

Everyone is needed:

- We have experienced the most extraordinary weeks in British Political History which ended with a total collapse of the Johnson governments attempt to silence Parliament.
- The Governments attempt to negotiate a solution to the "back-stop" seems to inflame rather than solve the problem because Johnson is only interested in the tactical alliance with the DUP - not the "Good Friday"-Agreement and the people of Northern Ireland (who vote Remain).
- The sitting Government do not command the majority of the Parliament, and they are therefore not seen as trustworthy representatives by EU.
- **That means we have to create a situation where the People are heard. The people have to show their view - and that will be respected by the EU as well.** (They have expressed that).
- *We have to show that this claim has legitimacy by making the manifestation on 19 October (The March) as powerful as possible.*
- **Bring friends and family members, neighbours and acquaintants who support the claim of a peoples Vote to the March.**
