Ms. Fegley

Family and Consumer Sciences

6th Grade:

Life skills and resource management; nutrition and wellness

7th Grade:

Life skills and management; Human development and relationships

8th Grade:

Human development and relationships; financial literacy; career planning and continued education

Fun Ways We Apply Our Knowledge:

6th Grade: Food Safety, Food-Borne Illness, and Wellness Issues

Nutrition and Wellness

Research and present on different food safety techniques, food-borne illnesses and their effects, or wellness issues like dietary restrictions or health concerns in relation to food. We will be hosting presentations to teach our classmates about our information.

7th Grade: Caring for Resources

Life Skills and Management

Learn how to read care instructions, how to store and repair household items, and the importance of taking care of your things! We will be learning basic tasks like sewing, decoding care labels, understanding settings of different appliances, etc.

8th Grade: Caring for Children and Others; Quality Friendships

Human Development and Relationships

Role play scenarios where students can experience different relationship issues like conflict, difference of opinion, peer pressure, etc., as well as role play effective ways to care for children and others, including the discussion of appropriate meals, toys, supervision, etc.
