

CYBERWIN CASE STUDY 2024

“Libra ESG has been a game changer for our organization, allowing us to provide a comprehensive and robust email security solution safeguarding our clients against an ever-evolving threat landscape.”

David Meltz, Founder, CEO and Cloud Visionary

Cloudsphere IT

Cyberwin, specializes in distributing exclusive and innovative technology solutions. As a boutique distributor, we pride ourselves on providing access to disruptive technologies that transform businesses and industries.

Partner Overview - CloudSphere

Cloudsphere IT stands out as an innovative and progressive technology partner, with a focused specialization in cloud infrastructure and managed services. Since its inception in 2000, Cloudsphere IT has established itself as a trusted partner for businesses seeking robust and scalable solutions in the ever-evolving digital world. With a steadfast commitment to excellence, the company has carved a niche for itself by catering to a wide array of clients hailing from diverse sectors and industries, leveraging cutting-edge technology and a customer-centric approach.

The Need

As a Managed Service Provider (MSP) it is our commitment to our customer to introduce innovative technologies to ensure we continue to offer simple, powerful, and affordable solutions.

We were investigating alternative email security offerings and Libra, although a relatively unknown brand in South Africa at the time, was introduced to us by Cyberwin, the local distributor for Libraesva and a long time, trusted partner of ours.

We delved deeper into the technology with a technical demo and free 30-day POC and are thrilled with our decision. This trusted partnership and Cyberwin's endorsement instilled confidence, affirming Libra's value and our decision to deploy this email security gateway to our client base

The Solution

Libra ESG has been a game changer for our organization, allowing us to provide a comprehensive and robust email security solution safeguarding our clients against an ever-evolving threat landscape. Its user-friendly deployment and streamlined monitoring and management capabilities are particularly noteworthy, as simplicity and efficiency are paramount considerations for any new technology embraced by an MSP.

The Technical Implementation

The technical implementation of Libra was remarkably swift and seamless, we had our first O365 client onboarded within an hour, thanks to the combined efforts from Cyberwin, the local distributor and the technical team at Libraesva.

What impressed us during the implementation process were the built-in API integrations, the out of the box features, including BEC Defenses and threat remediation as well as the user-friendly interface.

Libra's performance during the POC solidified its value proposition of reliability and effectiveness. The smooth technical implementation exceeded expectations, delivering a robust email security solution.

Why we chose Libraesva ESG

We chose Libraesva for its combination of multi-tenancy, scalability, seamless platform integration, and user-friendly interface, surpassing competitors in ease of use and manageability.
