## What You Need To Know About Tire Alignment

Tire alignment, also known as wheel alignment, is one of the most important services for extending the life of your tires and improving fuel efficiency. If you notice uneven tread wear on your tires, your vehicle pulling to the left or right while driving straight, or vibration in the steering wheel, have your alignment checked by a licensed service technician immediately. Aligning your car now could save you costly repairs later.

Let our ASE Certified Technicians help you with routine maintenance. Come in today and ask for our Alignment Special for \$79.95 or our Oil Change & Alignment Package for \$99 (up to 5 qts, conventional only).

## Auto Repair vs Auto Maintenance

We should all listen to Jason Statham when he says, "If you take care of the car, the car will take care of you," in *Transporter 3*. The difference between auto repair and auto maintenance can be thousands of dollars. Taking care of your car through regular maintenance can save you time and money later. Check your owner's manual for a maintenance schedule specific to your car.

## What's For Dinner? By Bethany

If you are like me, you are busy and looking for easy yet delicious ways to feed yourself or your family! Here is my go to recipe for an all purpose shredded chicken.

Add it to soups, make tacos and burritos, throw it in a salad, or just add your favorite barbecue sauce! With my family of five, I usually have enough left over for a couple of lunches!

Easy Crockpot Shredded Chicken  
([TheSaltyMarshmallow.com](http://TheSaltyMarshmallow.com))

3- 5 Pounds Boneless Skinless Chicken Breasts (About 4-6 Large)

1 Cup Chicken Broth

1 Teaspoon Salt

1 Teaspoon Pepper

1 Teaspoon Garlic Powder

1 Teaspoon Onion Powder

1. Place chicken breasts in bottom of crockpot. Pour chicken broth and seasonings over chicken.
2. Cook on low for 6-8 hours or high for 3-4 hours.
3. Remove chicken from crockpot and shred with two forks.
4. Use the chicken right away in your favorite recipes. Or, allow chicken to cool and portion into zip-top bags and freeze for up to two months.

## ASE Certified Technicians

The National Institute for Automotive Service Excellence (ASE) was founded in 1972 as a non-profit, independent organization dedicated to improving the quality of automotive service and repair through the voluntary testing and certification of automotive technicians.

ASE certifies the technical competence of individual technicians, not repair facilities. ASE tests and certifies automotive professionals in all major technical areas of repair and service. With more than 400,000 currently certified professionals, the ASE program is national in scope and has industry-wide acceptance and recognition. ASE-certified technicians and parts specialists can be found at every type of repair facility, from dealerships, service stations, and franchises to parts stores, independent garages, and even municipal fleets.

Employers with ASE-certified technicians often display the blue and white ASE sign.
