

Optical Illusion Dinosaur

How to build:

1. Carefully cut out the entire shape along the edges.
2. Fold BACK along the dotted lines on the orange base so your figure can stand.
3. Fold FORWARD along the dotted lines on the face (the face should look CONCAVE like it's been pushed in.)
4. Use glue stick or clear tape to stick your model together.

How to see the Illusion

1. Close one eye
2. Stare at the model for ten seconds
3. Now move the figure slowly and watch as it appears to move its head to follow you!
