Re: STREET LEGAL GOLF CARTS

Date: December 15, 2023

Did you know Capt Jim Golf Carts now conducts the required inspections and completes the necessary DMV forms to get your cart both a Florida title and Vehicle Identification Number (VIN)? Few golf cart owners take the necessary steps to get a Florida title for their cart and that's why so few are street legal. The DMV forms are incomprehensible, plus no one wants to haul their cart all the way to the regional DMV office in Tampa for inspecting.

These laws have changed, so Capt Jim Golf Carts not only adds the necessary street legal accessories, we inspect, complete, and submit the necessary DMV forms for you. We obtain the VIN and Florida title needed for our customers to street legalize their golf carts.

Getting your golf cart a VIN and Florida title is only the second step toward street legalizing it. Your golf cart becomes "street legal" only after your local DMV receives your Florida title with proof of insurance and issues it a tag. Your golf cart then magically converts into a street legal Low Speed Vehicle (LSV).

Golf carts with a Florida title have significantly higher resale values because it 1) establishes ownership, 2) helps prevent fraud and theft, and 3) allows it to be registered, tagged, and converted into a Low Speed Vehicle (LSV). So, what are you waiting for? With our free pick-up and delivery service, converting your golf cart into a street legal LSV has never been easier.

Best regards,

James W. Parkerson

James "Capt Jim" Parkerson, Owner
