# Course Structure

## **B.Sc. Nursing or Bachelor of Science in Nursing**

is an undergraduate Nursing course. Nursing is a healthcare profession focused on the care of individuals, families and communities so that they may attain, maintain or recover to optimal health and lead quality life. During the course, it is taught to the nurses, how to work in a variety of specialities.

They work independently and as part of a team to assess, plan, implement and evaluate care. Nursing Science is a field of knowledge based on the contributions of a nursing scientist through peer-reviewed scholarly journals and evidenced-based practice. The duration of the course is four years, but it depends on the institute to institute as per their rules. The value of the course is immense and it is job orienting in nature. The course is being provided by many nursing colleges throughout the country.

## Educational Objectives

*Under the overall aims and goals, the following are the main objectives of the course. At the completion of the course the graduates are expected to*

- # Have a broad concept of the fundamental principles of quality nursing care, and demonstrate skill in providing nursing care to people of all age groups based on principles of physical, biological and behavioural sciences in an institution or in a community setting.*
- # Participate as members of the health care team in promotive, preventive and restorative health care delivery system of the country.*
- # Demonstrate leadership qualities and decision making abilities in various nursing situations.*
- # Demonstrate skill in teaching and supervising nursing care both in the hospital and in community setting.*
- # Recognise the need for continued learning, and for personal and professional growth.*
- # Advance without further formal education to positions which require skills in clinical teaching and unit management.*

## General Nursing and Midwifery (GNM or GNM Nursing)

*is a 3-year-long diploma program with 2.5 years of regular study and 6 months mandatory internship. The course mainly focuses on learning the methods of assisting doctors in treating patients. "Nursing is a profession within the health care sector focused on the care of individuals, families, and communities so they may attain, maintain, or recover optimal health and quality of life. Nurses may be differentiated from other health care providers by their approach to patient care, training, and scope of practice."*

*The GNM Nursing course creates professional health care providers for the medical science industry. On completion of the course, students can work in Nursing Homes, Hospitals, and even Private Medical Firms and Companies. GNM Nursing is a diploma course that teaches students how to care for individuals who are sick or have been injured in order to help them attain full recovery. It offers ample opportunities to the graduates in both private and public organizations. After GNM Nursing qualification, students can work as Nurse, Nursing assistants, Specialist Nurse, Nursing Aides, Nursing Attendants, etc. In addition, students can also opt for a teaching career in both govt. and private educational institutions and can even go for higher studies.*

## Educational Objectives

*At the end of three years of study, the student is expected to :*

- # Have the aptitude, knowledge and skill necessary for assessing nursing needs of the individuals throughout the life-cycle, families and communities.*
- # Apply relevant knowledge from biological and behavioural sciences in planning and carrying out safe nursing care activities.*
- # Co-operate with other members of the health team in the hospital or in the community in prevention of disease, promotion of health, restoration of health and rehabilitation. impart health knowledge to individuals and groups through health education.*
- # Demonstrate skill in the use of problem solving methods in nursing practice.*
- # Demonstrate ability to supervise and guide auxiliary personnel who are part of the nursing team.*
- # Demonstrate understanding of and commitment to professional behaviour.*
- # Carry out the above in the true spirit of service to fellowmen and be committed to the welfare of our country.*

## Hostel Facilities

### *A home away from home*

*Our objective of establishing hostels within the campus is to provide “a home away from home” for the students. We provide good hostel for girls. The hostel environment certainly provides self-confidence, instills discipline in the minds of students and also provides scope for developing their ideas. The hostel on our campus is aesthetically designed to provide an ideal and spacious environment conducive for academic pursuit. The hostel is provided with uninterrupted water supply, reading hall, round the clock security, internet connection, indoor recreation, television etc., State of the art kitchen and spacious dining area has been provided for both the hostels and a customized menu caters to the students’ needs. Hygiene and cleanliness are emphasized in the hostel.*

### *Counseling Center*

*Karunya Nursing Academy, counseling center is an on-campus resource that supports student growth and development as they meet the challenges and choices faced throughout their college years. It is committed to helping students reach their highest academic and personal potential. Counseling Services actively promotes the personal, social, emotional and cognitive growth of students. Special attention is paid to the ongoing issues affecting college students. Counseling Services values and maintains the highest professional and ethical standards in order to foster the psychological well-being and development of KNAians. The student counselor works regularly with students to help them in their emotional, psychological, familial, and academic problems.*

**Dr. I.V Rao,**  
former Vice-Chancellor, Dr. NTR University of Health Sciences, Vijayawada.

Mr. V. Raghavendra Rao,  
Director of Medical Education, Andhra Pradesh.

Mrs. K. Satyavalli,  
Principal, Government college of nursing, Kakinada.

*Karunya Nursing Academy*

# Libraries and study rooms

Library is a 'Learning Resource Centre'. At Karunya Nursing Academy, Teaching and learning are supported by the library through books, reading material, class notes, syllabus, e-resources and more. It is well equipped with reference books, magazines, (national and international), textbooks, journals, periodicals and newspapers, project work, cd's etc.

The library is computerized to allow easy browsing of books for students and staff, and reading room provisions for quiet reading or study are an integral part of the library environment. Class exhibits of SUPW, Project Work and Posters are routinely featured in the Library Exhibit Hall.

Karunya Nursing Academy, is dedicated to quality nursing education and aspires to train the professional nurses imparting standard knowledge as per syllabus to help them to develop their skills in the professional functions and to inculcate right type of professional attitude in them to function as a noble professional and productive citizen in the society.

The college strives to train the nursing students for all round development so that they are molded into responsible professionals and life-long learners. The faculty of this nursing college believes that the professionally qualified nurse has a unique introduction to make in promoting health, prevention of illness and rehabilitation of individual, family and community especially in rural and remote areas of our country. The faculty believe that the nursing education in realistic environment with faculty guidance, prepares a nurse who is capable of assessing community health needs, delivering quality nursing care with a holistic approach regardless of social, economic, cultural, and spiritual differences which contributes to the total development of students for democratic living and personal discipline.

We the faculty here at Karunya Nursing Academy, strive to arrange teaching experiences in such a way that students develop attitude to deal with emergency situations; plan, organize and implement various health programme at individual level and contribute to foster team work to fulfill the goals of health care delivery system.
