

2026 CORPORATE EDITION

VOX TELECOM CORP

Building connectivity, powering
infrastructure, and supporting mission-
critical networks across California —
September 2026

MESSAGE FROM THE FOUNDER

"At Vox Telecom Corp, we are committed to delivering technical excellence on every project — from fiber optic installations to complex electrical infrastructure. Our team brings deep field experience, an unwavering attention to detail, and a genuine commitment to safety and schedule performance. We don't just complete projects; we build long-term partnerships grounded in trust and quality."

— Marculino Pedro, Founder & President

Responsive execution, experienced field technicians, and a culture of safety define everything we do. We are proud to support mission-critical networks across California.

Vox Telecom Corp is a California-based telecommunications and electrical infrastructure contractor delivering expert solutions across fiber optic, low-voltage, electrical, and data center services. Founded on technical excellence and customer focus, we support mission-critical networks statewide.

Our experienced field technicians bring precision, reliability, and deep industry knowledge to every project — from initial design through final commissioning.

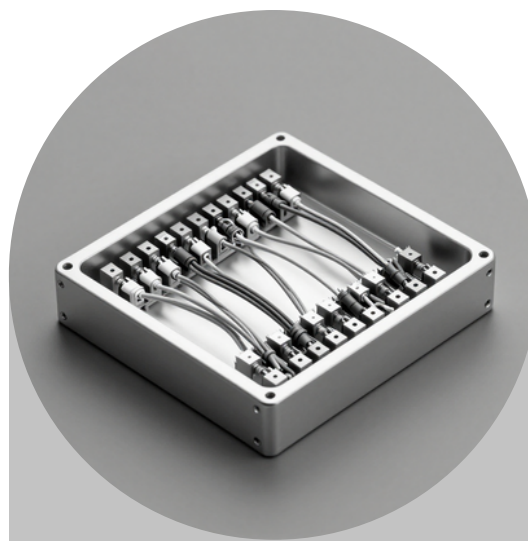

COMPANY PROFILE

CORE CAPABILITIES

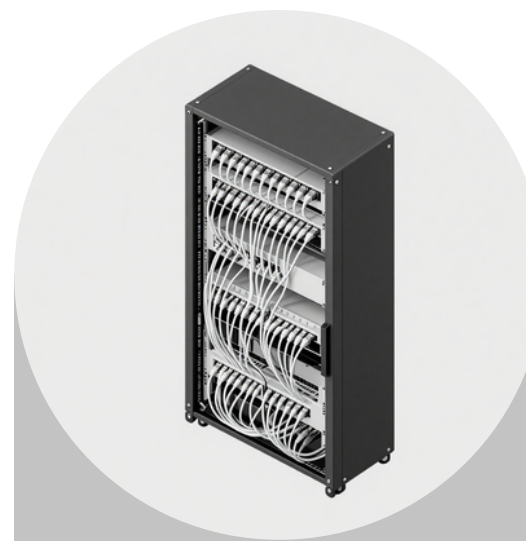

Technical expertise
across fiber, electrical,
and infrastructure
systems — delivered
by experienced field
professionals.

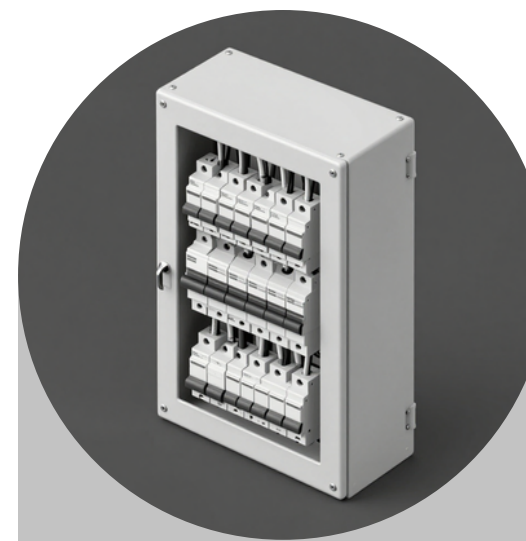

FIBER OPTICS

Installation, splicing &
OTDR testing for reliable
connectivity

STRUCTURED CABLING

End-to-end low-voltage
cabling design and
deployment

POWER SYSTEMS

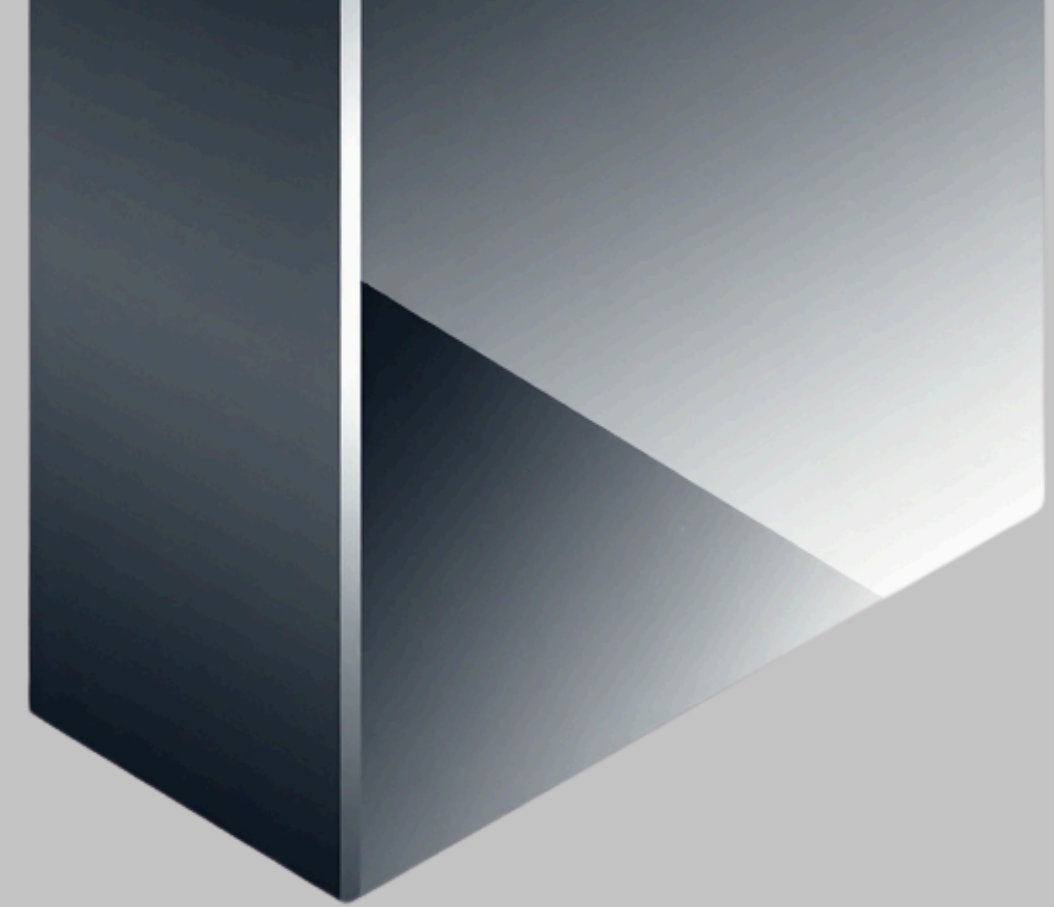

DC and AC power
distribution and
electrical infrastructure

NETWORK INFRA

Equipment installation,
support & maintenance
services

MAINTENANCE DIVISION

Our Maintenance Division delivers proactive infrastructure support to keep your networks and systems running without interruption. From rapid troubleshooting and targeted repairs to scheduled preventive maintenance, our experienced field technicians respond quickly and work with precision to minimize downtime and protect operational continuity.

We pride ourselves on responsiveness, technical attention to detail, and strict adherence to project schedules — ensuring your critical infrastructure remains reliable, compliant, and fully operational.

DATA CENTER SERVICES

Installation & decommissioning, rack-and-stack services, and cable management tailored for mission-critical environments.

VOX TELECOM CORP

KEY CAPABILITIES

Rack-and-stack services, equipment upgrades, power distribution support, structured cable management, documentation, and compliance for modern data center infrastructure.

Vox Telecom Corp delivers reliable infrastructure solutions for carriers, municipalities, enterprises, and utilities across California. Our experienced field teams collaborate seamlessly with construction partners to ensure every project meets the highest standards of performance and compliance.

From mission-critical network support to large-scale telecom deployments, we bring technical precision and schedule discipline to every engagement — keeping your operations connected and running.

TELECOM EXPERTISE

SAFETY & QUALITY

COMPLIANCE & ASSURANCE

Rigorous safety planning and compliance standards guide every project. All work is subject to testing, verification, and thorough documentation to ensure reliability.

OUR COMMITMENT

Experienced field technicians uphold strict attention to detail on every job. We prioritize schedule performance, customer satisfaction, and zero-compromise quality across all telecommunications and electrical infrastructure work.

SERVICE PORTFOLIO

Division	Services	Benefits
Fiber Optics	Installation, Splicing, OTDR Testing	Reliable Connectivity
Electrical	Power Systems, Distribution	Safe Operations
Data Centers	Equipment & Infrastructure Support	Operational Continuity
Maintenance	Preventive & Corrective Services	Reduced Downtime

WHY PARTNER WITH US?

Vox Telecom Corp delivers licensed, insured, and scalable telecom and electrical solutions across California.

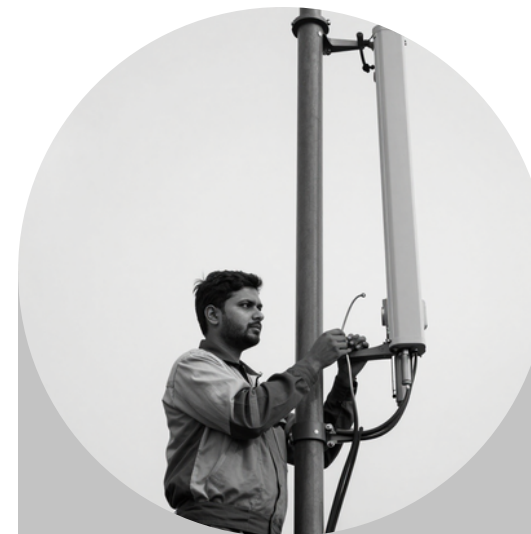

C-10 LICENSED

California C-10
Electrical Contractor
License - meeting all
state regulatory
standards.

FULLY INSURED

Comprehensive
insurance coverage
protecting clients and
projects at every stage.

DUAL EXPERTISE

Telecom and electrical
expertise combined for
seamless, integrated
project delivery.

SCALABLE DELIVERY

Flexible capacity to scale
with project demands
while maintaining
quality and schedule.

FUTURE VISION

Expanding capabilities, forging strategic partnerships, and driving innovation across California's telecommunications and electrical infrastructure landscape.

2026

Strengthen core Telecom and Fiber Optic capabilities with advanced splicing, OTDR testing, and carrier-grade deployments.

2027

Expand Electrical division with broader DC/AC power systems, distribution projects, and C-10 licensed operations statewide.

2028

Scale Maintenance Division with proactive service contracts, rapid-response teams, and preventive infrastructure programs.

2029

Grow Data Center Services with full rack-and-stack, decommissioning, cable management, and compliance documentation offerings.

2030

Establish strategic partnerships across California — delivering innovation, quality, and long-term customer success at scale.
