

ONE FACE

SPECIALIZED TRAINING FOR LAW ENFORCEMENT

UNMASKING HIDDEN FACIAL EXPRESSIONS

This class was designed to provide law enforcement with the tools to perform an aspect of policing that is severely lacking: recognizing facial expressions. Course content is based on science and the research of Dr. Paul Ekman. The course will teach officers how to recognize the 7 universal emotions found in micro-facial expressions and subtle facial expressions. Attendees will learn how to recognize facial expressions that flash on the face for only 1/25 to 1/2 second.

The instructor, Sean Grogan, is a police officer and canine handler in his 12th year in the state of New Jersey with almost 7 years experience as a narcotics detective. Sean Grogan is the first and currently the only law enforcement officer in the United States that is a licensed Paul Ekman Associate. This type of training can easily cost upwards of \$1,000.00 a day, however, Sean Grogan offers this training at a fraction of the cost to fellow law enforcement.

Some of the benefits of facial expression recognition for law enforcement:

- Improve Interview skills
 - Enhance officer safety
- Increase ability to recognize truthfulness
- Ability to articulate description of facial expressions for reports
 - Enhance communication with the public
