

EnviroWare®

Takeaway food packaging
from natural sustainable
& renewable resources

available from

Aurora Eco Products Ltd

www.aurora-eco.co.uk

Our Natural Materials

Plant Starch PLA

Manufactured by NatureWorks LLC, Ingeo PLA (Polylactic Acid) is a biopolymer derived entirely from plant resources. The polymer is made from simple plant starch from abundant feedstocks such as corn. The end result is a PLA cup or piece of cutlery which performs comparatively to those made from traditional petrochemical based plastics.

Products include:

Cold Drink Cups & Lids
Combination Pots
Deli / Salad Containers & Lids
Portion Pots & Lids

Paper

Paper is a versatile material and especially appealing when it comes from sustainable FSC®(Forest Stewardship Council®C113967) certified sources. We now have a wide range of paper products in white or kraft coloured FSC®paper.

Products include:

Paper Hot Drink Cups
Paper Food Containers
Kraft Paper Food Trays
Naturals Heavyweight Plates
Paper Portion Pots
Paper Cutlery
EcoTensil®EcoTaster Spoons Paper Straws

Wood

Our supplier are FSC®(Forest Stewardship Council®C113967) certified and we ensure our wooden products are sourced from sustainable sources.

Products include:

Wooden Cutlery (including wrapped options)
Drinks Stirrers
Skewers

Bagasse

Bagasse is made from natural non-wood fibres, deriving from fast growing plants such as sugarcane.

Products include:

Plates, Platters, Bowls & Trays
Compostable Food Boxes
Portion Pots
Cutlery

Palm Leaves

Produced in India, Palm Leaf plates and platters are made from discarded leaves from the Adaka nut palm. The leaves are collected, cleaned and then mechanically pressed in a mould at 120°C; no additional treatments are required. Each individual item has its own unique pattern and structure.

Products include:

Plates, Platters & Bowls

Food & Drink packaging made from natural, sustainable & renewable resources

The EnviroWare® range was launched in 2007 as a solution for customers wanting sustainable takeaway packaging. EnviroWare® food & drink packaging is made from natural raw materials. Once the packaging has been used, most can be commercially composted (meeting the EN13432 composting standard).

Our suppliers are members of the Foodservice Packaging Association and certified by BRC (British Retail Consortium), ISO 9001 quality management and ISO 14001 environmental management systems.

Most EnviroWare® paper and wooden products are FSC® (Forest Stewardship Council®) certified (FSC® C113967), demonstrating commitment to using sustainable materials, from a responsible source. Look out for FSC® certified products throughout the EnviroWare® brochure.

Our suppliers hold the following accreditations:

Our Environment : Less fossil fuels

Oil is a finite resource, as such society is placing a greater importance on moving away from a dependency on oil based packaging. EnviroWare® foodservice disposables help to meet this need...

Packaging returned to the ground as compost

Commercial composting of EnviroWare® products, produces compost which can be used as a fertiliser for growing new plants and crops.

Disposal

Disposal options for EnviroWare® products include:
Commercial Composting,
Incineration (with scope for energy recovery)
and Recycling.

Science & Technology

Natural materials are turned into high quality food service disposables.

Environment

Less fossil fuel is used in production.

Climate

Potential to reduce CO2 emissions.

Contents

PLA Cold Drink Cups	04-06
Paper Straws	07
Paper Hot Drink Cups & Accessories	08-10
Portion Pots	11-13
Round Paper Food / Soup Containers & Lids	14-17

PLA Cups & Lids

PLA Cold Drink Cups & Lids are an eco-friendly alternative to other petro-chemical derived products, which degrade very slowly. Clear PLA cold drink cups function and look like traditional plastic cups offering the benefits of high clarity and strength. Available in a range of sizes with various types of lid; flat and domed, with or without a straw slot.

Bagasse Plates, Platters & Bowls

Bagasse dinnerware is natural white / cream in colour. The range provides an alternative to traditional paper plates and bowls, with bagasse generally being stronger and more rigid by comparison. These products are suitable for use in cold cabinets and microwaves, resisting water temperatures of up to 100° C and oil temperatures of up to 150° C. Recyclable* PET clear plastic lids are available to fit some items.

Palm Leaf Plates, Platters & Bowls

Palm Leaf Plates, Platters and Bowls are made from discarded leaves from Adaka nut palm. Produced in India, the leaves are collected and cleaned, then mechanically pressed into a 120°C mould with no additional treatments required.

Each individual item has a unique pattern and structure.

Bagasse Hinged Fast Food Boxes and Folia™ Food Containers

We offer many shapes and sizes of food boxes, including styles suitable for popular take away foods such as burgers, jacket potatoes and fish & chips. Made from bagasse sugarcane fibres, hinged food boxes are strong and rigid in construction. Folia™ food containers are innovatively designed, with the two larger sizes featuring fold-in side flaps to help prevent spills and tear away compartments for placing condiment sachets and cutlery.

Leakproof Bagasse Rectangular Containers & Lids

Available in four sizes with one lid to fit all. Bagasse rectangular food containers and lids provide an eco-friendly solution for packaging takeaway meals.

Snap fit lids create a virtually leakproof seal to help prevent sauces from escaping.

The containers and lids are designed to be stackable, freezer safe and suitable for microwave reheating (loosen lid before microwave reheating).

Bagasse Cutlery

Bagasse knives, forks and spoons, are a new sustainable alternative to plastic single-use cutlery. Made from bagasse, non-wood fibres - from sources such as sugarcane.

Natural bagasse cutlery is strong and sturdy - with the fork having strong tines, the knife a serrated blade and all three items having a reinforced handle.

EcoTensil Paper Tasting Spoons

Innovative, sustainable paper spoons which use 50-80% less material compared to conventional single use, cutlery.

Supplied flat, simply touch together the 2 dots on the handle and the spoon is ready for use. Bamboo dispensers are available, for neat tabletop presentation and dispensing.

New, full sized EcoTaster AquaDot spoons are perfect for full servings of hot or cold food. Use with any food that doesn't require a knife to cut; such as thick soups & stews.
