Aurora Eco Products Ltd.

Promote your business whilst protecting the environment.

We supply recyclable, compostable and custom products for your business.

The world of eco products can be a minefield but we aim to take the pressure off you by compiling a comprehensive collection of the most up to date and cost effective products on the market.

This catalogue contains a collection of our most popular and frequently ordered products but **this is by no means an exhaustive list**. We aim to be a one stop shop to meet your consumable needs. If there is a product that you need, which is not listed in this catalogue please get in touch for a consultation so we can assess your business needs and how we can best work together.

Our Materials

Aqueous Coated Paper

Paper is a versatile material and especially appealing when it comes from sustainable FSC®(Forest Stewardship Council®C113967) certified sources. We now have a wide range of paper products in white or kraft coloured FSC®paper.

Products include:

Single and Double Wall Coffee Cups, Coffee Cup Lids and Food Boxes.

RPET

RPET is made from recycled PET (polyethylene terephthalate). Using RPET products ensures that plastic is properly recycled and reused, keeping it out of landfill and reducing the necessity to produce new PET.

Products include:

Clear Drinks Cups, Lids and Food Pots.

Bagasse

Bagasse is made from natural non-wood fibres, deriving from fast growing plants such as sugarcane. It is 100% compostable and biodegrades within 30 to 60 days.

Products include:

Plates, Platters, Bowls & Trays, Compostable Food Boxes, Portion Pots and Cutlery

PP Plastic

PP plastic is a widely used plastic that is highly recyclable. Recycling PP helps conserve natural resources, reduce energy consumption, and reduce greenhouse gas emissions by reducing the need to produce new plastic.

Products include:

Coffee Cup Lids

PE Plastic

PE plastic is the most commonly produced plastic on the market. It is easily recyclable however cannot be composted, making it a reasonable alternative aqueous board for a lower price point.

Products include:

Single and Double Wall Coffee Cups.

Aqueous Paper Cups

Our aqueous coated paper cups are fully customisable to any requirements whilst maintaining all eco-friendly credentials and top notch quality. Available in a range of sizes, single or double wall and with various types of lid. We also offer blank aqueous cups if bespoke designs are not your thing. Single wall cups are generally used for cold drinks (milkshakes, soft drinks etc). Our double wall cups are suitable for use with hot beverages without the need for cup sleeves.

PE Cups

Not quite as environmentally friendly as our aqueous option however still a good choice for a tighter budget. Our plain PE cups are available in a flat wall or ripple design in a range of simple colours.

Single wall cups are generally used for cold drinks (milkshakes, soft drinks etc).

Our double wall cups are suitable for use with hot beverages without the need for cup sleeves.

RPET Cups and Lids

RPET clear cups are the most environmentally friendly option for a clear plastic cup. These can be offered with bespoke designs or clear. These cups are a popular choice for drinks such as smoothies, milkshakes and iced coffees. The smaller cups are also used occasionally as yogurt, granola or dessert pots. RPET cups can be paired with RPET lids, which are domed or flat, with or without a straw slot. RPET lids are one size fits all.
