

THE BENEFITS OF OUR SERVICES

Finding the right trade effluent solutions

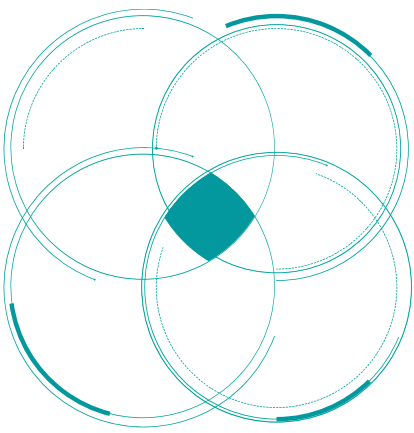

1 SIMPLE ANSWERS FIRST

Trade effluent solutions do not always need investment in new treatment plant. Our site audits help clients to understand where they can improve effluent management to solve problems

2 ANALYSE DATA WISELY

Our detailed data analysis procedures help clients to improve their understanding of effluent production and management. This puts in place firm & meaningful foundations for investment decisions.

3 KNOW YOUR OPTIONS

Effluent treatment can be a significant investment. Our approach to optioneering ensures all viable treatment choices are evaluated fully. This means that the client can make significant decisions armed with detailed & accurate information.

4 UNDERSTAND RISKS

Clients need to know that the chosen solution is right for them. We use advanced calculation methods to understand the limits of engineering solutions and ensure equipment is sized correctly.

5 PROJECT MANAGEMENT

We can manage the whole effluent auditing and optioneering process from an initial conversation through to implementation of the chosen solution. This frees clients to concentrate on their core business
