

CAPABILITY STATEMENT

JOHNSON CONSULTING SERVICES LLC

MISSION STATEMENT

The mission of Johnson Consulting Services LLC is to deliver professional consulting services that produce positive results and exceed expectations.

COMPANY DATA

Johnson Consulting Services LLC is headquartered in Detroit, Michigan and has been in operation since January 2020.

PAST PERFORMANCE

- Professional business and financial/education consultations with small businesses and families across the U.S.
- Information science research and analysis of international and national information regulations, laws, and policies at a leading academic research institution.
- Over six years combined Tier 1 & 2 computer helpdesk experiences at a multinational company and a national law firm.
- Financial audit foresight, oversight, and insight (integrity, oversight, and analysis) as an IT Auditor and contributor at the supreme audit institution of the U.S. government

CORE COMPETENCIES

DIFFERENTIATORS

- Ability to provide value to disparate, common data, and Big Data sets such as the lifecycle documentation of information flows through the lens of data governance and management (e.g. HL7 and NIEM) to incorporate privacy controls (e.g. HIPAA); security controls (e.g. FISMA and FISCAM); and, information sharing and data exchanges (e.g. sharing agreements) with a focus on confidentiality, integrity, and availability.
- Creative analytical insight and demonstrated ability to apply business acumen and technical background to a variety of management challenges including data curation (i.e. usage, collection, analysis, and storage).
- Committed, and award-winning public service experiences (AmeriCorps, federal, state, and local awards).
- My company has a passion for community development and working with and in diverse communities. Detailed, analytical work using technology and applied management to solve challenging problems is enjoyable work. Background as a systems analyst, social science researcher, manager, information systems analyst, application support specialist, program associate, computer instructor, IT auditor, grant writer, community

advocate/warrior, and STEM /business school scholar across private sector, academia, and public sector work. Principal is an information scientist who loves to solve problems creatively.
