

3 SERVICES

TO SOLVE WATER AND TRADE EFFLUENT PROBLEMS

We work with businesses in all areas of the economy to reduce trade effluent and water costs, comply with effluent discharge consents, get more value from their data and improve operational efficiency

REDUCING TRADE EFFLUENT COSTS

Our audits pinpoint how & where trade effluent costs can be reduced. We specialise in reducing costs through simple operational changes first. When something more complex is needed, we will identify the most appropriate treatment processes & provide outline designs & costs. We'll also work with you to segregate effluent streams where possible

1

TRADE EFFLUENT COMPLIANCE

Our extensive experience of trade effluent treatment helps our clients to guarantee consistent compliance with trade effluent discharge consents

2

GET MORE VALUE FROM YOUR DATA

Our data analysis service, linked to our process expertise, helps clients to really understand cause-and-effect relationships in their manufacturing and effluent treatment processes. This improves manufacturing efficiency, reduces costs and provides a rigorous basis for process control and operations
