SCE

SOIL CONSULTANTS ENGINEERING

Like People, Soils Are Different

Founded in 1960, Soil Consultants Engineering is a family owned and operated full service geotechnical engineering consulting firm. With three generations of expertise, our team of professional engineers, geologists, soil scientists, commercial and residential building inspectors, and field personnel are dedicated to providing timely and cost-effective solutions that meet our clients' needs. As a proud woman and minority-owned small business, SCE holds several certifications, including federal EDWOSB, Virginia DBE and SWaM, Maryland DBE.

CORE COMPETENCIES

- Geotechnical Explorations & Analysis
- Geophysical Surveying
- In-house Soil and Concrete Laboratory
- Construction Material Testing
- Deep Foundation Design
- Infiltration Testing
- Slope Stability Analysis
- Concrete and Asphalt Coring
- Special Inspections
- Draw Inspections
- Stormwater Management
- E&S Control Inspections
- SWPPP
- Environmental Consulting

DIFFERENTIATORS

We pride ourselves on exceeding expectations through our commitment to personal services and our abilities to meet client's needs in a timely and cost-effective manner.

- **Certified SWaM, VA & MD DBE, and MWAA SLBE**
- **Vast experience in the Mid-Atlantic region**

Over **60+ years of experience** have allowed SCE to make significant contributions to the development of thousands of acres of land as well as the construction of hundreds of thousands of square feet of structures, primarily in Virginia, Maryland, and Washington, D.C.

- **Your Partner in Exceptional Customer Service**

We believe that exceptional service begins with clear communication. Our dedicated team is here to support you throughout your project, ensuring you feel informed and valued. We provide regular updates and quick responses to your inquiries, making the process smooth and efficient.

SCE PROJECT EXPERIENCE

DHS CISA HQ (January 2025-Present)

Client: AECOM | GSA

Providing geotechnical logging for over 300+ stability and production caissons, materials testing, and special inspections for concrete, soil, grout, rebar, and structural steel

Dahlgren Naval Support Facility (August 2024-Present)

Client: Michael Baker International | NAVFAC

SCE explored the subsurface conditions of the soon-to-be Secure Electromagnetic Research Facility

Joint Base Andrews NAVFAC Alert Facility (May 2023-Present)

Client: Pond Engineering | NAVFAC

Performing geotechnical engineering for the proposed alert facility at the Air Force base

Army Aviation Support Facility (June 2023-October 2023)

Client: David Everett | Jacobs Engineering

Conducted over 2,000 feet of geotechnical subsurface investigation for a full-time support aviation unit of the Virginia Army National Guard

Virginia Museum of Fine Arts (November 2021-November 2022)

Client: Chris Wood | SmithGroup

Provided geotechnical engineering services for a new addition to a top comprehensive U.S. art museum

CIA Warrenton Training Center, Station B (April 2020-August 2022)

Client: Troy Weis | Ragnar Benson Construction

Conducted material testing and construction observations for the headquarters of the Warrenton Training Center
