

## What is a VAD?

A ventricular assist device, or VAD, is a mechanical pump that takes over the work of a failing heart ventricle.

In the case of a BiVAD the mechanical pump is designed to help the heart function when both sides of the heart are failing.

## Why LVADANDYOU?

Our Facebook group offers live videos, healthy recipes, prayer Tuesdays, and monthly giveaways while bringing together members from around the world.

Our direct webpage offers videos of products designed to help in the daily life of a VADer.

## How do we make a difference?

LVADANDYOU.com strives to help VAD recipients, caregivers, and families lead a better quality of life.

Our Facebook group provides safe global support for those seeking knowledge, understanding, and friendship, in an uplifting and positive environment.
