Tailored Kitchen Designs: From Large Spaces to Challenging Layouts

Our CAD kitchen designs provide a comprehensive view of your entire kitchen layout, offering an invaluable tool for all tradespersons involved. Each item on the floorplan is carefully detailed and color-coded for ease of reference:

- Stainless Steel Equipment (preparation tables, sinks, etc.)
- Cold Storage (refrigeration/freezers)
- Hot Equipment (cookers, hobs, fryers)

This detailed floorplan ensures that all aspects of the kitchen are perfectly aligned with your operational needs, making it easy for electricians, gas engineers, and plumbers to ensure power, gas, and water access is in the right place.

It's the blueprint for a seamless, efficient kitchen setup, from start to finish.

FARFRICO has provided us with amazing professional support in choosing, supplying and fitting our new industrial kitchen for the bar. Peter Mc Garry is so willing to help and advise on every aspect of the project and went out of his way to ensure we had everything we needed from start to finish. The timescales for delivery and installation were spot on, and our last-minute changes were not a problem.. the service and products they offer are second to none.. I would highly recommend the company to anyone here in Spain... As Peter is Irish, there was no language barrier, which I personally found extremely helpful.

Audrey & Barry: de barra's Irish Bar

Started working with a Peter a few months ago on design of the kitchen, he went above and beyond what was expected of him, supportive in every way he could be from sourcing specific items to late night csll if we ever had any issues he would sort it out ASAP Kitchen has been in for a few weeks now and has a great flow to the place couldn't have wished for a better outcome will definitely be recommended to others for upcoming projects and we will 100% be using his services again.
