

The Petition

To My Senators,

As an American citizen and constituent,

I write to request your support for the BURMA Act, now included in the NDAA for FY2023, that includes important measures such as humanitarian aid, advocacy for religious liberty and sanctions that penalize the junta and its leaders who have overthrown the elected government. We are grateful that the House has passed the original legislation with bi-partisan support.

Previously, our community wrote to you asking you to support the bill, which we consider important to the future of democracy in Burma. We ask this of you again.

While we understand the Senate has many priorities and interests, every day this legislation is delayed is a day where our nation has failed to support those working for democracy in Burma. I urge you, my senators, to support the BURMA Act amendment, included in the House NDAA FY2023.

I encourage the increased support and engagement with the NUG and the CRPH.

As the House NDAA FY2023 includes the BURMA Act, I request that you please write back and tell me if you have contacted the Senate Foreign Relations Committee in support of the BURMA Act being included in the Senate NDAA Fy2023.

____ I am a citizen of the United States, and 18 years or older.
