

# CHEMICAL INDUSTRY

## EFFLUENT AUDITS

Our effluent audits help clients in the chemical industries in many ways

Reduce trade effluent costs

Guarantee discharge consent compliance

Eradicate contamination at source

Optimise existing treatment systems

Choose the right effluent solution

Design and specify effluent treatment plant

Prioritise expenditure

Segregate effluent streams & recover resources

Recycle and reuse effluent

50%

Reduction in effluent costs after we audited effluent systems for a client

100%

Compliance with an effluent consent following one of our audits

Blackwell Water Consultancy has been working with chemical industry clients since 2009 on a wide range of effluent-related projects. We're independent, impartial and will always deliver the solution your site needs.

We specialise in making sure our clients explore every opportunity to reduce costs and guarantee compliance without capital expenditure. Where new plant is needed, we make sure it's the right equipment for your long-term operational needs.
