Roadmap into the Future

Roadmap into the Future

NETWORK

Network was established in 1992 when the process of Project Management was still in infancy and services in civil structures were minimal. Today with a multitude of service involved in Building and civil construction it is impossible to do without a project management team whether in house or outsourced

Network offers a bouquet of comprehensive project management services. Establishing scope and viability, working through budgets, schedules and team requirements, and process implementation and ongoing evaluation, we ensure you achieve your goals.:

'The single best payoff in terms of project success comes from having good project definition and a well managed project'

Network is led by Mr. Pranav Jayaram a project professional with 20 plus years in the Project Management industry. Our dedicated team of professional and associates ensure that you are able to achieve your project goals and tally your mission statements.

Network has been a project management leader and is also the first to offer tailor made services to the industry including remote project management, Documentary services, small and medium project management and audit services.

Project Management Services

The general PMO focuses on general services and seeks to standardize project management methodology, processes and tools by making them available. Network provides a variety of specialized and general services under the service.

General Project Management

- Overall project budgeting, scheduling, planning, risk management and goal setting
- Feasibility studies and analysis
- Selection of project team members (contractor, designer and consultants)
- Total quality management (quality control and quality assurance)
- Author and issue any required requests for proposals or requests for qualifications
- Budget development and management
- Partnering planning for continual teamwork
- Cash flow projections
- Estimating cost consultancy
- Contract administration and insurance coverage
- Daily, weekly and monthly reports and meetings
- Design management
- Permitting and approvals
- Value engineering
- Procurement management
- Construction management
- Project closeout and warranty management

NETWORK

Strategic Project Management

The focus of our Strategic Project Management Services is to assist our customer in delivering the business strategy through exceptional planning, execution and governance of projects and programs. Strategic project management ensures the management of projects in such a way as to develop competencies and capabilities, which contribute to the project's sustainable competitive advantage. Often Projects lose their strategic perspective and get involved in routine activity thereby leading to loss of the project goal and mission. Services include

Strategic Planning Statements

Project Review

Mission Review

Systems Review

Strategic Controls

Project Audit Services

Project Audit is a very wide term and does not only involve Quality as is normally understood. Project Audits encompass

- a) Schedule Audits
- b) Resource Audits
- c) Strategic/Missions Audits
- d) Quality Audit
- e) Commercial Audits

A Project Audit is an independent third party view of what is happening in your project at any point in time

Audit Services & Areas addressed

- Project Management & Processes
- Project Structures & Resources
- Project Reporting
- Infrastructure
- Quality of Delivery (Measures)

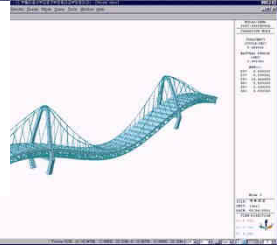

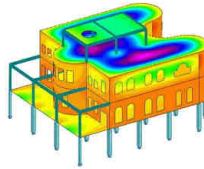

Project Audit Stages

- Project Startup
