivers critical coverage, this FAST tactical helmet provides enhanced impact protection from blunt trauma, making it optimal for rugged training, recce, airborne and water operations, and fast roping.

TEAM WENDY EXFIL LTP BUMP HELMET RAIL 3.0

The EXFIL® LTP (Lightweight, Tactical, Polymer) bump helmet with the 3.0 Rail provides impact protection for maritime environments and a stable, comfortable platform for mounting night vision and other accessories. The built-in NVG shroud* utilizes an integrated machined aluminum shroud insert. The helmet features a Zorbium® foam liner along with a CAM FIT™ Retention System with easily adjustable Cam Lock sliders and a micro-adjustable BOA® Fit System.

TEAM WENDY EXFIL CARBON BUMP HELMET RAIL 3.0

The EXFIL® Carbon Helmet with 3.0 Rail is made of high-strength, lightweight carbon fiber and features a Wilcox® W shroud* for mounting night vision devices. The Zorbium® foam liner provides the ultimate levels of comfort and impact protection and is compatible with tactical communication headsets. The CAM FIT™ Retention System with an integrated BOA® Fit System and Cam Lock sliders ensures a secure fit.

CORE SURVIVAL HEL-STAR STROBE FOR OPS-CORE RAILINK

The Core Survival® HEL-STAR Rail Strobe® is a helmet-rail mounted visible (white) and IR synchronized strobe marker designed to install on both sides of the helmet—leaving the top of the helmet clear for reduced snag hazards and increased mobility. Created to integrate specifically into the Ops-Core RAILINK system, the HEL-STAR rail strobe draws power from the RAILINK'S centralized Battery Pack+, allowing a compact, lightweight design that delivers all the performance you would expect from a Core Survival product.

OPS-CORE RAILINK POWER AND DATA ARC RAILS

RAILINK is the first of its kind power and data solution that forms the backbone of a rapidly developing, scalable ecosystem that powers and connects your headborne system. Users can seamlessly integrate compatible accessories without the need for additional batteries and cable management. Designed and tested with extensive US Military user input, RAILINK is the platform of the future adding capability to the headborne system with new accessories.

OPS-CORE RAILINK BATTERY PACK+

The Ops-Core RAILINK Battery Pack+ is the centralized single point of power for the RAILINK system. The Battery Pack+ unit enables the transfer of data and power across the system and includes a coulomb counter that delivers charge state information back to your VAS system and an accelerometer that enables the powering down of your NVG system when you are not using it.

PRINCETON TEC SWITCH MPLS FOR OPS-CORE RAILINK

The RAILINK Switch MPLS is a low light/IR directional lighting solution that works with the RAILINK power and data ARC rail system. Weighing in at only 13 grams with an easy-to-operate, glove-friendly switch, it gives the end user a fail-safe lighting solution for all their low light and IR lighting needs.

OPS-CORE RIOT/BREACHING VISOR

The Ops-Core Riot/Breaching Visor offers modular, rapidly-employed face protection for operators with Ops-Core ARC Rail-equipped helmets. The 3mm thick visor smoothly pivots up and down to provide full face protection as needed. The visor effectively keeps end users safe in riot and breaching operations.

WILCOX L4 THREE HOLE SHROUD

The Wilcox L4 Three Hole Shroud mounts to ballistic/non-ballistic helmets drilled with three-hole pattern. Rock solid mounting with unmatched tolerances eliminating wobble.

WILCOX NVG LANYARD FOR L4 THREE HOLE SHROUD

Custom integrated base that securely attaches to a variety of Wilcox NVG Combat Helmet Mounts.

OPS-CORE COUNTERWEIGHT KIT

The Ops-Core Counterweight Kit is a customizable weight management system designed to enhance comfort and reduce neck strain.

TEAM WENDY EXFIL COUNTERWEIGHT KIT

Team Wendy EXFIL® Counterweight Kit adds weight to the rear of the helmet to compensate for night vision and other front-mounted devices, improving stability and reducing neck fatigue. Attaches with hook/loop and is additionally secured to side rails with included webbing (EXFIL Ballistic / EXFIL Ballistic SL) or shock cord (Team Wendy SAR). Includes fully-coated lead weights.

WILCOX L4 LIGHTWEIGHT THREE HOLE SHROUD (WLS)

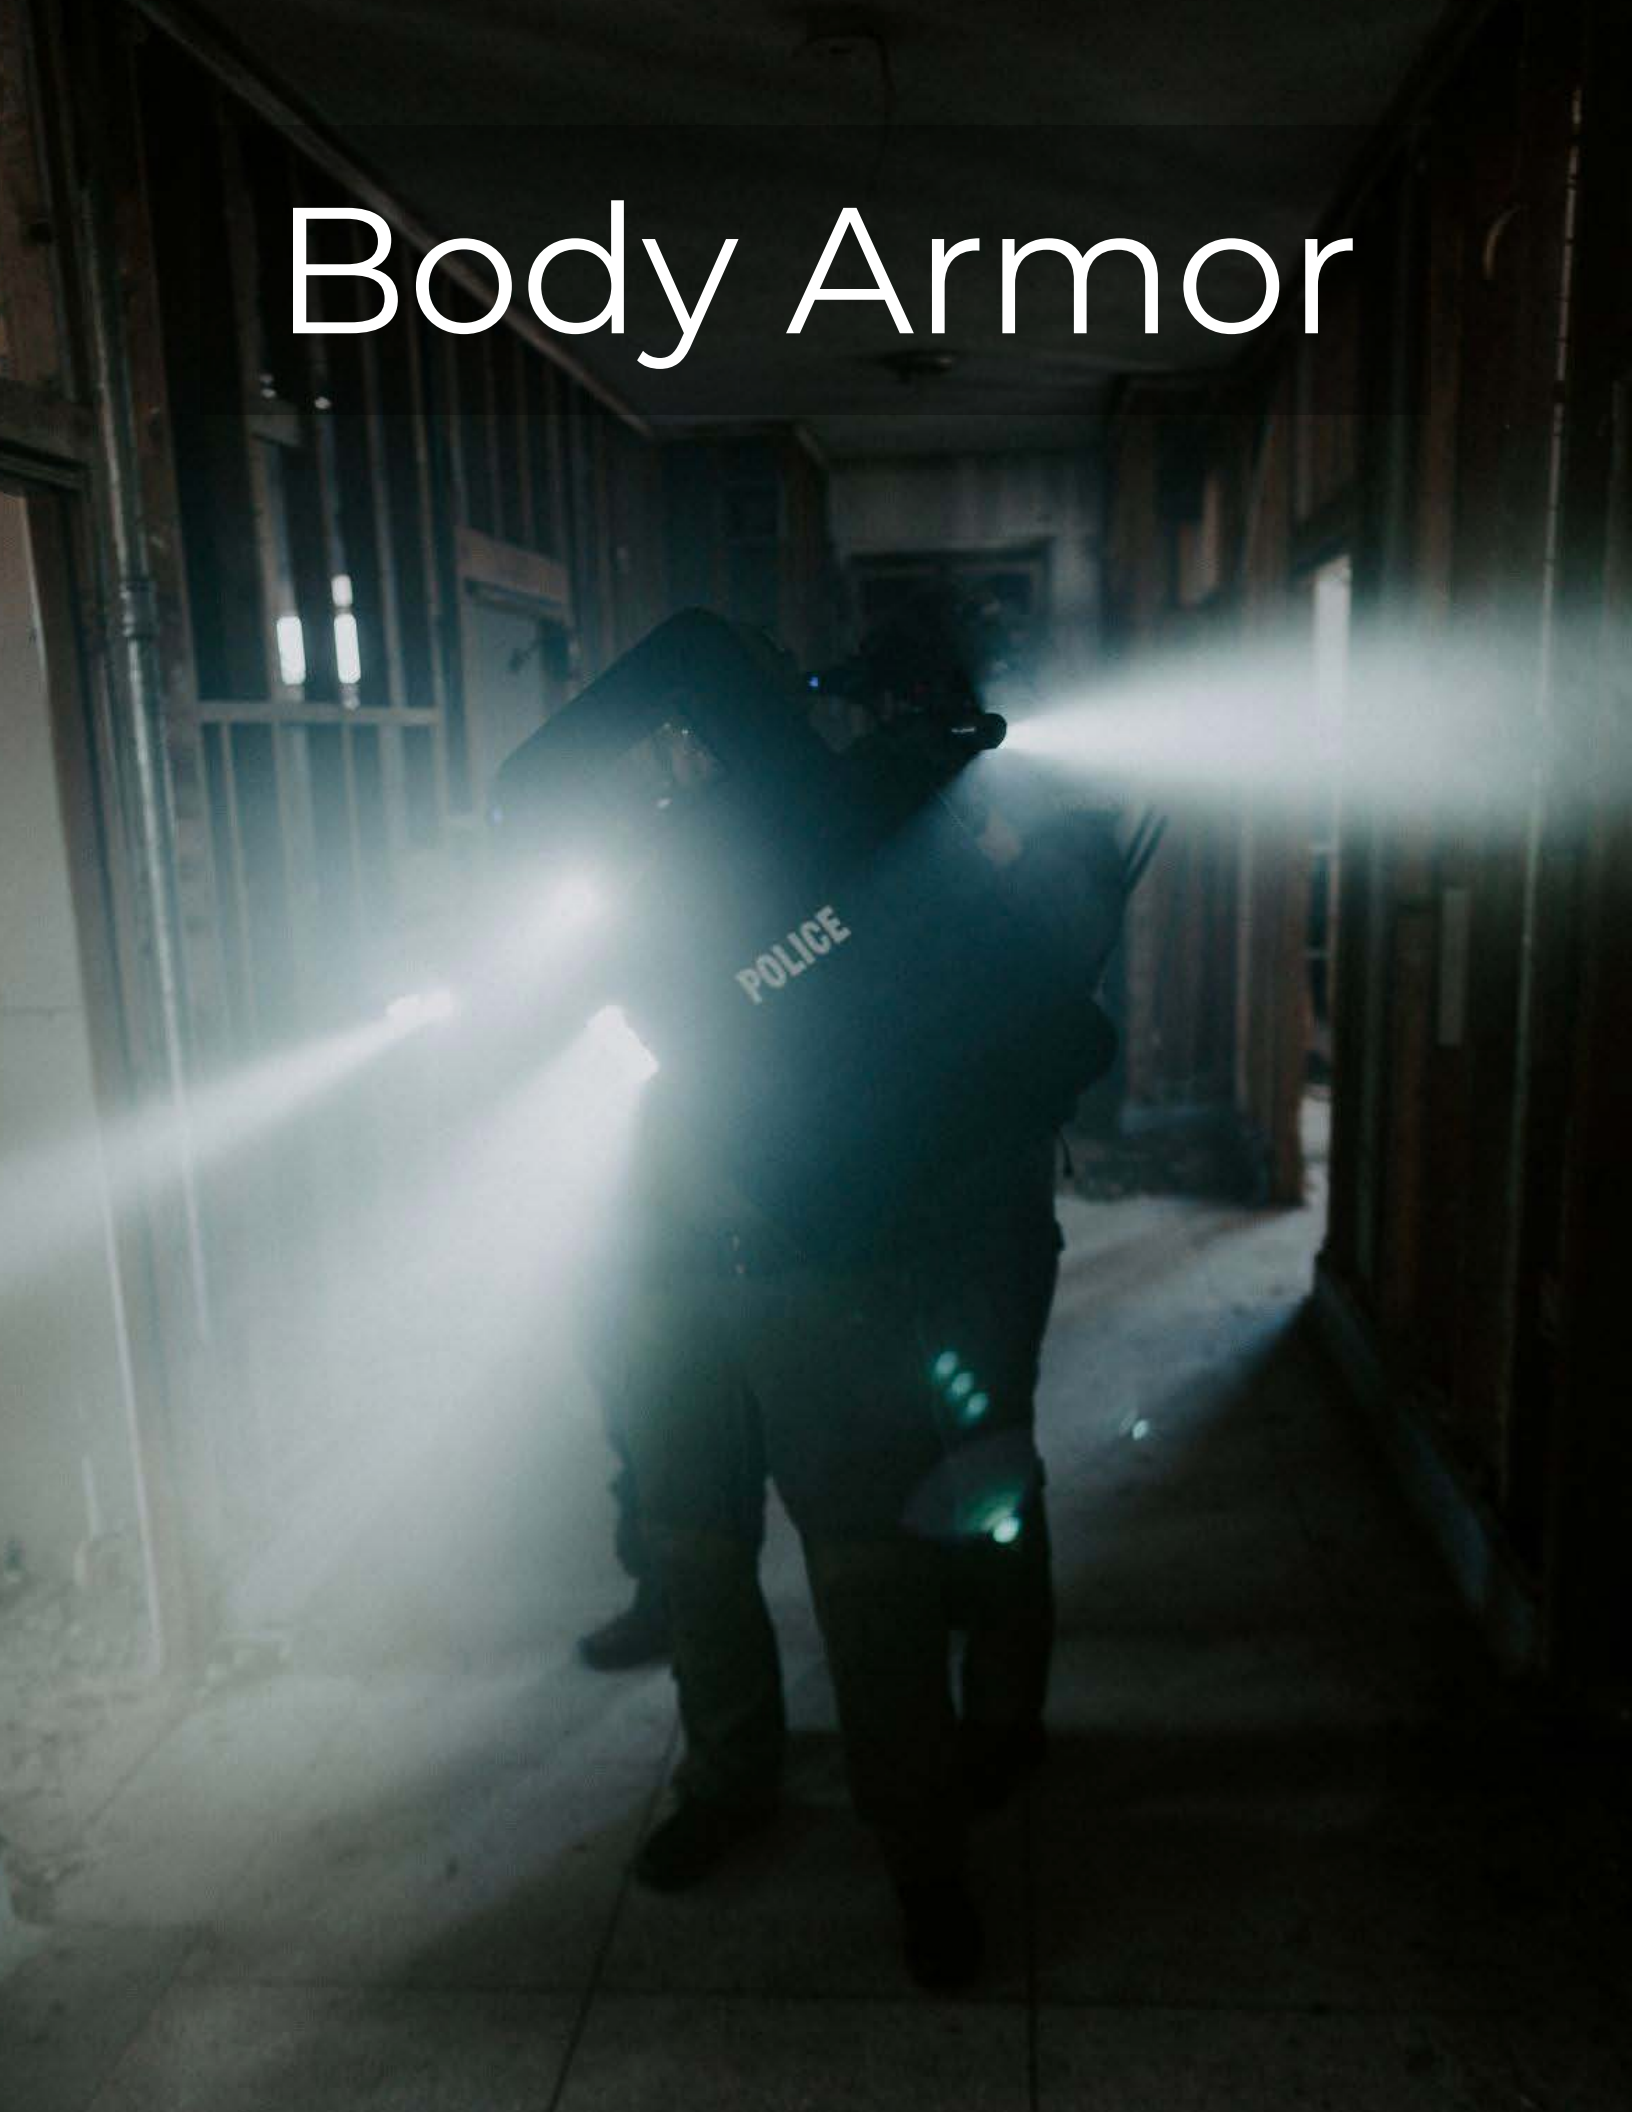

The new Wilcox L4 Lightweight Three Hole Shroud (WLS) offers all the same features and durability of our proven G34/G35 three-hole shroud with a lower profile, and 20% weight reduction. The WLS is available with or without a NVG lanyard in multiple colors.

WILCOX L4 MODULAR THREE HOLE SHROUD (WMS)

The new Wilcox L4 Modular Three Hole Shroud (WMS) offers all the same features and durability of our proven G34/G35 three-hole shroud with built in modularity and weight reduction. The WMS utilizes a removable lanyard clip that can be inserted at the 12, 3 and 9 o'clock positions. The WMS is available with or without a NVG lanyard in multiple colors.

Body Armor

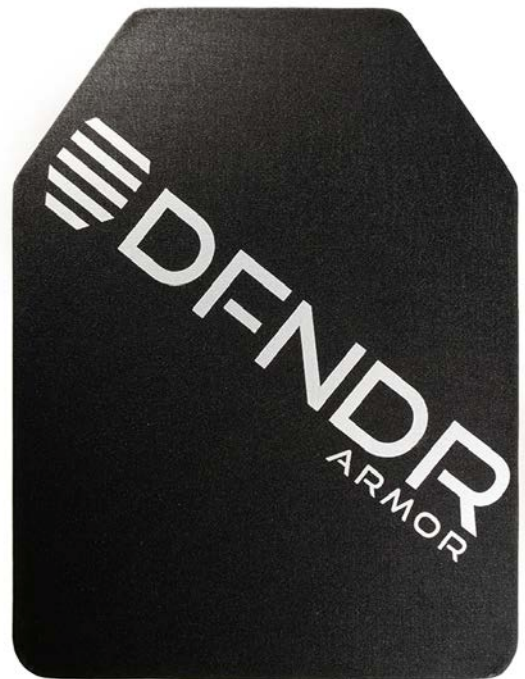

DFNDR LEVEL III++ RIFLE RATED BODY ARMOR

The DFNDR Armor® Rifle Rated Level III++ system was developed specifically against 5.56x45 M855 (SS109) Green Tip penetrator. This system is NIJ Certified and also rated to defeat the Mild Steel Core Chinese and PS Ball Russian 7.62x39 AK-47 threats and standard steel jacketed/lead core .308 and copper jacketed/lead core 7.62, .223 and 5.56 threats at an exceptionally low weight of 4.1 lb. for a Medium Size plate.

DFNDR LEVEL IV RIFLE RATED BODY ARMOR

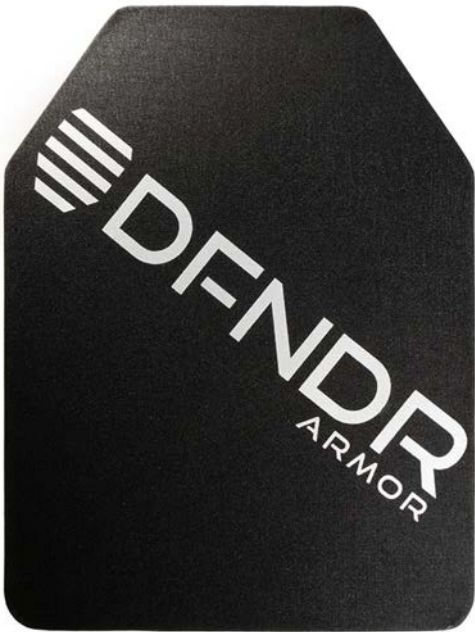

The DFNDR Armor® Rifle Rated Level IV system was developed to defeat a single shot of 7.62x63 APM2 at muzzle velocity and multiple shots of light Armor Piercing ammunition. Our Level IV rifle rated hard armor plates are designed with a multi-curve profile to provide an ergonomic and comfortable fitting armor system that is intended to wear against your body all day.

LEVEL III++C RIFLE RATED BODY ARMOR

Our Rifle Rated Level III++ has earned its reputation as the preferred armor system for SWAT Teams across the nation, thanks to its exceptional capability to neutralize the 5.56x45 M855 (SS109) Green Tip threat while maintaining a commendable level of lightness. We've developed a system that not only matches the threat protection of our Level III++ but also comes with an affordable price tag. Now, you can equip yourself with cutting-edge defense without compromising your budget, ensuring that the pinnacle of protection is accessible to all.

DFNDR LEVEL III+ RIFLE RATED BODY ARMOR

The DFNDR Armor® Rifle Rated Level III+ system is our flagship lightest weight areal density body armor insert. This armor is specifically designed to defeat the Mild Steel Core Chinese and PS Ball Russian 7.62x39 AK-47 threats. This system also defeats standard lead core .308, 7.62, .223 and 5.56 threats at a drastically low weight of 2.5 lb. for a Medium Size plate.

DFNDR LEVEL III+ C RIFLE RATED BODY ARMOR

The DFNDR Armor® Rifle Rated Level III+ Core Essential system is the budget friendly sister model to our flagship Level III+ plate. Identical in performance, this armor is specifically designed to defeat the Mild Steel Core Chinese and PS Ball Russian 7.62x39 AK-47 threats. This system also defeats standard lead core .308, 7.62, .223 and 5.56 threats at a weight of 3.1 lbs. for a Medium Size plate.

DFNDR IIIA HANDGUN RATED BODY ARMOR

The DFNDR Armor® Handgun Rated Level IIIA system is the lightest weight areal density body armor that DFNDR produces. Our level IIIA hard armor plates are designed with a multi-curve profile to provide an ergonomic and comfortable fitting armor system that is intended to wear against your body all day

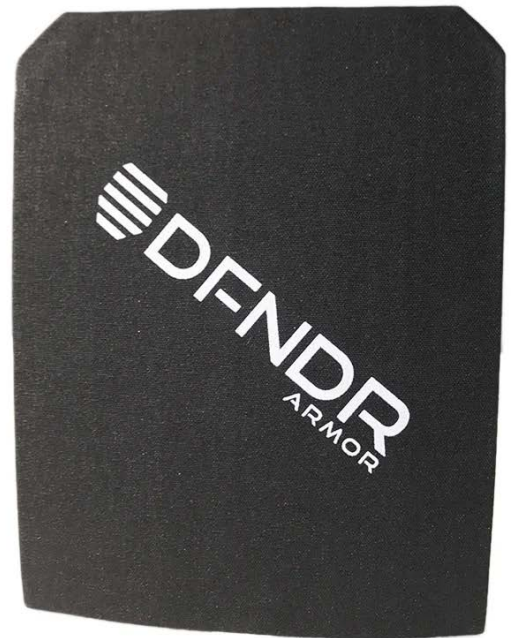

DFNDR LEVEL IIIA HANDGUN RATED TRAUMA PLATE INSERT

DFNDR Armor's Level IIIA trauma handgun plate insert is extremely lightweight at only 0.38 lbs (5"x8"). Our level IIIA trauma plate inserts are designed with a multi-curve profile to provide an ergonomic and comfortable fitting armor system that is intended to wear against your body all day.

RIFLE RATED TRAUMA PLATE INSERT SPECIAL THREAT TESTED

The DFNDR Armor® Special Threat Tested Trauma Plate Insert is extremely lightweight at only 1.4 lbs (7"x9"). Our STT trauma plate inserts are produced with a multi-curve profile to provide an ergonomic and comfortable fitting armor system designed to be inserted into the front and rear pockets of most soft armor vests. This armor system is rated to defeat multiple rounds of 7.62x39 (MSC, PS Ball, Ball) and 5.56x45 M193 ammunition.

RF1 ELITE SERIES ULTRA LIGHTWEIGHT RIFLE RATED BODY ARMOR

The DFNDR Armor® RF1 Elite is the latest breakthrough in technology, revolutionizing the market with its cutting-edge features enabling ultra lightweight and incredibly thin armor for this level of ballistic protection. This plate offers unparalleled performance and durability. Its advanced technology ensures optimal stability and protection, making it the ultimate choice for those seeking the best armor system in the industry. Defeats 5.56x45mm M193 Ball, 7.62x51mm M80 Ball, 7.62x39mm Chinese Mild Steel Core and Russian PS Ball

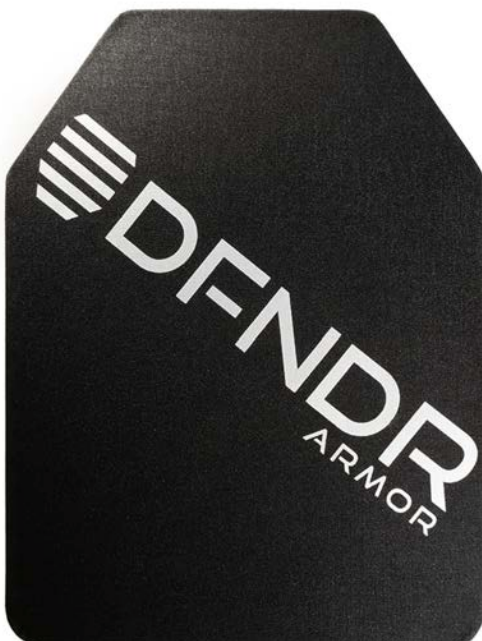

LEVEL III+ ICW ELITE SERIES ULTRA LIGHTWEIGHT RIFLE RATED BODY ARMOR

The DFNDR Armor® Level III+ In-Conjunction-With (ICW) Ultra Lightweight system is an incredibly thin light body armor insert designed to defeat 7.62x51mm M80 Ball, 7.62x39mm PS Ball & Mild Steel Core. Our level III+ ICW rifle rated hard armor plates are designed with a multi-curve profile to provide an ergonomic and comfortable fitting armor system that is intended to be worn in front of IIIA soft armor.

M193 ICW ELITE SERIES ULTRA LIGHTWEIGHT RIFLE RATED BODY ARMOR

The DFNDR Armor® M193 In-Conjunction-With (ICW) Elite Ultra Lightweight system is an incredibly thin lightweight body armor insert designed to defeat 5.56x45mm M193 Ball and 7.62x39mm Ball. Our M193 ICW rifle rated hard armor plates are designed with a multi-curve profile to provide an ergonomic and comfortable fitting armor system that is intended to be worn in front of IIIA soft armor.

LEVEL III X RIFLE RATED BODY ARMOR

The DFNDR Armor® Rifle Rated Level III X system was developed as a special threat tested cross over between level III and IV capability that defeats light Armor Piercing ammunition such as the 7.62x39 API, the 5.56x45 M855 A1 and the 7.62x54R LPS threats. This system is also rated to defeat the 5.56x45 M855 (SS109) Green Tip, Mild Steel Core Chinese and PS Ball Russian 7.62x39 AK-47 threats and standard steel jacketed/lead core .308 and copper jacketed/lead core 7.62, 223 and 5.56 threats at a much lower weight than a level IV system.

DFNDR STANDARD CONCEALABLE VEST

The DFNDR Armor® Standard Concealable Vest is a discrete option for ballistic protection. The vest is designed to fit the torso comfortably and securely. Side opening design

Lightweight breathable water repellant carrier

Moisture-wicking, anti-microbial inner liner which draws moisture away from the body for faster cool-down

DFNDR INTERNATIONAL TACTICAL CARRIER

Constructed of durable Nylon material, Modular system able to accommodate additional accessories (throat, collar, biceps, groin), Front and back plate pockets (for upgraded rifle plates) MOLLE compatible, Adjustable shoulders for improved fit, Adjustable side closure system Reinforced, heavy-duty rescue strap, Front and back hook and loop ID attachment platforms, Front and back pockets for adding hard armor rifle protection

DFNDR DTV TACTICAL CARRIER

The DFNDR Armor® DTV Tactical Carrier combines the features of a plate carrier with a tactical carrier. Constructed of durable Nylon material, Modular system able to accommodate additional accessories (throat, collar, biceps, groin, lower back protector, and slide gap armor), Front and back plate pockets. Adjustable shoulders for improved fit. Shoulders are designed with a high-density polyethylene padding system for comfort Adjustable cummerbund for secure fit, Cummerbund system is designed for weight distribution. Reinforced heavy-duty rescue strap Front and back hook and loop ID attachment platforms

DFNDR SLHIIIA SOFT ARMOR PLATE CARRIER INSERT

The DFNDR Armor® Level IIIA soft armor plate carrier inserts are designed to bring more versatility to your tactical carrier by offering advanced protection against various ballistic threats up to and including those specified in the NIJ Standard. Constructed using flexible and protective ballistic material, ensuring both comfort and safety for the wearer.

DFNDR SLXIIIA SOFT ARMOR PLATE CARRIER INSERT

The DFNDR Armor® Level IIIA soft armor plate carrier inserts are designed to bring more versatility to your tactical carrier by offering advanced protection against various ballistic threats up to and including those specified in the NIJ Standard. Constructed using flexible and protective ballistic material, ensuring both comfort and safety for the wearer.

DFNDR LEVEL IIIA SOFT ARMOR PLATE CARRIER INSERT

The DFNDR Armor® Level IIIA soft armor plate carrier inserts are designed to bring more versatility to your tactical carrier by offering advanced protection against various ballistic threats up to and including those specified in the NIJ Standard. Constructed using flexible and protective ballistic material, ensuring both comfort and safety for the wearer.

Night Vision

L3HARRIS BNVD (AN/PVS-31A)

The L3Harris AN/PVS-31A – BNVD is a compact, lightweight, Gen III dual-tube goggle with improved white phosphor tube technology for greater target detection and recognition. Low-light and nighttime maneuvers appear more natural in black and white, with added contrast detail in shapes and shadows providing the operator more visual information for assessment and acquisition.

ACT IN BLACK DTNVS-MG

Act in Black DTNVS Manual Gain is the same design as the proven DTNVS, but with the benefit of manual gain added to its features. The DTNVS Manual Gain is the lightest dual tube housing on the market with user controllable gain, adjustable diopters, built in IR illuminator and individual pod on/off.

L3HARRIS GPNVG

The holy grail of night vision devices, the GPNVG features four L3Harris unfilmed white phosphor image intensifier tubes and a unique set of eyepieces, giving the device an extraordinary 97° field of view. This extra field of view, more than double that of traditional night vision devices, is convenient while driving, hiking, and shooting. The unit includes a remote battery pack and cable, which serves as the unit's sole source of power. RPO lenses offer a crisp image in all lighting conditions. There is no doubt if your budget allows, the GPNVG is sure to impress every time you power it on.

LBIT F5032 (AN/PVS-31D)

The Elbit Systems of America, F5032 has a unique close-focus lens that allows users to perform intricate, critical tasks with more clarity than competing night vision binoculars. Whether reading printed map details, administering medical support, repairing weapons or re-configuring a radio, the F5032 provides essential visual ability while still maintaining cover under darkness. The F5032 is also configurable with fixed or adjustable diopter lenses to accommodate individual user optical requirements to minimize eye strain.

EOTECH BINONV-W

The EOTECH® BinoNV-W is a cutting edge, compact, lightweight night vision goggle built to full MIL-SPEC standards. Binocular systems offer better depth perception than single tube systems making them preferred for navigating on foot or by vehicle and interacting with the environment. The built-in Diopter adjustments makes this model an ideal choice for special operations forces and SWAT applications. This goggle is fully articulable where the user can flip up each monocular easily and independently. This goggle features a self-contained single AA battery power and can also be operated with an external battery pack.

L3 HARRIS ANVIS-9 TSO

The L3Harris aviation night vision goggle provides improved situational awareness with large 25 mm eyepieces and enhanced binocular viewing for optimized depth perception and improved 40 degree field-of-view.

The M949 meets all FAA-TSO 164a certification performance requirements and is based upon the military nomenclature AN/AVS-9.

STEINER AN/PVS-21

The AN/PVS-21 Low Profile Night Vision Goggle has been designed for aggressive special operations capability in air, water, and land environments. The patented low profile design offers 3-4 inches less protrusion than conventional night vision goggles enabling a wide range of mission applications.

EOTECH MONONV MONOCULAR

The EOTECH® MonoNV monocular is an image intensified, night-vision device built to the same rigorous standard (MIL-STD-810G) as the military AN/PVS-14 system. This multi-purpose monocular is collimated for operation as hand-held, helmet/head-mounted or weapon mounted. Lightweight and robust construction combined with superior optical characteristics utilizing ESA Gen 3 White Phosphor tube technology, providing maximum target detection and recognition range.

NVD PVS-14 NIGHT VISION MONOCULAR

The PVS-14 Night Vision Monocular is the current military issue night vision goggle for the US armed forces. It is also the preferred choice of many foreign (NATO) forces. Produced by the hundreds of thousands, the 14 will continue to march on for many years to come. The PVS-14 is the all around best multi functional night vision monocular available. Head or helmet mounted, the PVS-14 allows the user to retain their night adapted vision in one eye while viewing their surroundings through the illuminated eyepiece of the PVS-14.

Lights & Lasers

EOTECH OGL

The new EOTECH On-Gun Laser (OGL) is offered in a standard power (MIL/LE) model. Powered by a single CR123 lithium battery, the OGL offers up to 9 hours of continuous run time. The all aluminum housing offers extreme durability and its compact size is similar to a standard deck of playing cards. The IR and Visible lasers are optically aligned so zeroing is simple and easy. The OGL has a unique sliding lever that controls the beam divergence of the IR illuminator, making adjustments from spot to flood fast and easy, even under pressure.

WILCOX RAPSTAR XE

The Wilcox RAPSTAR Xe™ is the next generation in the RAPSTAR line of products. As a class 3B high power laser aiming device, the RAPSTAR Xe is designed specifically for the military and law enforcement markets. The RAPSTAR Xe provides snipers and advanced tactical shooters increased accuracy and precise engagement of targets at extremely long ranges.

WILCOX RAID XE

The Wilcox RAID Xe is the next generation in the RAID line of products. The RAID Xe is a high power laser aiming device designed for assault and crew served weapons. The RAID Xe provides a smaller, lighter, stronger laser aiming device with superior, uncompromising performance. The ultimate beam clarity and uniformity aide rapid target acquisition and the built-in networking capabilities give the RAID-Xe superior maintenance and replenishment connectivity, all increasing the warfighter's lethality and situational awareness.

L3HARRIS ATPIAL (AN/PEQ-15)

The L3Harris ATPIAL AN/PEQ-15 is a small, lightweight, easy-to-use aiming system with integrated infrared and visible aiming lasers and an infrared illuminator. ATPIAL features a Rail-Grabber interface and is ruggedized to military environmental standards for use on small arms and crew-served weapons.

L3HARRIS NGAL

The L3Harris Next Generation Aiming Laser is a rugged, ultra-compact and lightweight system designed to be compatible with all generations of night vision devices.

The size of a credit card, NGAL uses an advanced illuminator design to achieve a more uniform near infrared illuminator beam for increased situational awareness. High-efficiency electronics support increased system performance at reduced size, weight and power.

CORE SURVIVAL HEL-STAR 6 SWIR

HEL-STAR 6® SWIR offers the full capabilities of HEL-STAR 6® Gen III+ in multiple visible and infrared spectrums. This advanced personnel marker is designed for helmet-mounting for airborne, MFF, and ground tactical operations.

HRT TACTICAL MARKER LIGHT

The HRT Tactical Marker Light was designed to be an all-inclusive snag free multi-spectrum light to provide quick visibility of personnel or objects.

PRINCETON TEC CHARGE X IR MAX

An evolution of the Charge X, the Charge X IR Max redefines tactical lighting with its innovative design and powerful features. Engineered for elite performance, this helmet light offers an 862nm IR emitter delivering 420mW of radiometric power, ensuring superior visibility in the infrared spectrum.

S&S PRECISION MANTA STROBE

The Manta Strobe™ is a helmet mounted multi-spectrum light emitter optimized for Military Operations. Our goal is clear; keep it simple for the end user, provide the highest level of performance through "Select" Electronic components combined with smart programming for highest output and extended battery life.

UNITY TACTICAL AXON™ SWITCH

The pinnacle of remote switch design for weapon-mounted accessories, AXON™ provides complete control of lights and lasers in a single, compact and rugged housing. AXON™ is the direct result of operational feedback from professional end-users on our industry-leading switch technology. Lights and lasers can be fired from individual buttons with versions available for popular issued devices.

UNITY TACTICAL AXON™ XL SWITCH

Developed as part of a SOF requirement, AXON™ XL brings additional functionality to the industry-leading AXON™ family. A third button provides users with a dedicated laser visible override capability for the NGAL (LA-23/PEQ) laser. The forward two buttons feature the same tactile differentiation as AXON™, while a prominent wall separates the flat (pill-shaped) center pad from the rear (round dome) button.

UNITY TACTICAL TAPS PRESSURE SWITCH

TAPS (Tactical Augmented Pressure Switch) from TNVC and Unity Tactical is a complete one point command and control system for all weapon-mounted electronics. It provides low profile, dual-device control for lights and lasers. TAPS mounts directly to any industry standard rail, including M1913 Picatinny, KEYMOD, and M-LOK. No third party rail adapters are needed, keeping the weapon lighter and sleeker. It features two on-board buttons and two accessory leads.

Ammunition

ARMOR PIERCING CAVITATOR

The Armor Piercing Cavitator (APC) is capable of penetrating most barriers, including Level III-A body armor. The unique design of the tip not only allows phenomenal barrier penetration, but it is amazingly dynamic when encountering tissue. Since the APC does not deform, it has a scientifically designed and failsafe wounding mechanism, as well as a reliable method to limit over penetration unlike any other round capable of penetrating armor. The APC has little to no deflection in auto glass. Although the muzzle velocity and energy are extremely high for the caliber, this round has noticeably reduced felt recoil and muzzle climb during full auto fire.

FIRST RESPONSE

G9's First Response uses the Armor Piercing Cavitator (APC) technology and is an extremely capable barrier round. Although this design does not expand, it uses hydraulic forces to enlarge the wound and destroy tissue by focusing high velocity castoff. This dynamic could be visualized as similar to a water jet that is able to cut through steel. The First Response has little to no deflection in auto glass. Although the muzzle velocity and energy are extremely high for the caliber, this round has reduced felt recoil due to its lower inertia.

EXTERNAL HOLLOW POINT

The External Hollow Point is a precision machined solid copper defensive handgun round that delivers unrivaled terminal performance when it matters most. The EHP is the result of years of development and testing to produce the ideal bullet design for home defense and everyday carry ammo. Its unique patented shape employs Shape Charge Technology to reliably penetrate through frequently encountered barriers such as windshields, sheet metal, and drywall without compromising lethality on target or risking over penetration.

ARMOR PIERCING EXPANDER

APXline of rifle munitions are the solution for military and law enforcement applications for uncompromising accuracy, barrier penetration and terminal performance. The APX lineup pairs a high muzzle velocity and ballistic coefficient to increase the operators' field effectiveness by creating an extremely short time of flight with flat trajectories and little wind drift. In contrast to all other armor piercing rounds, which penetrate barriers, armor, and tissue indiscriminately, the APX design features patented Depth Charge Technology, which allows this projectile to expand rapidly when encountering tissue and hydraulically fracture. A specially designed steel tip resists deformation and enhances body armor and common barrier penetrating capabilities.

BARRIER BLIND HOLLOW POINT

G9's solid copper Barrier Blind Hollow Point provides exceptional barrier penetration, great expansion and at least 18" of penetration with nearly 100% weight retention. Due to the CNC manufacturing, reliability far exceeds traditional lead and copper jacketed hollow points. Powder selection and bullet design ensure that the dynamic terminal performance of the round is not diminished in different rifle platforms, even in short-barreled rifles down to 10.3". When compared to other premium offerings on the market, the BBHP stands out in common barrier penetration, showing little to zero deflection through windshields or car doors.

FREEDOM MUNITIONS X-DEF DEFENSE 9MM

Freedom X-DEF 9MM self defense ammunition provides ultimate stopping power in defense situations with proven penetration of 12" to 18" in ballistic gel. This ammunition is factory new, made from the finest components, loaded with an X-Treme Bullets 115, 124, 147 grain hollow point projectile, and has a velocity of 1050 fps.

FREEDOM MUNITIONS HUSH SUBSONIC 9MM

Shoot at subsonic velocities with our HUSH ammo line. 50 rounds of 9mm HUSH suppressed 125.8dB. This ammunition is new production, non-corrosive, in reloadable brass cases. Affordability, accuracy and reliability are built into each HUSH subsonic round we manufacture. Every round of HUSH is proudly loaded in our Lewiston, Idaho USA facilities. Loaded with 147 or 165 grain projectiles.

FREEDOM MUNITIONS 9MM ROUND NOSE

Freedom Munitions 9mm Round Nose (RN) is a reliable choice for training and target shooting. Each box contains 50 rounds of 9mm ammunition, delivering all the stopping power you expect in a precise, consistent package. Whether you're training or target shooting, this round offers the precision serious shooters expect. Available in 115, 124, 147 Grains.

FREEDOM MUNITIONS HUSH SUBSONIC 40 S&W

Shoot subsonic with our HUSH 40 S&W ammunition! This ammunition is new production, non-corrosive, in reloadable brass cases. Affordability, accuracy and reliability are built into each HUSH subsonic round we manufacture. Every round of HUSH is proudly loaded in our Lewiston, Idaho USA facilities. 50 rounds per box. Available in 200 Grain Projectiles.

FREEDOM MUNITIONS X-DEF DEFENSE 40 S&W

With proven penetration of 12" to 18" in ballistic gel, Freedom's X-DEF 40 S&W ammunition provides ultimate stopping power in defense situations. This ammo is factory new, made from the finest components and has a velocity of 950 fps. Available in 165 and 180 Grain Projectiles.

FREEDOM MUNITIONS 40 S&W FLAT POINT

40 Smith & Wesson ammunition, loaded with a X-Treme Bullets' 165 grain round nose flat point projectile traveling at 950 FPS. 50 rounds per box.

FREEDOM MUNITIONS 5.56X45MM M855

Designed for balance, precision, and performance, Freedom Munitions' 62 grain 5.56x45 soft point ammo delivers controlled expansion and greater stability at long range. Each round features a Pointed Soft Point (PSP) bullet, offering more stopping power than a hollow point while maintaining reliable expansion on impact.

FREEDOM MUNITIONS 5.56X45MM M193

Freedom's 5.56 M193-style rounds feature a 55-grain full metal jacket (FMJ) projectile, perfect for consistent accuracy during range sessions. Expect accuracy and consistency while sending Freedom down range at 3250 fps.

FREEDOM MUNITIONS 7.62X39MM AMMO- 125 GR SEMI-SPITZER

Introducing a Semi Spitzer 7.62x39 cartridge. The semi-spitzer offers a better trajectory than round nose bullets, but with similar impact. Best for range use, this ammunition is loaded with X-Treme Bullets plated 125 grain projectile. Tested thoroughly in our own underground ballistic lab, this projectile shoots at 2400 fps.

FREEDOM MUNITIONS 308 SOFT POINT

308 Win 150 gr SPBT New The 150 grain projectile in this round features a Soft Point (SP) Boat Tail (BT) bullet. The soft point is a softer lead protrusion on the front of the bullet which not only helps the aerodynamics of the projectile in flight but also allows the round to flatten on impact, ultimately improving ballistic performance. The (BT) boat tail designation is a tiny taper in the rear of bullet which also helps boost long range accuracy/performance.

FREEDOM MUNITIONS 308 WINCHESTER M80

Top tier ammunition for shooters demanding uncompromised performance in their 308/7.62 load. At 147 gr. - This FMJ M80 ammo allows the shooter to send Freedom downrange at 2850 fps. Expect long-range accuracy and consistency with every squeeze of the trigger.

FREEDOM MUNITIONS 308 FMJ

This 308 Winchester 150gr FMJ ammo ideal for the shooter that hits the range or heads out for the hunt. The FMJ bullet is a projectile consisting of a soft lead core encased in a copper shell. This allows for higher velocities and improved feeding characteristics.

FREEDOM MUNITIONS 6.5 CREEDMOOR FMJ

Factory new 6.5 Creedmoor loaded by Freedom Munitions using a Hornady 123 grain full metal jacket bullet. Take advantage of flatter trajectories at longer ranges with this round boasting superior ballistics. Average velocity is 2825 fps.

FREEDOM MUNITIONS 30-06 HOLLOW POINT

Top tier ammunition for shooters demanding uncompromised performance in their 30-06 load. At 168 gr. - This precision-made Hollow Point ammo allows the shooter to send Freedom downrange at 2600 fps. This exceptionally accurate package is tailor made for accuracy at long-range and consistency with every shot.

FREEDOM MUNITIONS 338 LAPUA MAGNUM

Top tier ammunition for shooters demanding uncompromised performance in their 338 Lapua rounds. This HPBT ammo allows the shooter to send 300 gr. of Freedom downrange at 2600 fps. Expect hard hitting long-range accuracy and consistency with every squeeze of the trigger.

FREEDOM MUNITIONS 50 BMG APIT

M20 Armor Piercing Incendiary Tracer in 647 Grain
Full length case resizing to fit all 50 BMG chambers.

FREEDOM MUNITIONS 50 BMG API

M8 Armor Piercing Incendiary in 647 grain Full Metal Jacket. Full length case resizing to fit all 50 BMG chambers

FREEDOM MUNITIONS 50 BMG

M33 Ball in 647 grain ammunition. Full length case resizing to fit all 50 BMG chambers

BARNES DEFENSE 12GA 3" 15 PELLETS 00BK

The Barnes Defense 12 Gauge 3" 1225 FPS 15-Pellet 00 Buckshot is a high-performance shotgun load designed for tactical applications. This shell delivers tight patterns, consistent performance, and maximum stopping power, making it a trusted choice for defensive use.

FIocchi DEFENSE DYNAMICS BUCKSHOT 12GA 2.75" 25RDS 9 PELL

Fiocchi's Defense Buckshot is the most effective way to stop a threat. A powerhouse of a round, it delivers nine lead pellets at 1,250 fps with every round fired.

Knives

DONOVAN

Donovan is named after William "Wild Bill" Donovan, the head of the Office of Strategic Services (OSS), a precursor to the United States Government agency known for human intelligence collection. OSS activities created a need for clandestine tradecraft and low-signature tools, as their agents were working undercover in axis territory. The Black Triangle Donovan's dagger-like profile is a nod to the Fairbairn-Sykes fighting knife, with a modern twist of adding an ergonomic handle. Donovan is a popular addition to the Black Triangle line of non-metallic g10 knife products.

DONOVAN MINI

A Black Triangle Donovan, but smaller. It's an easily concealable non-metallic knife for self-defense. Our Donovan Mini comes with a static sheath that has technora cord attached. Easily worn as a neck knife, boot carry, or tethered in bag.

KIRIDASHI BELT G10 KNIFE

Black Triangle knives are designed for everyday carry (EDC). Our non-metallic G10 knives offer a covert solution for self-defense in non-permissive environments (NPE). Lightweight and durable, these tools are ideal for concealed carry when traditional options aren't practical. Whether you're traveling, at a concert, the gym, working in restricted areas, or just value low-profile gear, these lightweight knives provide reliable protection without drawing attention.

MK2 MOD3

The Black Triangle MK2 Mod 3 knife is a thinner but otherwise identical design as MK1 Mod 2. A perfectly concealable non-metallic knife.

MK4

The Black Triangle Midnight Creeper MK4 is the newest edition to the Black Triangle family of non-metallic knives. It is nearly identical to the MK1 with the exception of the pommel. The MK4 features symmetrical finger choils and a flared pommel for a secure and ambidextrous grip every time. MK4 is the quintessential non-metallic fighting knife.

MK5 MOD3

Black Triangle knives are designed for everyday carry (EDC). Our non-metallic G10 knives offer a covert solution for self-defense in non-permissive environments (NPE). Lightweight and durable, these tools are ideal for concealed carry when traditional options aren't practical. Whether you're traveling, at a concert, the gym, working in restricted areas, or just value low-profile gear, these lightweight knives provide reliable protection without drawing attention.

PCT-L

The Black Triangle PCT-L (Pain Compliance Tool-Lethal)

PCT-L began as a non-lethal alternative for close protection professionals working in capacities where even our point-driven tools were not permissive. PCT-L has a chisel grind but no edge & the tip is slightly blunted in order to preserve tip integrity. Every Black Triangle G10 knife is point-driven.

S4

We took the best features of our top-performing knives and put them into one product. It has the blade profile of the Donovan, tip strength of the Senka, & index point of the MK4. The S4 sheath is cut with a hook for pocket carry & comes clipped with a Raven Concealment IWB Overhook Strut. As all of our G10, S4 is a 100% metal-free system.

THE LIBERATOR

Designed for both newcomers and seasoned enthusiasts, The Liberator offers exceptional quality and value without breaking the bank. This hybrid of the MK1 and X2 features a significantly reduced production time, ensuring a more accessible price point without compromising on Black Triangle's signature durability. Read more about The Liberator on our Blog.

BENCHMADE MEDIATOR

A tactical knife doesn't always need to be overbuilt to serve its purpose. Taking the best from some of our favorite legacy designs, the new 8551BK Mediator is Benchmade's latest push-button automatic. With milled chevron-pattern G10 handles and a CPM-S90V reverse tanto blade, the Mediator is a sleek switchblade with lightning-fast action.

BENCHMADE AUTOCRAT

Continuing the precedence for speed and style, set by the initial 3400 Autocrat, the new 3400BK-1 and 3400BK-2 Autocrat are the latest addition to the out-the-front platform. Designed with both EDC and tactical enthusiasts in mind, this quick and lightweight OTF can perform just as well as it looks.

BENCHMADE AUTO FACT

The 417 Fact re-imagined the classic Italian Stiletto knife as a contemporary EDC and Tactical tool. Now it's been taken one step further with the new 4170BK Auto Fact. Featuring aerospace aluminum handle scales with a sleek carbon fiber inlay, the addition of the Auto AXIS mechanism connects this modern-day folder to its traditional switchblade roots. A black DLC coated blade, made of premium S90V super steel, ensures phenomenal edge retention for prolonged life and low maintenance, making the Auto Fact a perfect choice for enthusiast and super-spy alike.

BENCHMADE AUTO ADAMAS

Reliability done right. The 2750 Auto Adamas tactical folding knife brings in-hand comfort to the forefront with a tank-like construction you can trust your life with. Carefully redesigned to lighten your load, while continuing to deliver unrivaled performance throughout hard-use applications, the toughest just got tougher.

BENCHMADE SOCP DAGGER

The 176BK SOCP skeletonized dagger is the optimal tool for self-defense and allows the user to maintain dexterity and manipulate other objects without putting down the knife. The specialized sheath design also integrates into gear and webbing while keeping a low profile. MOLLE compatible. Made in USA.

BENCHMADE AUTO FACT

The 417 Fact re-imagined the classic Italian Stiletto knife as a contemporary EDC and Tactical tool. Now it's been taken one step further with the new 4170BK Auto Fact. Featuring aerospace aluminum handle scales with a sleek carbon fiber inlay, the addition of the Auto AXIS mechanism connects this modern-day folder to its traditional switchblade roots. A black DLC coated blade, made of premium S90V super steel, ensures phenomenal edge retention for prolonged life and low maintenance, making the Auto Fact a perfect choice for enthusiast and super-spy alike.

Suppressors

KAC 762 QDC

The KAC 7.62 QDC/CRS-PRG suppressor is a precision-engineered solution for large frame, medium-caliber rifles, such as the SR25 / AR10 platform rifles. Optimized for flash reduction, back pressure management, and long-term durability, this suppressor features Knight's Armament's innovative Pressure Reduction Technology (PRT) and advanced baffle design (PRG). The result is a suppressor that not only minimizes gas blowback but also significantly reduces first-round flash and acoustic signature, making it a top choice for precision shooters seeking excellent suppressor technology.

KAC 762 CQB QDC

The Knights Armament 762 QDC/CQB suppressor provides suppression in an ultra short package. The idea behind the QDC / CQB is to keep the overall length of your firearms at a bare minimum while providing effective flash and sound suppression. Consistent and minimal point of impact shift is obtained using KAC's advanced QDC (quick disconnect coupling) mounting system that is also used on their larger 762 QDC suppressors. The 762 QDC/CQB is ideal for rifles that may be used in confined spaces, such as cramped building interiors, caves, or when the user may have to enter and exit vehicles quickly.

KAC 556 NT4

KAC's new PRG system Signature Reduction Device line uses the blast pulse of the contained pressure to mechanically remove the combustible environment from the suppressor and eliminate first round flash almost entirely. The first suppressors, and many to this day, utilize a threaded barrel-to-device connection. Knight's developed and fielded a much faster and easier system of connection which evolved into the Gate Latch. This system was first fielded on the M4QDSS and now the NT4 and M110/SR-25 suppressors. This system allows for quick attachment and detachment without sacrificing a secure fit.

KAC 556 QDC

KAC 5.56 QDC/CRS-PRT suppressor is a high-performance, full-sized suppressor engineered for professionals who demand superior flash suppression, reduced back pressure, and long-term durability. Featuring Knight's Armament's advanced Pressure Reduction Technology (PRT), it effectively minimizes gas blowback and maintains optimal bolt carrier velocity and rate-of-fire—ensuring your weapon performs consistently under pressure.

KNIGHT'S ARMAMENT 5.56 QDC/MCQ

KAC 5.56 QDC/MCQ-PRT suppressor offers a perfect blend of compact size, lightweight construction, and advanced Pressure Reduction Technology tailored for gas-driven carbines like the AR15. Designed to significantly reduce back pressure and gas blowback, it enhances reliability and shooter comfort by minimizing heat and noise exposure. Weighing just 13.9 ounces and extending only 2.33 inches, this suppressor maintains the firearm's maneuverability and handling characteristics, making it ideal for tactical operations and fast-paced environments.

SF 2ND GEN SOCOM SUPPRESS 7.62

Engineered for extreme accuracy, the SOCOM762-RC2 delivers minimal, 100% repeatable impact shift with superior sound attenuation for 7.62 mm/.308-caliber rifles. Featuring SureFire's Total Signature Reduction® technology, it virtually eliminates first-round flash while reducing sound and dust signatures. Built with high-temp materials and advanced manufacturing, it ensures consistent performance and extreme durability in the harshest conditions. Vented baffle technology minimizes back pressure for optimal weapon reliability. Ideal for warfighters and shooters, the SOCOM762-RC2 enhances survivability and provides a more pleasant shooting experience.

SF 2ND GEN SOCOM SUPPR 5.56

The Surefire SOCOM556-RC2 is a military-tested 5.56 suppressor engineered for elite performance in extreme conditions. This suppressor is SOCOM-certified and selected for M4 and Mk18 carbines, ensuring battle-proven reliability. Constructed from high-temperature Inconel alloy and stainless steel, the SOCOM556-RC2 delivers exceptional durability, sound suppression, and signature reduction.

SF 2ND GEN SOCOM MINI 556 BLK

The SureFire SOCOM556 Mini 2 proves that good things can come in small packages. Experience similar performance levels to the model that assured SureFire's victory in the demanding USSOCOM suppressor trials, but in a more compact package. At a mere 5 inches and optimized for 14.5-inch and longer barrels, the Mini 2 was constructed using computerized laser welding and made from high-temperature alloys like Inconel and stainless steel, making it durable and versatile. This compact silencer is not just built to last; it's built to excel under the toughest conditions.

HUX FLOW 762 TI

Lighter and quieter than its predecessor, the FLOW 762 Ti sets a new standard for suppression. The latest evolution in Flow-Through® technology delivers above and beyond toxic fume mitigation, accuracy, and repeatability. By 3D-printing entirely with Grade 5 titanium, the FLOW 762 Ti is the lightest rifle suppressor to come from HUXWRX Safety Co. without sacrificing quality, longevity, durability, or functionality. This innovative multi-caliber suppressor utilizes patented and proven Flow-Through® and Torque Lock® technologies. The integrated GeoFlash™ Cap geometry effectively mitigates flash as part of its overall signature reduction functionality. The FLOW 762 Ti is full-auto rated and compatible on 5.56, 6.5, and 7.62 platforms with no barrel restrictions.

HUX FLOW 556 TI

Lightweight and long-lasting, the FLOW 556 Ti is the latest advancement in Flow-Through® technology. Entirely 3D-printed with Grade 5 titanium, the FLOW 556 Ti is the quietest full-size 5.56 dedicated suppressor to come from HUXWRX Safety Co. without sacrificing quality, longevity, durability, or functionality. This innovative suppressor utilizes patented and proven Flow-Through® and Torque Lock® technologies delivering exceptional toxic fume mitigation, accuracy, and repeatability. The integrated GeoFlash™ Cap geometry mitigates flash as part of its overall signature reduction functionality. The first full-size 5.56 suppressor from the FLOW series is full-auto rated with no barrel restrictions.

DEAD AIR ARMAMENT, MOJAVE9

The Mojave-9 pushes the boundaries of performance, finally allowing you to have the benefits of low blow-back AND supreme acoustic signature reduction. This is achieved by the all-new Triskelion baffle system that promotes continuous, yet efficient flow of gases. This leads to a less toxic, lower recoil, and overall more enjoyable shooting experience. In short it's a breath of fresh air. Works with 300 Blackout and 9mm

FLOW 9K TI

Exceptional performance in a compact design, the FLOW 9k Ti is lighter, quieter, and more efficient than its predecessor, the RAD 9. Featuring hybridized Flow-Through® technology, this superior 9mm suppressor is constructed entirely of Grade 5 titanium and has an enhanced GeoFlash™ Cap with extended lugs for hassle-free installation and removal. As HUXWRX's first fully 3D-printed pistol suppressor, the FLOW 9k Ti boasts exceptional durability and reliability and is optimal on PCC platforms. Its design also includes stiction mounting and hub adapter capability for versatile compatibility. The FLOW 9kTi is full-auto rated with no barrel restrictions.

Our Commitment to Your Mission

At Visum Contracting Group, we are more than a provider—we are your partner in building safer communities. Our scenario-based training, high-performance tactical equipment, and expert-led programs are designed to empower you with the confidence and tools to face any challenge. Ready to elevate your team's readiness? Contact us today to customize solutions that meet your mission-critical needs.
