V.A.M.E.S  
LTD

Company Brochure  
June 2025

A background image showing a railway bridge under construction or maintenance. A worker in an orange safety suit and helmet is visible on the left, near a stone wall with the number '35'. A crane is positioned on the right, and the bridge structure is made of concrete and steel. The scene is illuminated by a bright light source, possibly the sun or a powerful lamp, creating a strong glow.

# VAMES LTD

## Driving Excellence in all industries and Infrastructure

At VAMES Ltd, we are at the forefront of delivering innovative, reliable, and practical solutions across a wide range of industries and infrastructure sectors. With a deep-rooted understanding of complex environments — particularly within railway and civil infrastructure — we offer a comprehensive suite of services designed to support safe, efficient, and sustainable operations.

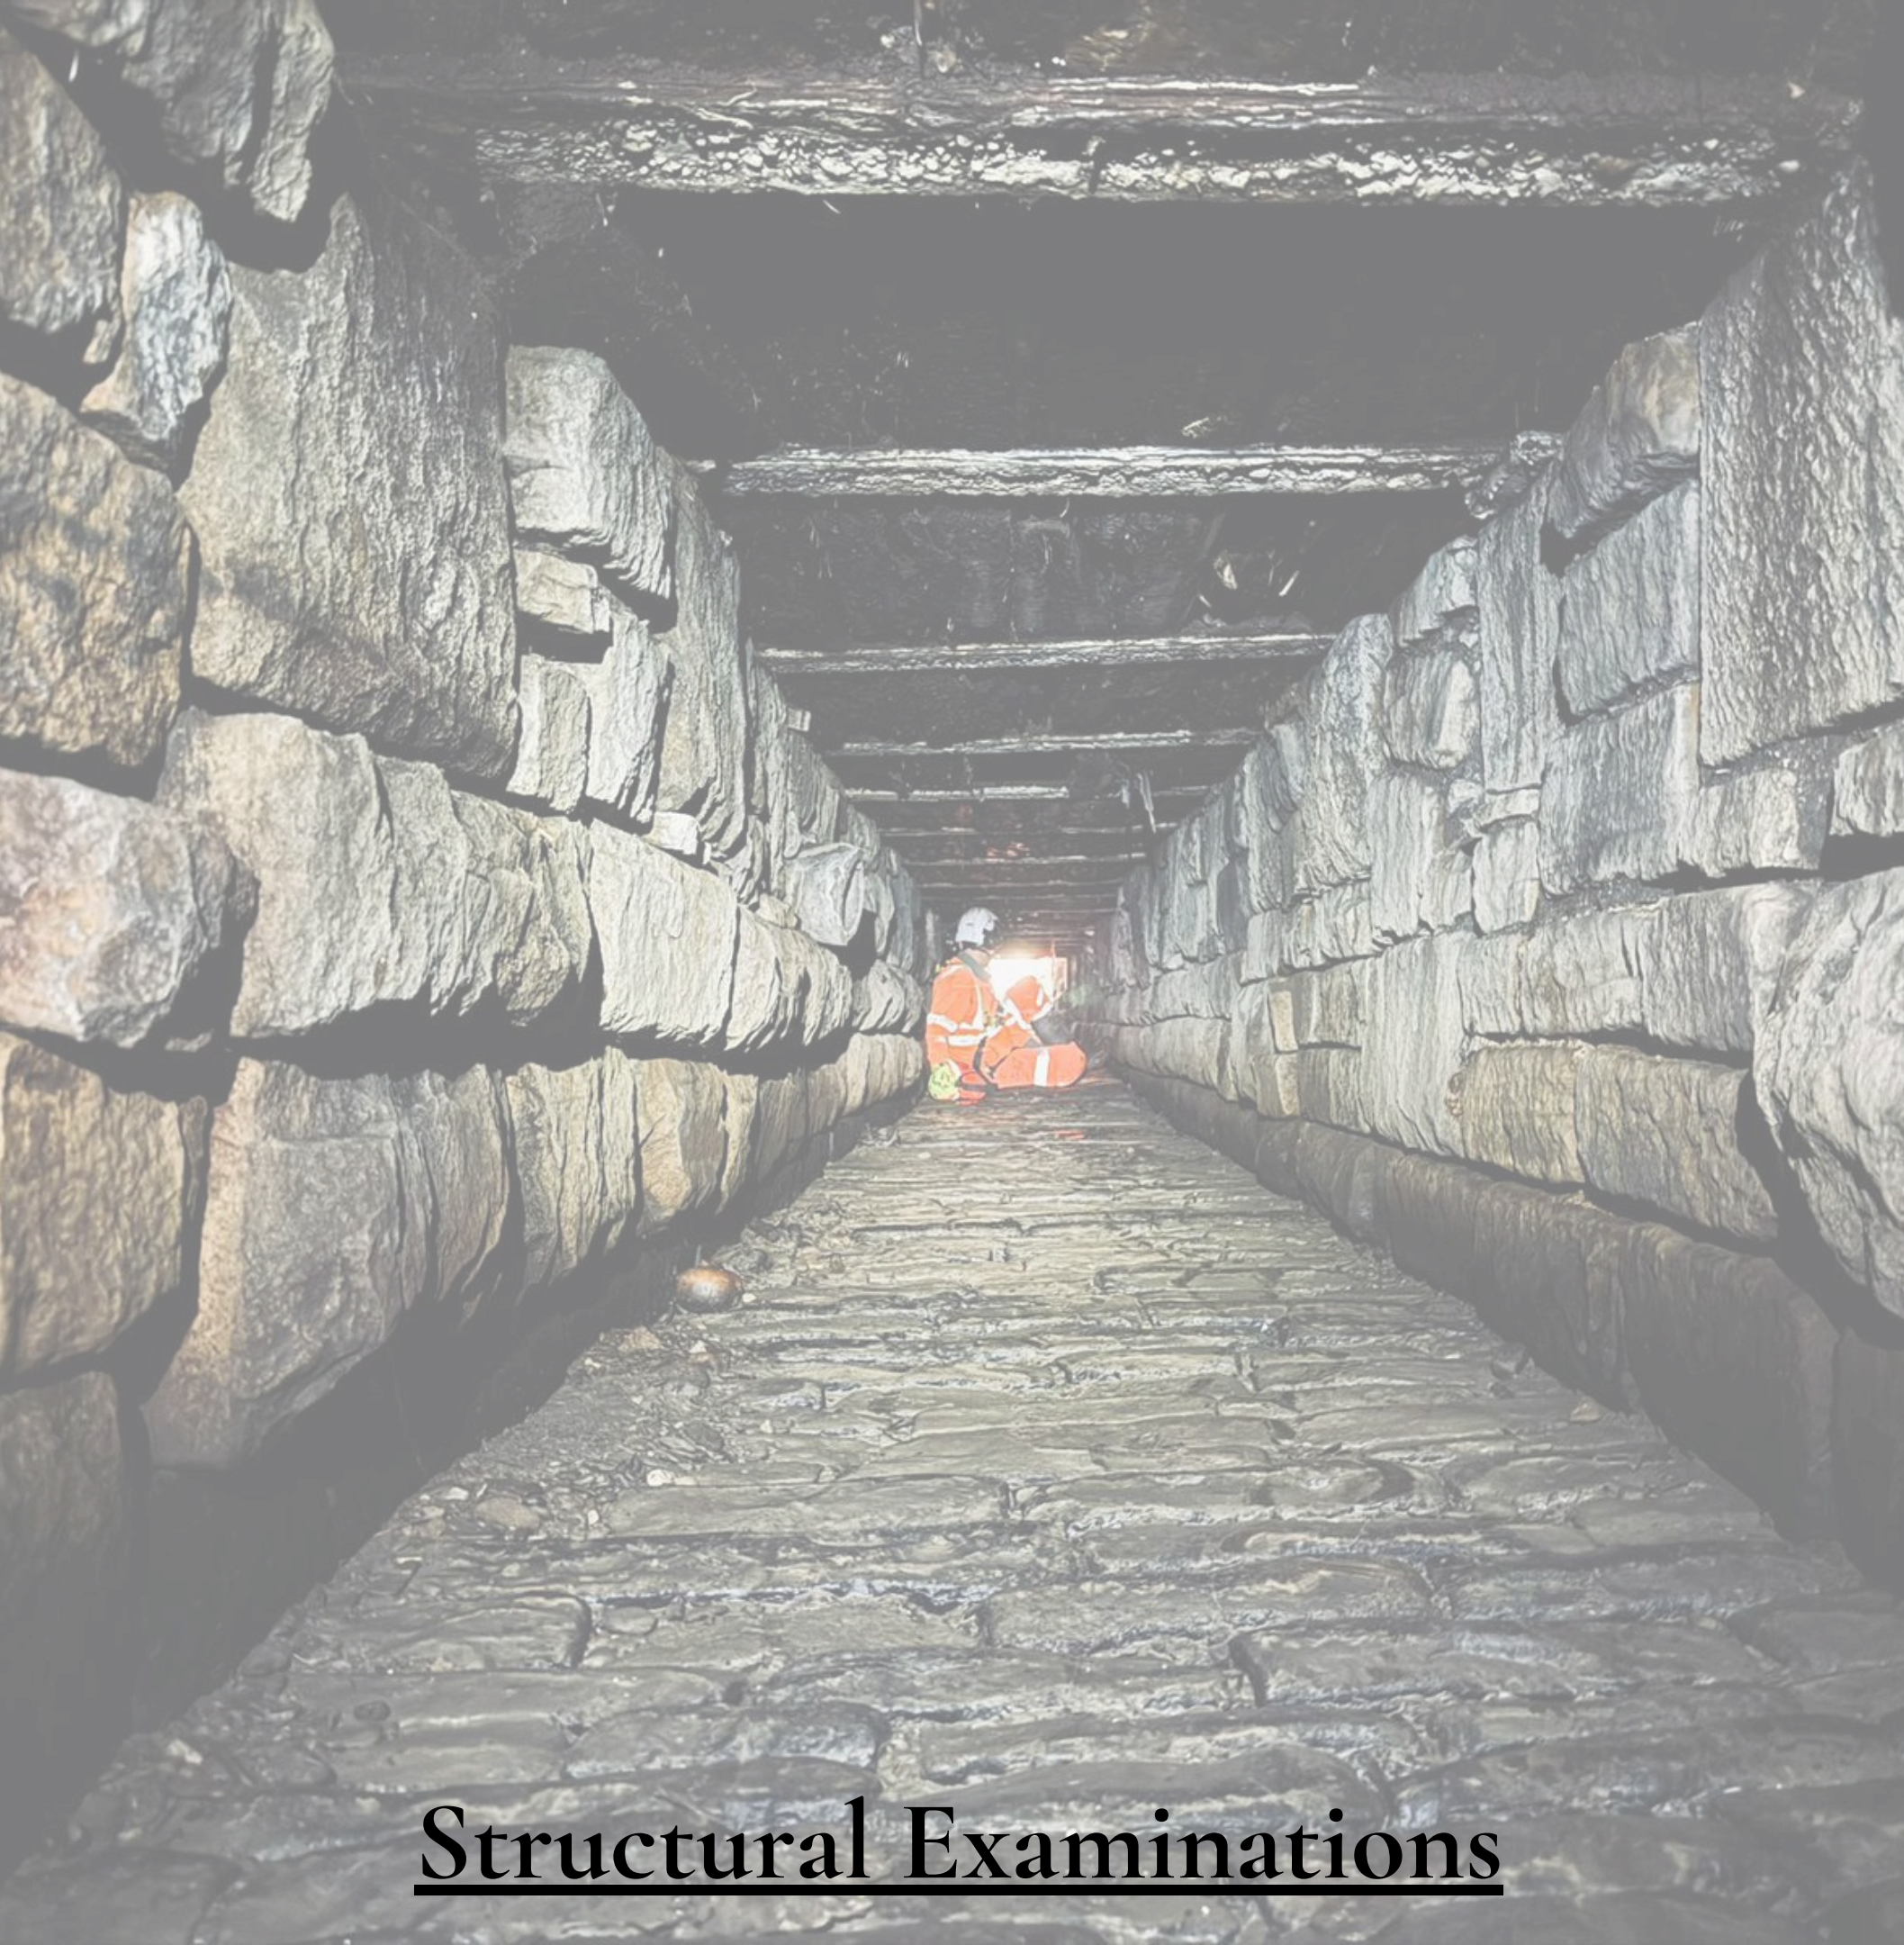

From infrastructure inspections, enabling works, and confined space entry to advanced drone surveys, site clearances, and specialist access solutions, we combine cutting-edge technology with proven industry expertise to meet the evolving challenges of modern infrastructure.

As a RISQS-audited and certified supplier, we are fully aligned with the highest industry standards — and with comprehensive insurance cover in place, our clients can be confident in the safety, compliance, and professionalism we bring to every project.

Our team of highly skilled and experienced professionals are trusted by clients across the UK to deliver a full turnkey service, ensuring quality results and peace of mind from planning through to completion. At VAMES, we don't just deliver services — we build strong, lasting partnerships through excellence and accountability.

**‘Our mission is to deliver innovative, reliable, and sustainable solutions across all industries, including rail and infrastructure. We are committed to driving progress, ensuring safety, and creating lasting value for our clients and communities’**

Structural Examinations

IRATA Rope Access

# Structural Examinations

## Infrastructure Inspections: Precision for Peak Performance

Regular inspections are vital to maintaining a safe and reliable infrastructure network. Our highly skilled teams utilise cutting-edge technology and proven methodologies to assess conditions of bridges, culverts, and other critical infrastructure.

We deliver:

- Detailed assessments to identify defects, wear, and overall condition.
- Precise results with advanced tools such as CCTV rovers and non-destructive techniques.
- Timely, actionable condition reports to guide maintenance and repair strategies.

With our thorough inspection services, we help prevent costly downtime and enhance the long-term reliability of your infrastructure operations.

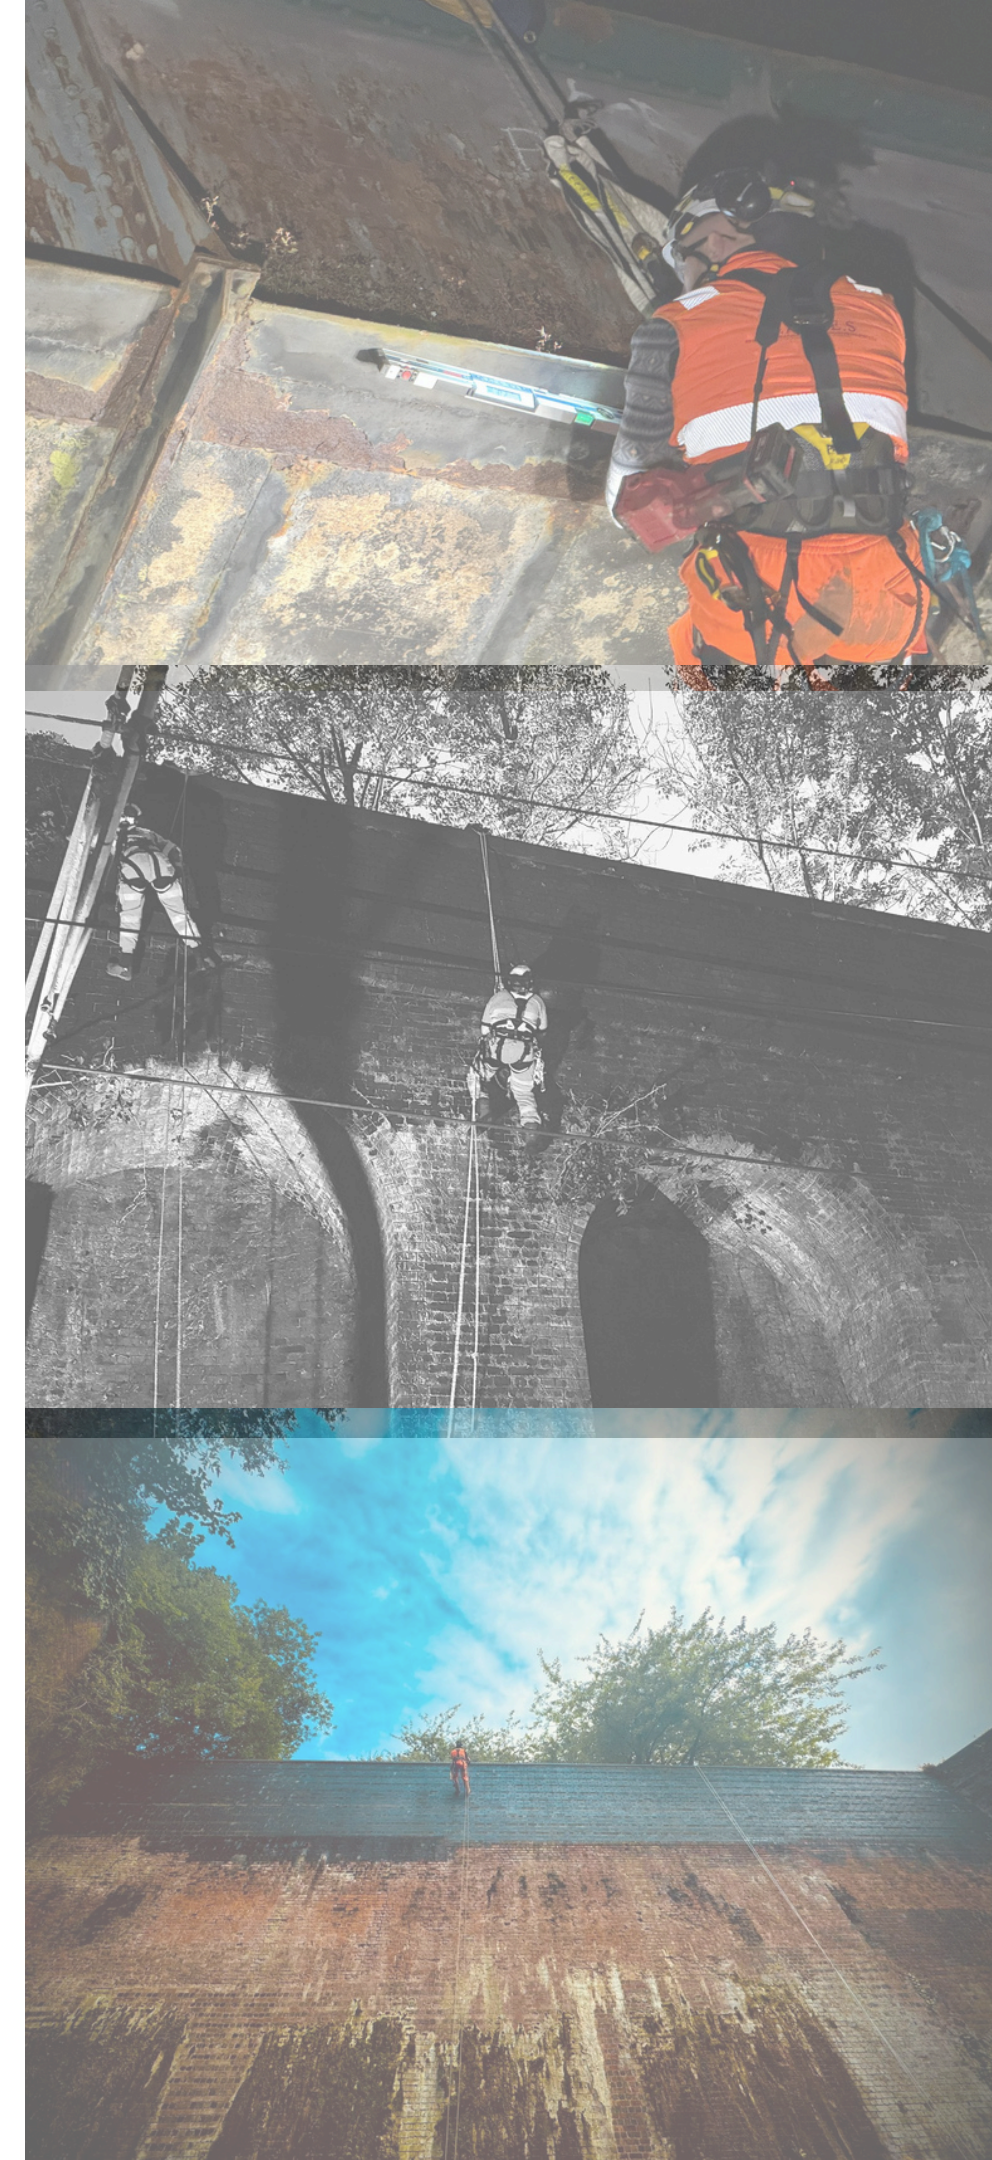

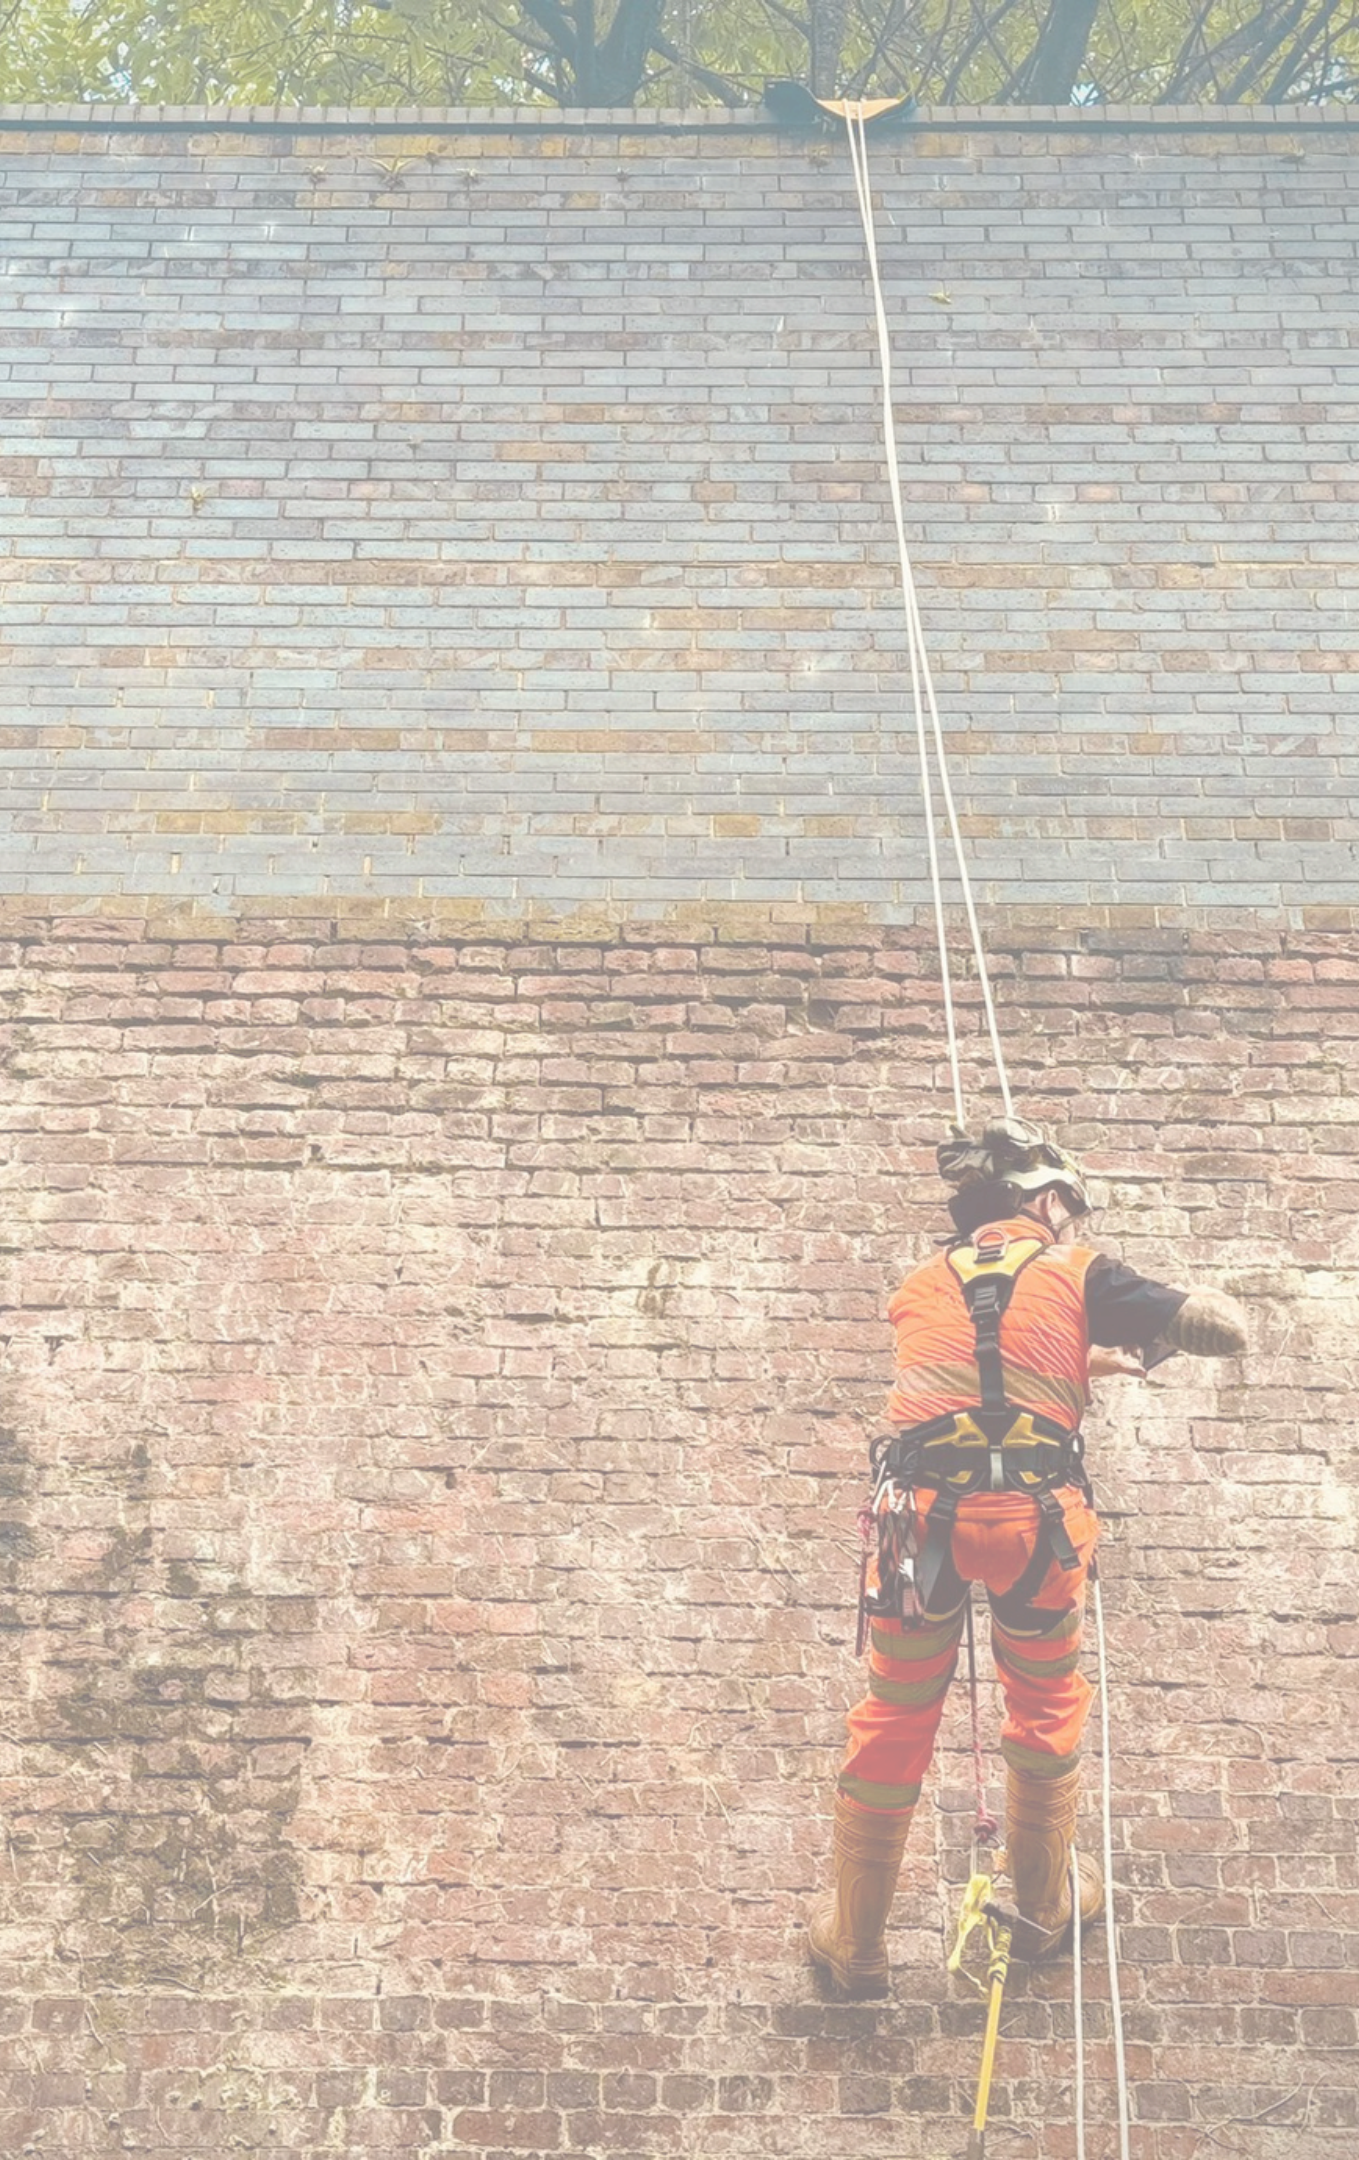

# IRATA Rope Access

## Expert IRATA Rope Access Solutions for Client Support

At VAMES LTD, safety is our top priority and our IRATA-certified rope access technicians undergo rigorous training to ensure they have the knowledge and skills to work safely at height. Our teams deliver safe, efficient and cost-effective solutions for infrastructure examinations, maintenance, repairs and enabling works.

Whether inspecting, maintaining or repairing hard-to-reach areas rope access eliminates the need for expensive scaffold or machinery. Our rope access specialists provide unrivalled flexibility and precision. Combining industry-leading expertise with the highest safety standards, we ensure your projects are completed with minimal disruption, even in the most challenging environments.

# Boat & Pontoon Services

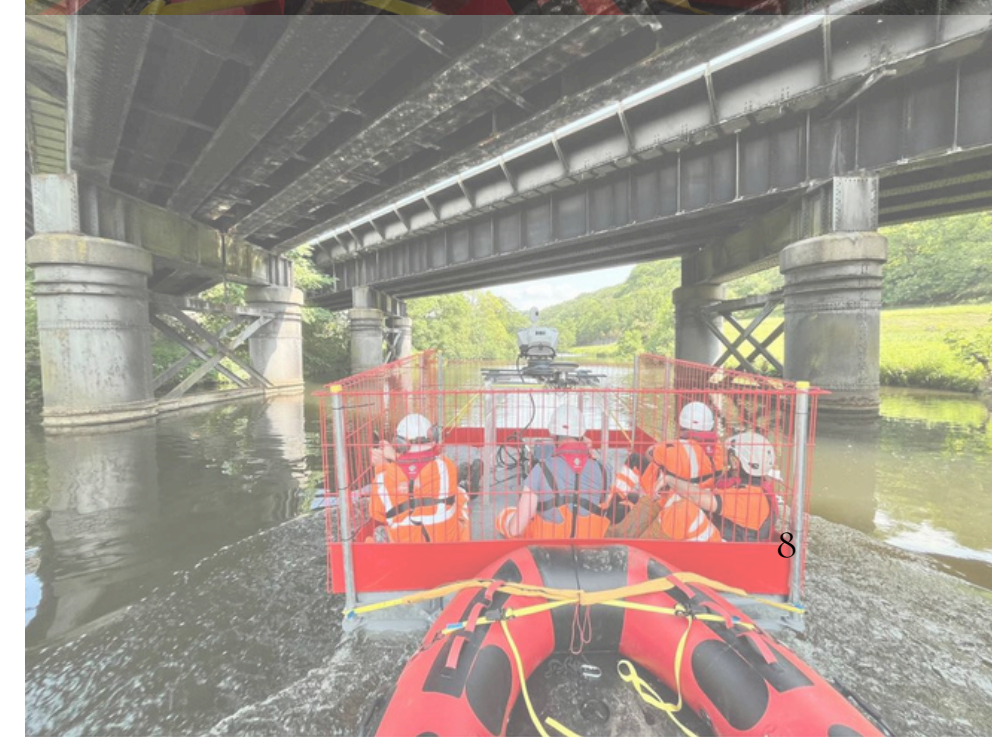

# Boat & Pontoon

We are now providing Safety Boat and Pontoon Services to support inspections, surveying, maintenance, and enabling works in water-based environments. Our Safety Boat Services are operated by RYA-certified pilots and DEFRA-trained rescue professionals, ensuring secure and efficient operations on the water. For access to hard-to-reach areas, our Pontoon Services offer stable and reliable platforms that enhance safety and accessibility. Our team includes PASMA-trained staff who are qualified to safely assemble mobile access towers for any access to work at height whilst on the water.

Our fully equipped vessels and modular pontoon systems provide a safe, stable, and flexible platform for carrying out works on rivers, canals and other watercourses.

We also assist with regulatory compliance when required, to obtain necessary permits from the Canal & River Trust (CRT) and the Environment Agency (EA).

Enabling Works

Industry Experience

# Enabling Works

## Enabling Works: Laying the Groundwork for Success

Our enabling works services provide the foundation for rail and construction and upgrades. We collaborate closely with clients to deliver:

- Groundworks and preparation for track or site installation or repairs.
- Vegetation management, debris removal, and material disposal.
- Prioritising safety, compliance and minimal disruption

Every project benefits from our proactive approach, ensuring all prerequisites are completed smoothly, reducing risk, and accelerating timelines. Whether for rail, road, or infrastructure developments, we ensure your site is ready for the next phase.

# Industry Experience

At VAMES Limited, our dynamic team brings a wealth of experience across a diverse range of industries. Our expertise spans:

- Agriculture
- Construction
- Drainage
- Facilities Management
- Highways
- Infrastructure Services
- Land Development
- Power
- Renewable Power
- Renovation
- Telecoms

This extensive industry knowledge enables us to offer comprehensive services tailored to meet the unique needs of any project. Whether you require assistance in a specific sector or a multifaceted approach, VAMES Limited is equipped to deliver exceptional results.

Trust us to provide the professional support and innovative solutions your business needs to thrive.

VAMES CCTV Rover

Drone Surveys

# VAMES CCTV Rover

## CCTV Examinations: Eyes on the Details

This cutting-edge technology is designed to take our inspection capabilities to the next level, offering precision, efficiency, and durability in even the most challenging environments. Whether it's pipeline assessments or confined space inspections, our Crawler Unit provides high-quality footage, giving us the ability to identify and report issues faster than ever before.

### *Key Features:*

- Advanced 4K CCTV for crystal clear imaging
- Designed for tough terrains and confined spaces
- Real-time footage & data capture for instant analysis
- Increased mobility for complex inspections, including floatation capabilities
- Removing the need to put humans in confined spaces

# Drone Surveys

Enhancing and assisting your work with aerial precision

Harnessing the power of drone technology, we deliver accurate, high-resolution data to support rail infrastructure planning and maintenance also drones provide:

- **Safety:** Drones enable thorough inspections whilst ensuring complete safety for all personnel
- **In-depth analysis:** Aerial inspections of areas at height and areas unreachable by foot.
- **Rapid Response:** Using drones for urgent tasks can address areas requiring immediate attention
- **Uninterrupted Operations:** Gaining comprehensive elevation and aerial perspectives without interfering with normal movement.

Drone surveys save time, reduce risks to personnel, and provide unparalleled clarity in decision-making.
