

I am pleased to introduce Classic Car Finders, LLC to you. Our company is seeking to team up with an established, licensed Ohio auto dealership. Our company sells up to ten vehicles annually but we are not a licensed dealer. We would take our venture to the next level by teaming up with an existing licensed dealer and:

- Have access to two parking spots on the lot of an existing dealership
- Work with an existing sales team to augment our own sales efforts
- Secure and pay for dealer plates, insurance coverage and the ability to attend vehicle auctions
- Provide all funds to acquire our vehicles and possibly extend a line of credit to a dealership for the purchase of additional vehicles that the dealership selects for resale.

Given the extremely high process of new cars, we believe that lower mileage American sedans and luxury cars that originally sold for between \$30,000 - \$70,000 are currently undervalued. We have mechanic shops and body shops that can assist us (or possibly your dealership) with mechanical and body improvements, but our venture is simply not large enough to justify our own dealership location.

We are flexible on details and would, of course, want to be in full compliance with all laws and regulations, so if this outline has peaked your interest, please reach out to us so we can set up a time for more substantive discussions. We hope to hear from you soon!
