

VILLAGE OF SHERIDAN
MONTCALM COUNTY, MICHIGAN
ORDINANCE NO. 820

An ordinance to provide for the operation and maintenance of the Village of Sheridan Wastewater System, pursuant to the provisions of Public Act 94 of 1933; to provide for the ownership, operation, and mandatory connection to said system; to provide and establish a system of rates and charges; to regulate the discharge of water and waste into said system; prohibit private disposal systems and exceptions thereto; provide for industrial pretreatment; establish administrative and financial procedures for the operation of the system; define terms, establish funds and provide remedies and penalties for the violation of this ordinance; and, provide for an effective date hereof.

THE VILLAGE OF SHERIDAN ORDAINS:

SECTION 1. TITLE

This Ordinance shall be known as the Village of Sheridan Municipal Sewer Use Ordinance.

SECTION 2. DEFINITIONS

Unless the context specifically indicates otherwise, the meaning of the terms used in this Ordinance shall be as follows:

1. "Attorney" shall mean the Village Attorney of the Village of Sheridan, Montcalm County, Michigan.

2. "Available Public Sanitary Sewer System" means a public sanitary sewer system located in a right-of-way, easement, highway, or public way which crosses, adjoins, abuts, or is contiguous to the realty involved and passes not more than two hundred (200) feet at the nearest point from a structure in which sanitary sewage originates.

3. "B.O.D." (denoting Biochemical Oxygen Demand) shall mean the quantity oxygen utilized in the biological oxidation of organic matter under standard laboratory procedure in five (5) days at 20 degrees C., expressed in milligrams per liter.

4. "Building Drain" shall mean that part of the lowest horizontal piping of a drainage system which receives the discharge soil, waste, and other drainage pipes inside the walls of the building and conveys it to the building sewer, beginning five (5) feet outside the inner face of the building wall.

5. "Building Sewer" shall mean the extension from the building drain to the public sewer or other place of disposal.
6. "Capacity Charge." In addition to any other assessments, costs, or levies hereunder, a charge for capacity utilization and/or reservation shall be levied for all residential multiple dwellings and other users for each residential equivalent in excess of one residential equivalent. The amount of said charge shall be as hereinafter set forth. Premises other than single family residences shall pay a connection charge in the amount of the "capacity charge" multiplied by the factor developed in the formula established by the Table of Unit Factors pursuant to Section 10 hereunder.
7. "Compatible Pollutant" shall mean biochemical oxygen demand, suspended solids, pH and fecal coliform bacteria, plus any additional pollutants identified in the NPDES permit if the treatment works was designed to treat such pollutants, and in fact can remove such pollutants to a substantial degree. The term substantial degree generally means removals in the order of 85 percent or greater.
8. "Combined Sewer" shall mean a sewer receiving both surface run-off and sewage.
9. "Debt Service Charge" shall mean the charge assessed users of the system which is used to pay principal, interest, and administrative costs of retiring the debt incurred for the construction of the local portion of the system.
10. "Garbage" shall mean solid wastes from the domestic and commercial preparation, cooking, and dispensing of food, and from the handling, storage, and sale of produce.
11. "Incompatible Pollutant" shall mean any pollutant that is not a compatible pollutant.
12. "Industrial User." Any nongovernmental, nonresidential user of the publicly owned treatment works which discharges more than the equivalent of 25,000 gallons per day of normal domestic sewage and which is identified under Divisions A, B, D, E or I of the Standard Industrial Classification Manual, 1972, Office of Management and Budget.
13. "Infiltration" shall mean any waters entering the system from the ground, through such means as, but not limited to, defective pipes, pipe joints, connections or manhole walls. Infiltration does not include and is distinguished from inflow.
14. "Infiltration/Inflow" shall mean the total quantity of water from both infiltration and inflow.

15. "Inflow" shall mean any waters entering the system through such sources as, but not limited to, building downspouts, footing or yard drains, cooling water discharges, seepage lines from springs and swampy areas and storm drain cross connections.

16. "Inspector" shall mean any person or person authorized by the Village to inspect and approve the installation of building sewers and their connection to the public sewer system.

17. "Manager" shall mean the manager of the Village of Sheridan Waste Water Treatment facilities, or its authorized agent or representative.

18. mg/l shall mean milligrams per liter.

19. "Natural Outlet" shall mean any outlet into a watercourse, pond, ditch, lake or other body of surface or groundwater.

20. "Normal Strength Sewage" shall mean a sanitary wastewater flow containing an average daily BOD of not more than 200 mg/l, an average daily suspended solids concentration of not more than 250 mg/l, of an average daily phosphorus concentration of not more than 10 mg/l.

21. "NPDES Permit" shall mean the permit issued pursuant to the National Pollution Discharge Elimination System for the discharge of wastewaters into the waters of the State.

22. "Operation and Maintenance and Replacement Costs" shall mean all costs, direct and indirect, (other than debt service) necessary to insure adequate wastewater treatment on a continuing basis, conform with all related Federal, State and Local requirements, and assure optimal long term facility management.

23. "Person" shall mean any individual, firm, company, association, society, corporation, or group.

24. "pH" shall mean the logarithm of the reciprocal of the concentration of hydrogen ions in grams per liter of solution.

25. "Pretreatment" shall mean the treatment of extra strength industrial wastewater flows in privately owned pretreatment facilities prior to discharge into the public sewer.

26. "Private Sewage Disposal Systems" shall mean any septic tanks, lagoons, cesspools, or other facilities intended or used for the disposal of sanitary sewage other than via the public sanitary sewer.

27. "Properly Shredded Garbage" shall mean the wastes from the preparation, cooking, and dispensing of food that have been shredded to such a degree that all particles will be carried freely under the flow conditions normally prevailing in public sewers, with no particle greater than 1/2 inch in dimension.

28. "Property Owner" shall mean the person or person having legal title to the premises according to the County or Village tax records and shall include in the case of a land contract sale the land contract vendee or vendees, provided that the Village has been furnished with a copy of said land contract or assignment thereof.

29. "Public Sewer" or "Public Sanitary Sewer" shall mean a sanitary sewer constructed, used, or intended for use by the public for the collection and transportation of sanitary sewage for treatment or disposal and owned or operated or controlled by the Village of Sheridan or any other political subdivision of the State of Michigan, or connected to such system, or in which all owners of abutting properties have equal rights and as the term "public sanitary sewer system" is defined pursuant to Act 288 of 1972, Section 2(2).

30. "Residential Equivalents" or "Equivalent Unit" shall mean the factor representing a ratio of the estimated sewage generated by each user to that generated by the normal single family residential user.

31. "Replacement" Expenditures for obtaining and installing equipment, accessories, or appurtenances which are necessary during the useful life of the treatment works to maintain the capacity and performance for which the said works were designed and constructed.

32. "Sanitary Sewer" shall mean a sewer which carries sewage and to which storm, surface, and groundwaters are not intentionally admitted.

33. "Sewage" shall mean a combination of the liquid and water-carried wastes from residences, commercial buildings, institutions, and industrial establishments, (including polluted cooling water) together with such ground, surface, and storm waters as may be present. Sewage is further defined as follows:

- a. Sanitary sewage - shall mean the combination of liquid and water carried wastes discharged from toilet and other sanitary plumbing facilities.
- b. Industrial sewage - shall mean a combination of liquid and water carried wastes, discharged from any industrial establishment, and resulting from an trade or process carried on in that establishment (this shall include the wastes from pretreatment facilities and polluted cooling water).

c. Combined sewage - shall mean wastes including sanitary sewage industrial sewage, stormwater, infiltration and inflow carried to the wastewater treatment facilities by a combined sewer.

34. "Sewage Treatment Facility" shall mean any arrangement of devices and structures used for treating sewage.

35. "Sewerage Works" shall mean all facilities for collecting, pumping, treating, and disposing of sewage.

36. "Sewer" shall mean a pipe or conduit for carrying sewage.

37. "Shall" is mandatory; "May" is permissive.

38. "Single Family Residence" shall mean a residence in which only one family resides.

39. "Slug" shall mean any discharge of water, sewage or industrial waste which in concentration of any given constituent or in quantity of flow exceeds for any period of duration longer than 15 minutes more than 5 times the average 24 hours concentration or flows during normal operation.

40. "Storm Drain" (sometimes termed "storm sewer") shall mean a sewer which carries storm and surface water and drainage, but excludes sewage and industrial wastes, other than unpolluted cooling water.

41. "Structure in Which Sanitary Sewage Originates" shall mean a building in which a toilet, kitchen, laundry, bathing, or other facility which generates water-carried sanitary sewage is used or is available for use for household, commercial, industrial, or other purposes.

42. "Surcharge" shall mean the additional charge which a user discharging wastewater having strength in excess of the normal strength sewage limits set by the Village of Sheridan for transmission and treatment within the sanitary sewage system will be required to pay to meet the cost of treating such excessively strong wastewater.

43. "Suspended Solids" shall mean solids that either float on the surface of, or are in suspension in water, sewage, or other liquids, and which are removable by laboratory filtering.

44. "System" shall mean the complete Village of Sheridan wastewater collection and treatment system, including all sewers, pumps, lift stations, treatment facilities or other facilities and appurtenances used or useful in the collection, transportation, treatment and disposal of domestic, commercial or industrial wastes, and all easements, rights and land for same and including all extension and improvements thereto which may hereafter be acquired or constructed.

45. "Table of Unit Factors" shall mean that table which shall be adopted by the Village stating as "residential equivalents" the ratio of such use of the system to that of a single family residence.

46. "Treatment Works" shall mean all facilities for collecting, pumping, treating, and disposing of sewage, as defined in Item 39 above.

47. "User Charge" shall mean a charge levied on users of a treatment works for the user's proportionate share of the cost of operation, maintenance and replacement of such works. The user charge does not include the debt service charge.

48. "Village" shall mean the Village of Sheridan, Montcalm County, Michigan.

49. "Watercourse" shall mean a channel in which a flow of water occurs, either continuously or intermittently.

50. "Wastewater" shall mean water which contains, or previous to treatment has contained, pollutants such as sewage and/or industrial wastes.

SECTION 3. OPERATION AND MAINTENANCE AND CONTROL

The operation and maintenance of the system shall be under the supervision and control of the Village. The Village retains the exclusive right to establish, maintain, and collect rates and charges for sewage collection, treatment, transmission and debt service, and in such capacity the Village Council for the Village of Sheridan may employ such person or persons in such capacity or capacities as it deems advisable, and may make such rules or regulations as it deems advisable and necessary to assure the efficient establishment, operation and maintenance of the system to comply with the terms of the NPDES Permit and to discharge its financial obligations.

SECTION 4. USE OF PUBLIC SEWERS REQUIRED

A. Mandatory Connection Requirement

Each and every owner of property on which is located a structure in which sanitary sewage originates, shall, at his own expense, install suitable toilet facilities in said structure, and shall cause such facilities to be connected to the available public sanitary sewer system.

B. Connection Procedures

1. Such connection shall be completed promptly but in no case later than ninety (90) days from the date of the occurrence of the last of the following events:

- a. Publication of a notice by the Village Clerk of the availability of the public sanitary sewer system in a newspaper of general circulation within the Village, and the mailing of written notice indicating the availability of the public sanitary sewer to the owner or anyone of the owners in the case of co-ownership of the property in question.
 - b. Modification of a structure so as to become a structure where sanitary sewage originates.
 - c. Improvement of land with building or structures from which sanitary sewage originates.
2. If the owner of property on which is located a structure in which sanitary sewage originates does not complete connection to an available sanitary sewer within the ninety (90) day period described in paragraph 1 above, the Village Clerk shall notify said person by written notice that connection to the system is required forthwith. The giving of said notice shall be made by First Class mail to the owner of the property on which the structure is located or by posting such notice on the property. Notice shall provide the owner with the approximate location of the public sanitary sewer system which is available for connection of the structure involved and shall advise the owner of the requirements and the enforcement provisions of this Ordinance and Act 288 of Public Acts of Michigan 1972 as amended.
 3. Adverse Weather Exception for Late Connection. In the event the property owner is unable to connect to the system within the time prescribed by this Ordinance due to or on account of inclement or adverse weather conditions, said property owner may appeal to the Village Council to allow said person additional time in which to connect without penalty and without civil and criminal proceedings being initiated against him. The foregoing notwithstanding, this appeal shall be made in writing within ten (10) days of notice of sanitary sewer availability as hereinbefore set forth.

C. Enforcement of Mandatory Connection Requirements

1. Penalties for Late Connection. Failure or refusal to connect to the system within the time prescribed herein shall result in the property being charged a penalty of One Hundred Dollars (\$100.00) for each single family residential unit multiplied by the number of units and/or multiplying factors as established by the Table of Residential Equivalents.
2. Civil Penalties to Compel Connection. Where any structure wherein sanitary sewage originates is not connected to the system (90) days after the date of mailing or otherwise serving notice to connect herebefore set forth, the Village may bring an action for mandatory injunction or injunctive order in any court of competent jurisdiction in the County of Montcalm to compel the owner of the property on which said property is located to connect to the system. The Village may charge in such action or actions any number of owners of such properties to compel said person or persons to connect to the system.

3. By Criminal Proceedings. Any violation of this Ordinance including failure to comply with the mandatory connection requirements of the Ordinance shall be punishable by a fine not to exceed One Hundred Dollars (\$100.00) or incarceration for a period of not more than ninety (90) days or both such fine and imprisonment in the discretion of the court. Each day that a violation of this Ordinance shall continue shall be construed to constitute a separate offense.

SECTION 5. PRIVATE SEWAGE DISPOSAL

1. It shall be unlawful for any person to place, deposit, or permit to be deposited upon any public or private property within the Village (or any area under its jurisdiction) any human excrement, garbage, or other objectionable waste.

2. It shall be unlawful to discharge to any natural outlet any sanitary sewage, industrial waste, or other polluted water except where suitable treatment has been provided in accordance with subsequent provisions of this Ordinance.

3. Except as hereinafter provided, it shall be unlawful to construct any privy, privy vault, septic tank, cesspool or other facility intended or used for the disposal of sewage or industrial waste.

4. The owner of all houses, buildings, or properties used for human occupancy, employment, recreation, or other purposes situated within the Village or any other area under the jurisdiction of the Village and abutting any street, alley, or right-of-way, in which, within two hundred (200) feet at the nearest point from the structure in which sewage originates, there is now located or may in the future be located a public sewer or combined sewer of the Village is hereby required at his own expense to install suitable toilet facilities therein, and to connect such facilities directly with the proper public sewer in accordance with the provision of this ordinance when given official notice to do so, provided that such connection shall not be required to be made less than 90 days after the sewer, so located is constructed and made available for connection thereto.

5. Where a public sanitary sewer is not available under the provisions of Section 4 of this Ordinance, the building sewer shall be connected to a private sanitary sewer disposal system which shall be approved by the Mid-Michigan District Health Department.

6. At such time as the public sanitary sewer system becomes available to premises served by a private sanitary sewage disposal system, connection to the public system shall be made in compliance with this Ordinance, and any septic tank cesspools, and similar private disposal facilities located thereon shall be abandoned and discontinued for sanitary sewage disposal use.

7. All private sanitary sewage disposal systems maintained in compliance with this Ordinance shall be maintained in a sanitary manner at all times at the sole expense of the owner thereof.

8. All abandoned private sanitary sewage disposal systems shall be completely filled with earth, sand, gravel, concrete or other approved material. Upon the abandonment or discontinuation of use of a septic tank or privy, the sewage and sludge contents thereof shall be completely removed and disposed of by a septic tank cleaner who is duly licensed under provisions of Act No. 243 of the Public Acts of 1951. The tank, or the pit in the instance of a privy, shall be treated with at least 10 pounds of chlorinated lime or other chemical disinfectant acceptable to the health officer. Then the tank or pit shall be completely backfilled with approved material and made safe from the hazard of collapse or entrapment.

SECTION 6 - INDUSTRIAL USERS

Any industry or structure discharging process flow to the sanitary sewer, storm sewer or receiving stream shall comply with the requirements of this Section.

The Village may require each entity who applies for or receives sewer service, or through the nature of the enterprise, creates a potential environmental problem to:

- a. File a written statement setting forth the nature of the enterprise, the source and amount of water used, the amount of water to be discharged with its present or expected bacterial physical, chemical, radioactive, or other pertinent characteristics of the wastes.
- b. Provide a plan map of the building, works, or complex, with each outfall to the surface waters, sanitary sewer, storm sewer, natural watercourse, or groundwaters noted, described, and the waste stream identified.
- c. Sample, test and file reports with the Village, and the appropriate State agencies on appropriate characteristics of wastes on a schedule, at locations, and according to methods approved by the Village.
- d. Place waste treatment facilities, process facilities, waste streams, or other potential waste problems under the specific supervision and control of persons who have been certified by an appropriate State agency as properly qualified to supervise such facilities.
- e. Provide a report on raw materials entering the process or support system, intermediate materials, final product, and waste by-products as those factors may affect waste control.
- f. Maintain records and file reports on the final disposal of specific liquids, solids, sludges, oils, radioactive materials, solvents or other wastes.
- g. If any industrial process is to be altered as to include or negate a process waste or potential waste, provide written notification.

SECTION 7. BUILDING SEWERS AND CONNECTION

A. Building Sewer Regulations

1. A separate and independent building sewer (lead) shall be provided for every building; except where one building stands at the rear of another on an interior lot and no private sewer is available or can be constructed to the rear through an adjoining alley, court, yard, or driveway, the building sewer from the front building may be extended to the rear building and the whole considered as one building sewer. Other exceptions will be allowed only by special permission granted by the Village.

2. All costs and expenses incident to the installation of the building sewer and the connection of same to the public sewer shall be borne by the property owner.

3. All building sewers (leads) shall meet or exceed the requirements of the Ordinances of the Village of Sheridan or the requirements of this Ordinance, whichever shall be most stringent.

4. Building sewers hereinafter installed shall consist of pipes and fittings of the following types and sizes:

- a. Pipe must be of sufficient diameter to carry the estimated volume of discharge. Minimum pipe size permitted is four (4) inch ID.
- b. Pipe must be one of the following materials and cannot be mixed in the connection lines to include the fittings:
 - (1) Cast iron with rubber-type gaskets or leaded joint;
 - (2) Cast iron NH pipe with neoprene stainless couplings;
 - (3) Ductile iron with rubber-type gaskets, slip joint or mechanical joint;
 - (4) Vitrified clay tile with ASTM C425 joints;
 - (5) Reinforced concrete with ASTM C443 joints;
 - (6) PVC plastic, Schedule 40 or greater;
- c. No tees, double tees, or crosses, or double hub pipes shall be permitted;
- d. Old building sewers or portions thereof may be used in connection with new buildings only when they are found on examination and tested by the Inspector to meet all requirements of this ordinance; and
- e. All changes in grades or direction shall be made with appropriate fittings.

5. Clean-outs shall be installed every one hundred (100) feet of straight run of six (6) inch diameter pipe, every fifty (50) feet of straight run of four (4) inch diameter pipe, and at each ninety (90) degree direction change, and all clean-outs shall be plugged.

6. All lines shall be laid at a minimum slope of 1/8 inch per foot grade and a maximum slope of 1/2 inch per foot grade for four-(4) inch lines and at a minimum of 1/8 inch per foot grade and a maximum 1/2 inch per foot grade for six-(6) inch lines.

7. The method to be used in excavating, placing of pipe, jointing, testing, and backfilling the trench, shall conform to the requirements of the Plumbing Code Rules (Part 7) Issued by the Michigan Department of Labor Construction Code Commission.

8. All joints and connections shall be gas tight and shall conform to the requirements of the current building and plumbing codes.

9. Whenever possible, the building sewer shall be brought to the building at an elevation below the basement floor. No building sewer shall be laid parallel to or within three (3) feet of any bearing wall, which might thereby be weakened. The depth shall be sufficient to afford protection from frost. All excavations required for the installation of a building sewer shall be open trench work unless otherwise approved by the Inspector. Pipe laying and backfill shall be performed in accordance with current A.S.T.M. Specifications except that no backfill shall be placed until the work has been inspected by the Inspector or his representative.

10. In all buildings in which any building drain is too low to permit gravity flow to the public sewer, sanitary sewage carried by such drain shall be lifted by an approved pumping system and discharged to the building sewer.

11. All excavations for building sewer installation and connection shall be adequately guarded by barricades and lighting so as to protect the public from hazards. Streets, sidewalks, alleys, parkways and other public property disturbed in the course of the installation and connection work shall be restored in a manner satisfactory to the Village.

12. The connection of the building sewer into the public sewer shall be made at the "Y" branch designated for that property, if such branch is available at a suitable location. Any connection not made at the designated "Y" branch in the main sewer shall be made only as directed by the Inspector.

13. The applicant for the building sewer shall notify the Inspector when the building sewer is ready for inspection and connection to the public sewer. The connection shall be made under the supervision of the Inspector or his representative.

B. Connection Regulations

1. No unauthorized person shall uncover, make any connections with or opening into, use, alter, or disturb any public sewer or appurtenances thereof without first obtaining a written permit from the Village. Before a permit may be issued for excavating for plumbing in any public street, way, or alley, the person applying for such permit shall have executed unto the Village and deposited with the Treasurer a corporate surety in the sum of \$1,000 conditioned and that he will perform faithfully all work with due care and skill, and in accordance with the laws, rules, and regulations established under the authority or any ordinances of the Village pertaining to plumbing. This bond shall state that the persons will indemnify and save harmless the Village and the owner of the premises against all damages, costs, expenses, outlays, and claims of every nature and kind arising out of unskillfulness or negligence on his part in connection with plumbing or excavating for plumbing as prescribed in this ordinance. Such bond shall remain in force and must be executed for a period of one (1) year except that on such expiration it shall remain in force as to all penalty claims, and demands that may have accrued thereunder prior to such expiration.

2. The fee, if any, for the connection permit shall be an amount established by resolution of the Village Council.

3. The owner or contractor applying for a connection permit will receive three (3) copies of the permit, one copy each for the contractor and the property owner, with the third copy to be returned to the Village with a sketch of the installation on the back showing all dimensions, directions, and other important information concerning the installation. The latter copy will remain the property of the Village.

4. No connection to the system will be permitted unless there is capacity available in all downstream sewers, lift stations, force mains, and the sewage treatment plant, including capacity for treatment of B.O.D. and suspended solids.

5. All connections to the system will be made by a licensed contractor or plumber provided, however, that a property owner may make his own installation and connection in accordance with the requirements of this Ordinance and law so long as he has secured a connection permit. This does not allow a property owner to hire an unlicensed contractor to do his work.

6. All licensed contractors and plumbers making connections to the systems shall file with the Village, a copy of their plumbers' or contractors' license from the State of Michigan and a copy of their liability insurance prior to performing any connections to the system. The liability insurance limits shall be set by resolution of the Village council.

7. No person shall connect roof downspouts, foundation drains, area way drains, or any sources of surface or ground water to a building sewer which in turn is connected to the system.

8. No building sewer shall be covered until after it has been inspected and approved by authorized personnel of the Village or its designee. No building sewer may be used until finally approved after the trench is backfilled.

SECTION 8. USE OF THE PUBLIC SEWER

A. Storm, Ground and Unpolluted Water

1. No person shall discharge or cause to be discharged any storm water, surface water, ground water, or roof water to any sanitary sewer.

2. Storm water, ground water and all other unpolluted drainage shall be discharged into storm drains or to a natural outlet approved by the Village. Industrial cooling water or unpolluted process waters may be discharged, upon application to and approval of the Village, to a storm drain or natural outlet.

B. Prohibited Discharges

No person or persons shall directly or indirectly discharge or cause to be discharged into the sanitary sewer, the following substances:

1. Any liquid or vapor having a temperature higher than 150 degrees F.

2. Any water or waste which may contain more than 100 milligrams per liter, by weight, of fat, oil or grease.

3. Any gasoline, benzene, naphtha, fuel oil or other flammable or explosive, liquid, solid or gas.

4. Any garbage that has not been properly shredded.

5. Any ashes, cinders, sand, mud, straw, metal shavings, glass, rags, feathers, tar, plastics, woods, paunch manure or any other solid or viscous substance capable of causing obstruction to flow in sewers or other interference with the proper operation of the sewage works.

6. Industrial wastes of such concentration of metallic or other compounds which exceed guidelines of the appropriate state and federal agencies and as set forth in the Village's NPDES permit.

7. Radioactive wastes or isotopes of such half-life or concentration which may exceed limits established by applicable state and federal regulations, shall not be allowed.

8. Waters or wastes containing substances which are not amenable to treatment or reduction by the sewage treatment processes employed, or are amenable to treatment to only to such degree that the sewage treatment plant effluent cannot meet the requirements of the NPDES permit or the requirements of other agencies having jurisdiction over discharge to the receiving waters.

9. Any waters or wastes containing a toxic or poisonous substance in sufficient quantity to injure or interfere with any sewage treatment process, or to constitute a hazard to humans or animals, or to create any hazard in the receiving waters of the treatment plant, heavy metals, and/or materials designated by EPA as being toxic or poisonous.

10. Any waters or wastes containing suspended solids of such character and quantity that unusual attention or expense is required to handle such materials at the sewage treatment plant.

11. Any noxious or malodorous gas or substance capable of creating a public nuisance.

12. Any industrial waste that may cause a deviation from the NPDES Permit requirements, pre-treatment standards, and all other state and federal regulations.

13. Any waters or wastes having a pH lower than 6.0 or higher than 9.0 or having any other corrosive properties capable of causing damage or hazard to structures, equipment and personnel of the wastewater system.

14. Reference is made to paragraph 8 in Section 11, herein, where provision is made for the Village to charge a surcharge rate for acceptance of wastes of a certain character.

C. Grease, Oil and Sand Interceptors (Traps)

1. Grease, oil and sand interceptors (traps) shall be provided at the expenses of property owners, when in the opinion of the Village of Sheridan the wastes to be discharged into the sanitary sewer contain grease in excessive amounts or other harmful ingredients as determined by the Village of Sheridan in its sole discretion, provided, however, that such interceptors shall not be required for single family or multi-family dwelling units.
2. Where installed, all grease, oil and sand interceptors (traps) shall be maintained by the owner, at his expense, in continuously efficient operation at all times.

D. Pretreatment

The admission into the public sewers of any waters or wastes (a) containing a five-(5) day B.O.D. greater than three hundred (300) mg/l or containing more than three hundred fifty (350) mg/l of suspended solids, or (b) containing any quantity of substances having the characteristics described in paragraph 8B. hereof, or (c) having any average daily flow greater than two (2) percent of the average daily flow of the Village, shall be subject to review and approval of the Village. Preliminary treatment shall be provided, at no expense to the Village, as may be necessary to reduce the B.O.D. to 300 mg/l and suspended solids to 350 mg/l or to reduce objectionable characteristics of said effluent to within the maximum limits provided for in paragraph B. hereof, or to control the quantity and rates of discharges of such water or wastes. On direction of the Village, an entity may be required to remove, exclude, or require pretreatment of any industrial waste in whole or in part for any reasons deemed to be in the Village's interest. Where preliminary treatment facilities are provided for any waters or wastes, they shall be maintained in satisfactory and effective operation at no expense to the Village. Plans, specifications and any other pertinent information relating to proposed preliminary treatment facilities shall be submitted for approval to the Village and no construction of such facility shall be commenced until said approvals are obtained in writing. The Village may elect to treat industrial wastes discharges in excess of normal domestic concentrations on a basis prescribed by written agreement and for an established surcharge to cover the added cost. All such preliminary treatment or pretreatment shall be in accordance with federal and state laws and regulations and such pretreatment criteria as are promulgated by the Village. All expenses of Village services necessary to review such preliminary treatment facilities plans and specifications shall be borne by the owner.

E. Industrial Waste Monitoring

1. The Village reserves the right to contract with any Industrial User to allow said Industry to use available excess capacity for discharging wastewaters that exceed the limits of "Normal Strength Sewage". If any waters or wastes are discharged, or are proposed to be discharged to the public sewers, which waters contain the substances or possess characteristics which in the judgment of the Village may have a deleterious effect upon the Sewage Works, processes, equipment, or receiving waters, or which otherwise create a hazard to life or constitute a public nuisance, the Village may:

- a. Prohibit the introduction of such wastes into the sanitary sewer system;
- b. Require pretreatment to the level defined as "Normal Strength Sewage";
- c. Require pretreatment to an acceptable level for discharge to the public sewers;
- d. Require control over the quantities and rates of discharge;

- e. Require all Industrial customers or Industries with significant changes in strength of flow to submit prior information to the Village concerning the proposed flows.

If the Village permits the pretreatment or equalization of waste flows, the design and installation of the plants and equipment shall be subject to the review and approval of the Village Council and subject to the requirements of all applicable codes, ordinances and laws.

2. Grease, oil, and sand interceptors shall be provided when, in the judgement of the Village, they are necessary for the proper handling liquid wastes containing grease in excessive amount, or any flammable wastes, sand, or other harmful ingredients; except that such interceptors shall not be required for private living quarters or dwelling units. All interceptors shall be of a type and capacity approved by the Village and shall be located as to be readily and easily accessible for cleaning and inspection.

3. Where preliminary treatment or flow-equalizing facilities are provided for any waters or wastes, they shall be maintained continuously in satisfactory and effective operation, by the owner at his expense.

4. When required by the Village, the owner of any property serviced by a building sewer carrying industrial wastes shall install a suitable control manhole together with such necessary meters and other appurtenances in the building sewer to facilitate observation, sampling and measurement of the wastes. Such manhole, when required, shall be accessible and safely located, and shall be constructed in accordance with plans approved by the Village. The manhole shall be installed by the owner at his expense, and shall be maintained by him so as to be safe and accessible at all times.

5. All measurements, tests and analyses of the characteristics of waters and wastes to which reference is made in this ordinance shall be determined in accordance with the most recent edition of "The Standard Methods for the Examination of Water and Sewage" and shall also conform with the Federal Register reprint of October 16, 1973 (40CFR 136) which establishes guidelines for testing procedures for analysis of pollutants. All measurements, tests, and analyses shall be determined at the control manhole and upon suitable samples taken at said manhole. In the event that no special manhole has been required, the control manhole shall be considered to be the nearest downstream manhole in the public sewer from the point at which the building sewer is connected. It shall be the responsibility of the industrial customer to provide flow measuring and monitoring equipment and sampling equipment for each such control manhole.

6. Sampling shall be carried out by customarily accepted methods to reflect the effect of constituents upon the Sewerage Works and to determine the existence of hazards to life, limb, and property. The particular analyses involved will determine whether a 24-hour composite of all outfalls of a premises is appropriate or whether grab sample or samples should be taken.

7. Industrial cooling water containing only such pollutants as insoluble oils or grease or other suspended solids shall be pretreated for removal of the pollutants and then discharged to the storm water.

8. Agents of the Village of Sheridan, Michigan Department of Natural Resources or U. S. Environmental Protection Agency shall have the right to enter all properties for the purpose of inspecting, measuring, sampling and testing the wastewater discharge.

SECTION 9. CONDITIONS OF SERVICE

1. At the time of original construction of the public sewer, the Village shall install at its expense that portion of the service from the main to the lot or easement line of all occupied premises, for those customers making connections subsequent to the time of original construction of the public sewer, the Village shall install that portion of the service from the main to the lot or easement line, and shall assess a connection charge as defined in Section 10 of this ordinance. The Village shall maintain at its expense, the public sewer. Customers shall install at their expense, that portion of the service from said lot or easement line to their premises. The customer shall maintain, at his expense, the building drain and building sewer.

2. The Village shall, in no event, be held responsible for claims made against it by reason of the breaking of any mains or service pipes, or by reason of any other interruption of the service caused by the breaking of machinery or stoppage for necessary repairs; and no person shall be entitled to damage nor have any portion of a payment refunded for any interruption.

3. The premises receiving sanitary sewer service shall at all reasonable hours be subject to inspection by duly authorized personnel of the Village.

SECTION 10. SYSTEM CHARGES AND RATES

1. Table of Unit Factors. For users of the system not metered, and except as otherwise provided herein, the Village does hereby adopt a Table of Units, the same being entitled "Table of Unit Factors" for the Village of Sheridan Wastewater Collection and Treatment System which Table is attached hereto and is incorporated herein by reference and made a part hereof as if fully set forth. Said Table shall set forth and identify the user class and all applicable factors to be multiplied by the quarterly charge established for single-family residential premises. Said Table may be modified or amended from time to time by Resolution of the Village of Sheridan Village Council.

a. Rules for Interpreting Table of Unit Factors.

1. The minimum equivalent factor for users shall be 1.0.
2. Equivalent units for users not originally contained in said Table may be added thereto from time to time by Resolution of the Village Council.
3. Where multiple businesses exist at one location, the various businesses shall be combined for determining the equivalent units at such location.

b. Revision or Modification of Equivalent Units.

1. Review. The equivalent units of users having an equivalent unit factor of more than one (1.0) shall be reviewed by the Village at least once each year. Unless the equivalent unit factor of such user is changed by Resolution of the Village Council on or before the 15th day of the last month preceding the commencement of the system fiscal year, the equivalent unit factor of such user shall remain the same as it was for the preceding fiscal year. Failure to specifically review as provided herein shall not cause said factor to be omitted and shall not be considered grounds for discontinuance of said factor.
2. Review of the Users with Meters. Where the user has been required to install, or by agreement has installed a meter to register flow, the equivalent unit factor for purposes of determining the service charge of such user shall be reviewed and adjusted yearly to assure the equivalent unit factor assigned to said user is compatible with use. The formula for determining the equivalent unit factor for metered users for the purposes of determining the service charge for the next fiscal year shall be as follows: Average quarterly flow during previous year divided by 15,000 gallons = Equivalent Unit Factor. Where fractional units above 1.00 are computed, the nearest whole number will be assigned.

2. From and after the effective date of this Ordinance, charges for sewage transmission and treatment and disposal and debt service to each user connected to the system shall be as follows:

- a. Non-Metered Single Family Residence - Quarterly charges for a non-metered single family residence shall be as follows:

<u>USC Component</u>	<u>Debt Service Component</u>	<u>Total Charge</u>
\$13.70	\$43.80 37.30	\$57.50 51.00

- b. Other Non-Metered Customers - Quarterly charges for non-metered customers other than single family residences shall pay a quarterly charge multiplied by a factor representing a ratio of the sewage use of the user to the normal single family residential sewage use, as reflected in the Table of Unit Factors included in this Section, but not less than one (1) equivalent unit.
- c. Metered Customers - Quarterly charges for metered customers for the user charge system portion shall be as follows:

USC Base Charge - \$2.30 per quarter
 USC Variable Charge - \$0.748 per 1000 gallons

Quarterly charges for debt service shall be calculated by using an equivalent factor, as determined in paragraph 1.b.2 in this section, times the quarterly debt service charge for a single family residence.

3. Appeal. A property owner having an equivalent unit factor of more than one, may, upon written request received by the Village council, appeal his unit factor at a regular or special meeting of the council. Upon receipt of such notification, the council shall notify the property owner at least ten (10) days in advance as to the date his appeal will be heard. The decision of the majority of the Village council present at the appeal shall be final and binding for purposes of decision on appeal.

4. Connection Fee - No connection fee will be levied for connection to the system for a period of 90 days after completion of the original sanitary sewer system and publication by the Village Clerk of the availability of said system, all in accordance with Section 4 of this ordinance. A connection fee shall be levied for all connections made to the system after this initial 90 day period.

- a. For direct connection, the connection fee shall be \$500 plus the cost of street, sidewalk and ground repair for each single family residence.

Connection charges for other than single family residences shall pay a connection charge multiplied by a factor representing a ratio of the sewage use of the user to the normal single family residential sewage use, as reflected in the Table of Unit Factors included in this Section, but not less than one (1) equivalent unit.

- b. Services rendered by the Village for the connection fee includes the tap to the sewer main, and the installation of the sewer lead from the sewer main to the property line and the inspection of the connection to the building sewer at the property line.

8. Surcharge. The rates and charges set forth herein notwithstanding, if the character of the sewage of any user shall impose an unreasonable additional burden upon the sewage disposal and transmission system of the Village, then and in that event an additional charge shall be made over and above the rates herein established. Effluent in excess of the maximum limitations imposed by this Ordinance shall be deemed prima facie subject to surcharge. If necessary to protect the system or any part thereof, the Village shall deny the right of any user to empty such sewage into the system. Surcharges required by this Section shall be computed as the prorated share of the annual cost of operation and maintenance, including replacement, attributable to treating the substance multiplied by the ratio of weight of surchargeable excess of the discharged substance to the total weight of such substance that is treated in that year. This amount shall be collected, on the basis of estimated surchargeable amounts, with each periodic billing and shall be adjusted annually to reflect actual operation, maintenance and replacement costs. Surcharge rates shall be established by Resolution of the Village Council and the amount and necessity of surcharge may be appealed by the user to the Village Council.

9. Industrial sampling charges. There shall be an additional charge for any necessary flow monitoring or laboratory testing of Industrial wastewaters. Such monitoring or testing will be performed by the Village in the event of failure by the customer to provide proper data as required under applicable sections of this Ordinance.

10. Contractual Rates. The foregoing provisions relating to rates shall not be construed as prohibiting any special agreement or arrangement between the Village and the users or class of users whereby the sanitary wastes of unusual flows, strength or character of such user or class of users may be accepted into the system, subject to payment therefore by said user or class of users.

11. Revision of Rates and Charges. The rates established by this Ordinance are estimated to be sufficient to provide revenue for the payment of the operation and maintenance costs, replacement costs and such other charges and expenditures for the system. Such rates shall be revised from time to time as required to maintain the fiscal integrity of the system and the same may be revised and fixed by Resolution of the Village Council as may be necessary to produce the amounts required to pay such charges and expenditures and provide the funds necessary for the maintenance of the financial integrity of the system.

12. Deferring Charges. No free service shall be furnished to any user of the system, and there shall be no waiver or forgiveness of charges levied pursuant to the terms hereof. The foregoing notwithstanding, any resident eligible for deferment of payment of such fees pursuant to the laws of the State of Michigan shall be afforded ample opportunity to request such deferment or partial payment in accordance therewith.

13. The foregoing notwithstanding, nothing contained in this Ordinance shall be construed as limiting, modifying or amending any special assessments levied against certain properties within the Village in connection with the construction of sanitary sewers.

14. Enforcement of Charges.

a. Non-payment of the Special Assessment and/or Connection and Operation Maintenance and Replacement Charges. Non-payment of said charges shall subject the property owner to a liability for such charges and penalties as herebefore provided for a late or delayed connection.

b. Non-payment of Service Charge.

(1) Discontinuance of Service. In the event that a

service charge established pursuant to this section. hereof remains delinquent for a period in excess of 45 days, the Village shall have the right to shut off and discontinue water and/or sewer service to such user. Such service shall not be re-established until all delinquent charges, penalties and a charge for the re-establishment of such service shall be paid. Said turn-on charge shall be established by Resolution of the Village Council of the Village of Sheridan.

(2) Collection by Litigation. In addition to discontinuing service to said user the Village shall have the option of collecting all such delinquencies and penalties due hereunder by legal proceedings in a court of competent jurisdiction.

(3) Collection by Enforcement of Lien. Service charges, including penalties due thereon which remain delinquent for a period in excess of 45 days shall constitute a lien on the premises serviced. Such a lien shall be perfected by the Village official or officials in charge of the collection thereon, by certifying annually not later than May 1st of each year to the tax assessing officer the fact and the amount of such delinquency. Thereupon, such charge shall be entered by the tax assessing officer of the Village upon the next tax roll as a charge against the premises and shall be collected and the lien thereof enforced in the same manner as general taxes against such premises are collected, and the lien thereof enforced.

TABLE OF UNIT FACTORS
VILLAGE OF SHERIDAN
MONTCALM COUNTY, MICHIGAN

<u>TYPE OF PREMISES</u>	<u>RESIDENTIAL EQUIVALENT</u>
Barber Shops	0.15 per chair
Bars	0.05 per seat
Beauty Shops	0.25 per booth
Boarding Houses	0.20 per person
Bowling Alleys (no bars, lunch, facilities)	0.15 per alley
Churches	0.01 per seat
Convalescent Homes (Nursing Homes)	0.40 per bed
Country Club	0.10 per member
Drug Stores	0.20 per employee
Dry Cleaners	1.25 per press
Factories (exclusive of Industrial wastes)	0.15 per person(s)
Grocery Stores and Super Markets	0.30 per employee
Hospitals	1.10 per bed
Hotels, Motels (private baths, two person room)	0.20 per bed
Industry (process waters)	To be determined at time of application
Laundry (self service)	0.50 per washer
Marinas	0.10 per slip
Mobile Home	1.00 per unit
Multiple Family Residence	1.00 per living unit
Office Building	0.10 per employee
Restaurants	0.10 per seat
Rooming Houses (no meals)	0.10 per person
Sanitary Trailer and Boat Dump Station	2.00 per station

Schools (cafeteria)	0.045 per student
Schools (showers)	0.05 per student
Schools (without showers and cafeteria)	0.03 per student
Service Station	0.20 per pump
Single Family Residence	1.00 per unit
Snack Bars, Drive-Ins, Etc.	0.10 per seat
Store (other than specifically listed)	0.15 per employee
Trailer Parks (central bathhouses)	0.35 per trailer
Trailer Parks (Individual sewer connection)	1.00 per trailer
Travel Trailer Parks and Campgrounds	
(with individual sewer connections)	0.20 per site
(without individual sewer connections)	0.15 per site

NOTE: Each connection to the public sewers will be assigned a minimum of one (1) equivalent user. Where fractional units above 1.00 are computed, the nearest whole number will be assigned.

SECTION 12. FISCAL YEAR, RECORDS AND FUNDS

1. Fiscal Year. The fiscal year of the system shall commence on the 15th day of March and end on the 14th day of March in each year.

2. Records and Accounts. The Village shall keep and maintain proper books and records and accounts separate from all other records and accounts of the Village in which shall be made full and correct entries of all transactions relating to the system. The Village shall cause an annual audit of such books and records and accounts of the preceding operating year to be made by a recognized independent Certified Public Accountant and will supply such audit to authorized public officials upon proper request as required by 1972 PA 2.

3. Establishment of Funds. The Village shall establish funds as outlined in Ordinance No. 812, entitled "An ordinance to authorize the acquisition and construction of a sanitary sewage collection and treatment system for the Village of Sheridan; to provide for the issuance and sale of revenue bonds to pay part of the cost thereof; to provide for the retirement and security of the bonds; and to provide for other matters relative to the system and the bonds". In addition to the funds required to be established under Ordinance No. 812, the following funds shall also be established.

- a. Replacement Fund. There shall be established and maintained a fund designated as "Wastewater Plant Replacement Fund" which shall be used solely for replacement of equipment at the wastewater plant and pumping stations. The amount set aside each year shall conform to the established schedule to the extent that revenues are available, the amount shall be \$1,275.00 as determined in the Village User Charge System.
- b. Improvement Fund. There shall be next established and maintained a fund designated as the "Improvement Fund" which shall be used solely for the purpose of making improvements, extensions and enlargements to the system. There shall be deposited into said fund, after providing for the requirements of the funds heretofore enumerated, such revenues as the Village Council shall determine.
- c. Bank Accounts. All monies belonging to any of the foregoing funds or accounts may be kept in one bank account in which event the money shall be allocated on the books and records of the Village within the single bank account in the manner set forth above.
- d. Deficiencies in Funds. In the event the monies in the Receiving Fund are insufficient to provide the current requirements of the Operation and Maintenance Fund or Contract Payment Fund, any monies and/or securities or other funds of the system may be transferred to such fund, to the extent of any deficiency therein.

- e. Investment of Funds. Monies in any fund or account established by the provisions of this Ordinance may be invested or deposited in any lawful investments or deposits and may be invested in obligations of the United States of America in a manner and subject to any limitations set forth in the laws of the State of Michigan. Income received from such investmenst shall be credited to the fund from which said investments were made, or pro rata in the case of a single bank account.
- f. Insurance. The Village shall maintain and carry insurance on all physical properties of the system, of a kind and in the amounts normally carried by public utility companies and municipalities engaged in the operation of sanitary sewage dipsosal systems. All monies received from losses under such insurance policy shall be applied soley to the replacement and restoration of the property damaged or destroyed.

SECTION 13. MISCELLANEOUS PROVISIONS

1. Protection from Damage. No person shall maliciously, or willfully break, damage, destroy, uncover, deface or tamper with the system or any component thereof.

2. Connection of Privately Constructed Sanitary Sewer Systems to the System. Before any sanitary sewer system constructed by private, as distinguished from public funding, hereinafter referred to as the "private sanitary sewer", shall be permitted to connect to the system, the owner of said system, hereinafter referred to as the developer, shall do and provide the Village with the following:

- a. Provide the Village with the developer's plans and specifications for construction, an estimate of the cost of construction, and a performance bond and deposit with the Village the estimated cost of review of construction plans covering the cost of hiring a registered professional engineer to review plans and specifications, which monies shall be placed by the Village in an escrow account in the name of said developer.
- b. Obtain approval of the Village of the plans and specifications.
- c. Secure all necessary permits for construction.
- d. Upon commencement of construction of the private sanitary sewer, deposit with the Village in the escrow account referred to in paragraph 3.a. of this Section a sum of not less than 10% of the cost of construction of the wastewater system improvements to cover the anticipated cost of inspection of construction and payment of connection charges.

- e. Upon completion of connection of the private sanitary sewer to the system, the performance bond, upon recommendation of the Village's engineer and approval of the Village Council, shall be released and any monies remaining in the developer's escrow account shall be returned to the developer. Any additional expenses incurred by the Village in assuring the Village that the private sanitary sewer is properly operating shall be deducted therefrom or charged directly to the developer, at the option of the Village. An accounting of expenditures shall be made to the Developer by the Village.
 - f. Thereafter, in accordance with the subdivision ordinance, any accepted privately constructed sewer within a publically dedicated right of way, shall become a public sewer.
3. Administration. The Village Council is charged with the responsibility of administering the system and causing the enforcement of this Ordinance.
4. Power and Authority of Inspectors.
- a. Duly authorized employees of the Village bearing proper credentials and identification shall be permitted to enter upon all properties for the purpose of inspection, observations, measurement sampling and testing in accordance with the provisions of this Ordinance.
 - b. Duly authorized employees of the Village may enter at all reasonable times in or upon private or public property for the purpose of inspecting and investigating conditions or practices which may be in violation of this Ordinance or detrimental to the system.
 - c. Duly authorized employees of the Village shall inspect the on-site work occurring by reason of any system permit. Such person shall have the right to issue a cease and desist order on the site upon finding a violation of said permit or this Ordinance. The order shall contain a statement of the specific violation and the appropriate means of correcting the same and the time within which correction shall be made.

SECTION 14. GENERAL PROVISIONS

1. Penalties.

- a. What Constitutes a Violation. Whenever, by the provisions of this Ordinance, the performance of any act is required or the performance of any act is prohibited, a failure to comply with such provisions shall constitute a violation of this Ordinance. In addition, the failure, neglect or refusal to comply with a cease and desist order of the enforcing agency shall constitute a violation of this Ordinance.

- b. Criminal Proceedings to Punish Violations. A violation of any of the provisions of this Ordinance shall be punishable by a fine of not to exceed One Hundred Dollars (\$100.00) and costs of prosecution, by confinement in the County Jail for a period not exceeding ninety (90) days, or both such fine and confinement in the discretion of the court. Each day that a violation of this ordinance is continued or is permitted to continue to exist shall constitute a separate offense, provided that no person shall be confined or jailed for a single but continuing violation for a period longer than ninety (90) days.
- c. Civil Procedures to Compel Compliance. The Village may bring a civil proceeding for a mandatory injunction or injunctive order or for such other remedial relief as will correct or remedy the violation, including damages for the costs or expenses thereof. The Village may join in such action or actions any number of property owners or users of the system.
- d. Repealer Clause. All other ordinances, resolutions, orders, or parts thereof in conflict with the provisions of this Ordinance are, to the extent of such conflict, hereby expressly repealed, subject to the provisions of paragraph 3. of this Section and to the Savings Clause of this Section as of the date this Ordinance becomes effective.

3. This Ordinance shall be subject to Ordinance No. 812, adopted by the Village Council of the Village of Sheridan on July 7, 1981, and shall in no way alter the terms thereof until the bonds issued thereunder are fully retired at which time said Ordinance shall become ineffective.

4. Savings Clause. This Ordinance shall in no manner affect pending litigation, either civil or criminal, founded or growing out of any ordinance, resolution, order or parts thereof, hereby repealed, and this Ordinance shall in no manner affect any rights, claims, privileges, immunities or causes of action of the Village, County, or any other person, either criminal or civil, that may have already occurred, accrued or grown out of any ordinance, resolution, order or policy, or any part thereof, hereby repealed.

5. Validity of Severability. It is the legislative intent of the Village Council in adopting this Ordinance that all provisions hereof shall be liberally construed to protect the public health, safety, and general welfare of the inhabitants of the Village and other person affected by this Ordinance, and consequently, should any provision of this Ordinance be held to be unconstitutional, invalid, or of an effect, such holding shall not be construed as affecting the validity of any of the remaining provisions of this Ordinance, it being the intent of the Village Council that this Ordinance shall stand and remain in effect, notwithstanding the invalidity of any provisions hereof.

6. Effective Date. This Ordinance shall take effect and be in force from and after thirty days after publication.

First Reading September 7, 1982

Second Reading October 5, 1982

I hereby certify that the foregoing constitutes a true and complete copy of Ordinance No. 820 duly adopted by the Village Council for the Village of Sheridan, County of Montcalm, Michigan at a regular meeting held on October 5, 1982 at which all Members were present except (All Present) and that public notice of said meeting was given pursuant to Act No. 261, Public Acts of Michigan, 1968, including in the case of a special or rescheduled meeting notice by publication or posting at least twelve hours prior to the time set for the meeting.

I further certify that Member Misner moved adoption of said Ordinance and that Member Diehl supported said motion.

I further certify that the following Members voted for adoption of said Ordinance: Misner, Diehl, Bush, Courter, Randolph, Scott

and that the following members voted against adoption of said ordinance.

NONE

I further certify that said ordinance has been recorded in the Ordinance Book of the Village and that recording has been authenticated by the signatures of the President and the Clerk.

**ORDINANCE NO. 820
AMENDED MARCH 29, 2011
EFFECTIVE JULY 1, 2011 BILLING**

PLEASE TAKE NOTICE: That Ordinance No. 820 was amended by the Sheridan Village Council at its meeting March 29, 2011 and is effective with the July 1, 2011 Utility Billing and shall be revised as follows:

SECTION 10.2.a To increase the Sewer Debt Retirement Charges for Flat Rate Services per customer from \$31.70 to \$36.70 each quarter effective with the July 1, 2011 Utility Billing.

SECTION 10.2.b To include a flat rate fee of \$5.00 for Sewer Debt Retirement charges for Metered Customers each quarter effective with the July 1, 2011 Utility Billing.

Dated: June 15, 2011

Village of Sheridan

Marcia Hersch, Village Clerk

ORDINANCE NO. 820
AMENDED MARCH 11, 2014
EFFECTIVE APRIL 1, 2014

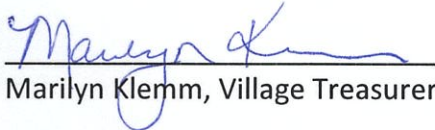

PLEASE TAKE NOTICE: That Ordinance No. 820 was amended by the Sheridan Village Council at its meeting March 11, 2014 and is effective with the April 1, 2014 Utility Billing and shall be revised as follows:

SECTION 10.2a To increase the Sewer Debt Retirement Charges for Flat Rate Services per customer from \$36.70 to \$41.70 each quarter effective with the April 1, 2014 Utility Billing.

SECTION 10.2b To include a flat rate fee of \$5.00 increase for Sewer Debt Retirement charges for Metered Customers each quarter effective with the April 1, 2014 Utility Billing.

Dated: March 13, 2014

Village of Sheridan

Marilyn Klemm, Village Treasurer

ORDINANCE NO. 820
AMENDED November 13, 2018
EFFECTIVE January 1, 2019

PLEASE TAKE NOTE: That Ordinance No. 820 was amended by the Sheridan Village Council at its meeting November 13, 2018, and is effective with the January 1, 2019 Utility Billing and shall be revised as follows:

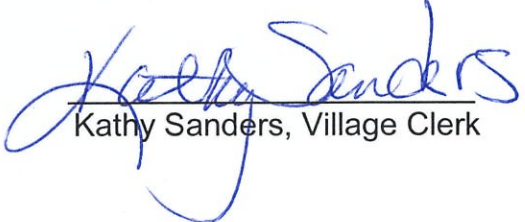

Section 10.2a To increase the Sewer charge from \$62.85 to \$71.85 for flat rate service per customer, per billing cycle effective January 1, 2019 billing.

Section 10.2d To increase a flat rate of \$9.00 to Sewer charges for metered customers, per billing cycle effective January 1, 2019.

A 5% increase will apply to the quarterly Sewer charge beginning year 2020 and every year thereafter.

Dated: November 14, 2018

Village of Sheridan

Kathy Sanders, Village Clerk
