

# Magical Motors

EST. 2021

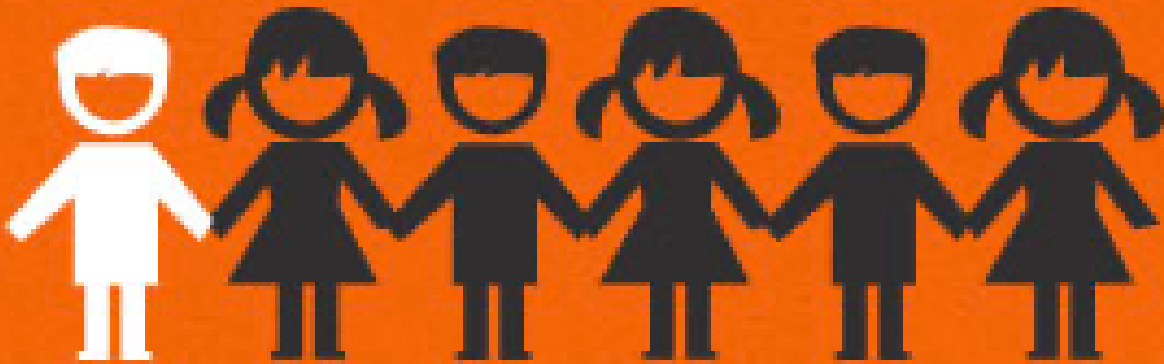

## Our Mission

We believe that every child deserves the right to mobility. We build assistive technologies for children with developmental disabilities, and creating a cost-and-time effective solution to electric wheelchairs.

# The Issue

According to the CDC, **1 in 6 children** in the US have a developmental disability, inhibiting them from movement.

However, pediatric power wheelchairs cost **upwards of \$25,000** and take up to **5 years** to receive (University of Delaware).

# Our Solution

We buy ride-on toy cars and modify them so children can control them with the push of a button, as opposed to a foot pedal.

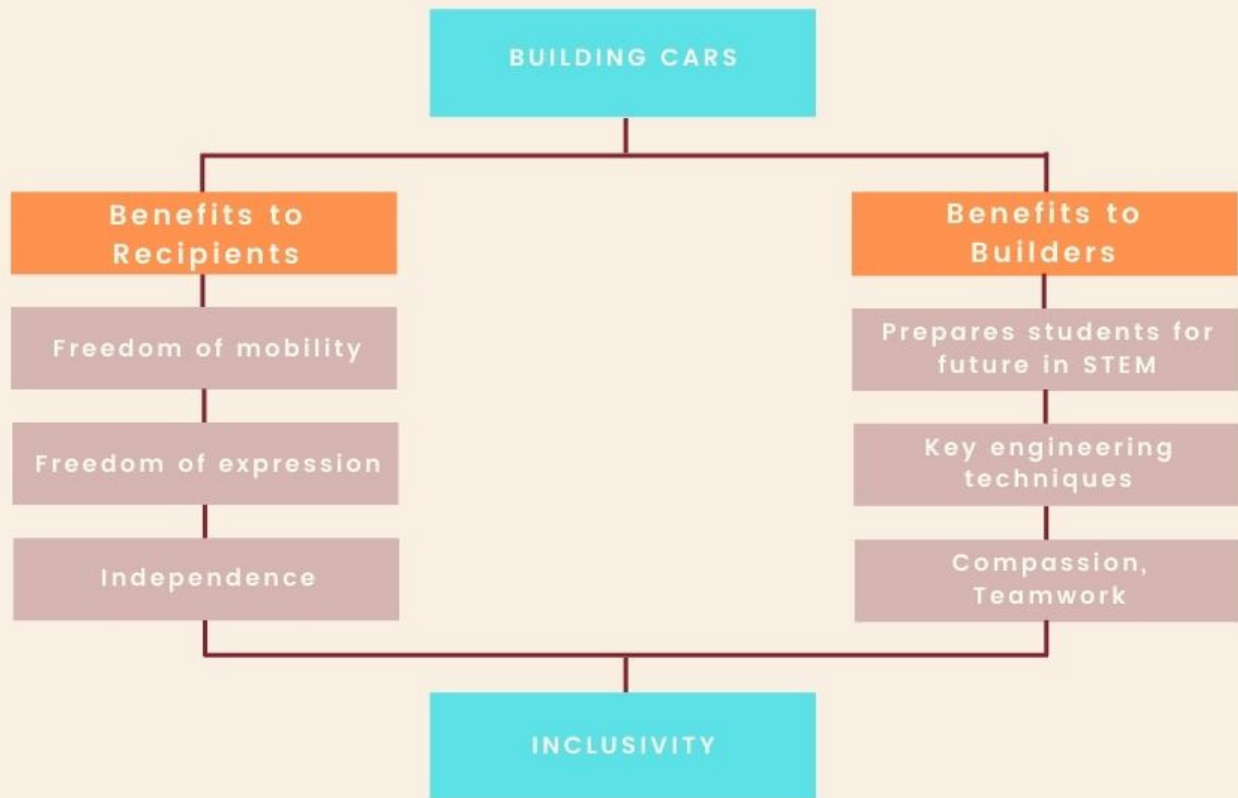

## CURRENT FOCUS

MAGICAL MOTORS

## Appropriate Language

**Stylized:** Magical Motors

**Website stylized:** [magicalmotors.org](http://magicalmotors.org)

**What we do:** Every child deserves the right to mobility, but alternatives to already inconvenient electric wheelchairs are rare. That's where we come in. We build assistive technologies for children with developmental disabilities.
