

Environmental Policy

Top Lift Scaffolding Services Ltd is committed to protecting the environment through the continued improvement of its environmental performance by minimising our environmental impact, making resource efficiency, development, implementation and monitoring of all Environmental activities.

Our business activities include the supply, installation, and decommissioning of scaffolding for domestic, commercial, and new building sectors.

Top Lift Scaffolding Services do not carry out works that produce waste materials and we do not use hazardous materials or plant/machinery on site that would use lubricants or fuels.

Our policy is to:

- Ensure the workers of Top Lift Scaffolding Services Ltd act in accordance and comply with this policy.
- Provide full and comprehensive training for all personnel in the handling of all hazardous substances where required, as well as observe all manufacturers and suppliers' instructions.
- Carry out in-house COSHH assessments
- Implement procedures to detect and where possible prevent excessive noise pollution and pollution through emissions, where required.
- Continually improve our environmental performance.
- Reduce waste.
- Reduce consumption of resources and ensure unavoidable waste is recycled, rescued, or recovered, where possible, or dispose of responsibly.
- Monitor and reduce the impact of our activities on the local and general environment.
- Seek good practice by others.
- Comply with the relevant Legislation and Regulations.

This policy will be reviewed every 12 months to ensure any changes to our organisation, scope of operations and working arrangements to ensure our continued adherence to our commitment.
