

CME INFORMATION

San Diego Cardiovascular Interventions (SDCI 2025)

October 3-4, 2025

La Jolla, California

Target Audience

This activity is designed to meet the educational requirements for Interventional Cardiologists, Clinical Cardiologists, Internists, Residents, Fellows in Training, Cath Lab Nurses and Technicians as well as other Allied Healthcare professionals with an interest in the field of cardiology.

Overview

The purpose of this educational activity is to disseminate knowledge and evidence-based data regarding novel and innovative therapeutic options for patients with complex coronary, structural, and peripheral vascular disease.

Learning Objectives

- Identify new techniques and technologies for bifurcation and left main PCI
- Identify the role of various lesion modifications/atherectomy techniques prior to coronary interventions for calcified lesions
- Identify the utility of adjunctive hemodynamic support to facilitate complete coronary revascularization and perform high-risk PCI
- Review the data and indications for percutaneous VADs in severe decompensated CHF and cardiogenic shock
- Review the contemporary data and indications for TAVR, percutaneous tricuspid valve replacement and new structural heart interventional procedures
- Identify the role of left atrial appendage closure and percutaneous mitral/tricuspid valve repair
- Identify optimal oral and intravenous antiplatelet therapy during and after PCI
- Review optimal utilization of FFR, IVUS, and OCT in reducing inappropriate PCI
- Identify appropriate patients and approaches for carotid and peripheral vascular interventions
- Identify appropriate patients with uncontrolled hypertension who are candidates for renal denervation
- Identify occupational hazards of interventional cardiology and strategies to reduce radiation association risk
