

# Healthcare is more than a job. It's our Mission.

**Saint Anthony  
Health Center  
President/CEO,  
Mark Weber**

People of all faiths entrust Saint Anthony's Health Center for care. When they come here, we hope they feel something different. Something special. It's more than our technology and great people. When they enter these doors, we hope they sense the presence of God.

As the area's only Catholic healthcare organization, Saint Anthony's mission is to care for others as we would want to be cared for. To bring hope and healing as the visible sign of Christ's ministry.

Our mission is real, and it's profound, and it's enduring. It's not a statement we hang on the wall or use as a slogan. It's our very foundation. All of us here at Saint Anthony's are privileged to be partners in that mission. It's more than a job. it's our life's calling.

Healing the body... and soul. This is the mission of Saint Anthony's Health Center.

# Spiritual care isn't a department. It's our Mission.

**Saint Anthony's  
Health Center  
Mother Magdeline**

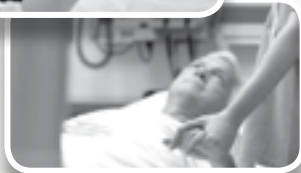

Every day at Saint Anthony's Health Center we witness the deep connection between faith and healing. So while we are committed to providing the very best in clinical medicine, we know that healing isn't achieved through medical science alone.

Guided by a mission of faith, Saint Anthony's understands the fundamental power of real human compassion. Here, both patients and their families are not just cared for, but cared about - body, mind and soul. Other hospitals talk about it. We live it. No matter the job title, no matter if they wear surgical scrubs or an apron or a lab coat or a suit, every person at Saint Anthony's is responsible for this mission.

Our very personal approach to caring respects each person's individuality and dignity. Offers comfort and reassurance. Inspires inner strength. Lifts spirits and renews hope.

Healing the body... and caring for the soul. This is the mission of Saint Anthony's Health Center.

A Mission Beyond Medicine

# Technology Changes. Our Mission Remains Steadfast.

A cancer diagnosis changes your life. Whether it's your own diagnosis or that of someone you care for. And, when it happens, you want the region's most advanced diagnostics, treatment and technology. You want it close to home, where you can be supported by family and friends. And you want to be cared for by people who care about the person behind the patient.

Saint Anthony's is the only oncology program in the region to be awarded a 3-year approval with commendation by the American College of Surgeons' Commission on Cancer – ranking it in the top 25% in the nation. Clinical excellence and quality care are at the very core of our mission. But as a Catholic healthcare organization, we deliver that care differently. Our multidisciplinary team of cancer experts provides personalized care, comfort and support to every patient and family – body, mind and soul. At Saint Anthony's Health Center, you're never alone. We're right beside you on the journey. Easing the way with expert medical care, combined with a true spirit of hope and compassion.

Healing the body... and healing the soul. This is the mission of Saint Anthony's Health Center.
