Make your own board game Instructions:

Print out the game pieces sheet, and the two board sheets. Color and cut out your game pieces as directed and design your game however you'd like it to be played!

You could simply color in the squares and make it a race to the finish, or you can write instructions in each square for silly tasks or consequences like "go back 2 spaces" or "lose a turn". Tape the two sheets together to make a full board.

Make it a family project and have everyone decide what to write in the squares, then play the game together to test it out.

The two blank squares can be for cards you create or you can draw an epic volcano or any other scene you can think of!

If you post a picture of your game or a video of how it's played please tag **@ModdyPuppets** and use the hashtag **#AlexasDinosaurClub**
