BIG GIG SOUND | SMALL GIG VIBE

BROCHURE

Why Pick Crash audio?

If you are Looking to make your next event sound and look incredible? Crash Audio is your go-to boutique audio and lighting partner based in the North West of the UK. Since 2010, We have been elevating live experiences — from grassroots gigs to major community events like Bolton Food & Drink Festival, Ironman UK, Christmas light switch-ons, and more — with professional PA hire, bespoke sound systems, and dynamic lighting setups designed around your event vision.

What makes Crash Audio different? We take a one-event-per-day approach, meaning your show gets undivided attention and precision from setup through to the final encore. Whether you're planning an intimate pub night, a full festival set, or something in between, We offer reliable, high-quality audio equipment and lighting that enhances every moment — not just fills the room.

We are passionate about delivering clean, powerful sound and lighting that works with your performance, not against it. From top-tier speaker systems and consoles to tailored lighting rigs that bring atmosphere and energy, Crash Audio helps make every event feel expertly produced.

Audio Rental

At Crash Audio, the tech is never an afterthought, it is the backbone of the show. We run a professional, scalable PA inventory built around high-performance RCF HDL-26A line array systems paired with Sub 8008AS low end for serious punch, alongside flexible EV EKX setups for tighter rooms and corporate spaces. Control is handled via industry-proven digital desks like the Behringer Wing and X32, supported by Midas DL32 and S16 stage boxes for clean, reliable signal flow and tidy stage management. From pristine vocal clarity to chest-tightening kick drums, everything is deployed with precision, tuned to the room, and engineered to feel powerful without ever being harsh. Whether it is a grassroots venue, festival stage, or theatre environment, the goal is always the same: controlled, musical, professional sound that translates from the front row to the back wall without compromise.

Lighting Rental

Lighting is where an event stops being a gig and starts being an experience, and that is exactly how we approach it at Crash Audio. We design scalable lighting packages that suit the space, the audience and the atmosphere you want to create, from clean architectural washes for corporate and community events to bold, dynamic rigs for live bands and festivals. Using modern LED fixtures, moving heads, atmospheric effects and intelligent control, we shape the room, highlight the performance and elevate the energy without overpowering it. Everything is programmed and operated with the same care as our audio, balanced, intentional and tailored to your brief. Clients choose Crash Audio because we do not just drop lights in a room, we design a look, run it professionally, and make sure your event feels polished, cohesive and genuinely memorable from the first cue to the final blackout.

Big Venue Bigger Sound – Festivals and Theatre

We offer scalable sound systems suitable for everything from intimate theatre performances to multi-band festival stages, with clear, controlled coverage that translates across both indoor and outdoor spaces. Our equipment is maintained to a high standard and deployed by engineers who are comfortable working to production schedules, technical riders, and venue constraints.

Small Gig Vibe Big Gig Sound – Grass Roots Events

Crash Audio is proud to support grass roots music and smaller live events, providing professional sound and production without losing the character or intimacy that makes these shows special.

From local band nights and independent promoters to small festivals, community events, and one-off showcases, we tailor our systems to the room, the lineup, and the budget. The focus is always on clear sound, reliable equipment, and a relaxed, supportive working environment

Efficient and Invisible – Corporate Events

Crash Audio provides reliable, professional audio solutions for corporate events, ensuring clear communication and a polished production from start to finish.

From conferences and presentations to award ceremonies, product launches, and private functions, we understand that corporate events demand clarity, consistency, and discretion. Our focus is on making sure every speaker is heard clearly, every cue runs smoothly, and the technical side never becomes a distraction.

Other services we offer

Tour Support

From advance planning to load-out, Crash Audio provides reliable, tour-ready audio and lighting support that keeps your show consistent, tight and stress-free night after night.

Tech Spec Creation

Detailed, transparent tech specs available on request so promoters, venues and production teams know exactly what is arriving on site and how it integrates seamlessly into their setup.

Event Planning

From first enquiry to final cue, Crash Audio works alongside you on logistics, layout and production planning to ensure your event runs smoothly, safely and exactly as envisioned.

Crew

Experienced, friendly and professional crew on hand to deliver, set up, operate and strike your event efficiently, ensuring everything runs smoothly from first cable to final pack-down.

Event Promotion

Through Crash Audio Promotions, we also support your event marketing, helping drive attendance and build buzz so your show not only sounds great but fills the room too.

The Bottom Line

All out packages come with an engineer to set up, take down and run the equipment throughout the event

Audio

Our packages start from £250 for grassroots events. This typically includes our EV EKX PA system, up to three monitor wedges, and a Wi-Fi controlled mixer.

For larger events, we tailor the system to suit your specific requirements, ensuring you only pay for the equipment and support you actually need.

Lighting

Starting at £250 for smaller still set ups that are not managed but again we will tailor our offerings to your needs

Our Commitment to Grass Roots events

Grassroots music events are the heartbeat of the industry, and at Crash Audio we are proud to support them at every level. These shows are where new artists cut their teeth, where communities gather, and where real culture is built from the ground up. For us it is not just another booking, it is an investment in the future of live music. By providing professional sound and lighting to smaller venues and emerging bands, we help create an environment where performers can shine and audiences can truly connect. Grassroots events matter not only to us as a company, but to the wider music scene, because today's small stage is tomorrow's headline act.

Have we convinced you to go with us either way get in touch or check out our site or socials
