

WHEN  
PERFORMANCE  
MATTERS

## FKAB Marine Design in Partnership with Crucible Engineering LLC for Innovative Ship Designs in the U.S. Market

With over 60 years in the industry, FKAB Marine Design offers a range of ship designs including Product and Chemical tankers, LNG and LPG gas carriers, dredges, and ferries. FKAB's designs are known for their operational efficiency and environmental performance, meeting both current and future maritime needs.

This partnership combines FKAB's extensive design expertise with Crucible's knowledge of American maritime regulations. The collaboration will offer American clients access to FKAB's designs for tank vessels, dredges, and smaller vessels.

FKAB Marine Design has a global presence with offices in Uddevalla, Gothenburg, Shanghai, and Zhenjiang. The company's projects include tankers ranging from 6,000 DWT to 49,000 DWT, in both coated and stainless steel.
