

HIPAA & Privacy

ELEVARE Lab Solutions is committed to protecting the confidentiality and security of information entrusted to us by our clients.

Our services are primarily focused on operational support, procurement, purchasing, vendor management, and process improvement. We do not require access to patient medical records or protected health information (PHI) to provide our services.

When our work requires us to handle confidential business information or information that may be subject to privacy requirements, we take reasonable measures to protect that information and limit access to what is necessary to perform the agreed services.

ELEVARE respects the privacy and security requirements applicable to each client and will work with healthcare organizations to establish appropriate safeguards and agreements when required based on the nature and scope of the services provided.

ELEVARE does not request, collect, or store patient medical records or protected health information through this website.

Questions
