

EBM CIVILS

PRECISION • RELIABILITY
EXCELLENCE

OVER 20 YEARS EXPERIENCE
DELIVERING CIVILS INFRASTRUCTURE

WHO WE ARE

Specialist Civil Engineering for Critical Infrastructure

We deliver high-integrity civil engineering solutions across regulated and technically demanding environments.

Working with principal contractors, developers and asset owners, we operate safely and efficiently in live, complex and programme-critical settings.

WHAT WE DO

Integrated Civil Engineering Packages

- **Enabling works & groundworks**
- **Reinforced concrete structures**
- **Equipment bases & plinths**
- **Drainage & attenuation systems**
- **Cable routes & ducting**
- **Access roads & external works**
- **Major groundworks and spoil removal.**

We provide coordinated, end-to-end civils delivery — reducing risk and simplifying interfaces.

TRANSPORT & RAIL

As a full-service civils provider in the rail sector, we deliver turnkey solutions across all aspects of railway infrastructure, ensuring safe and efficient project execution.

Our expertise includes:

- **Trackside Civils** – All foundation types (including but not limited to DNO's, PSP, ASP, FSP, Location cases, Transformers etc). Retaining walls, Walkways.
- **Platforms & Structures** – Construction, refurbishment, extensions, and accessibility improvements.
- **Drainage & Flood Management** – Trackside drainage systems, attenuation and culvert installations.
- **Lineside Enabling Works** – Site clearance, De-veg works, access roads, haul roads, temporary works.
- **Cable Route Management** – Ducting, troughing, and under-track crossings (UTX).
- **Design & Planning Support** – Early contractor involvement (ECI) to streamline delivery.
- **Demolition.**
- **Compound and access construction** - Full turnkey solutions for compounds and access points.
- **Piling works** - All aspects of piling carried out from minor retention to sheet piling retaining walls .

**We work collaboratively with clients, offering flexible solutions to meet evolving project needs.
Experienced in safety-led, sequence driven programmes.**

ENERGY & UTILITIES INFRASTRUCTURE

Our capabilities span major infrastructure works across highways, utilities, and large-scale developments.

We provide:

- **Highways & Roads** – New roads, widening, junction improvements, and resurfacing.
- **Structures & Bridges** – Concrete, steel, and composite bridge construction and repairs.
- **Drainage & Flood Alleviation** – Sustainable drainage systems (SuDS), attenuation ponds, and flood defences.
- **Utilities & Ducting** – Enabling works for water, gas, electricity, and telecoms infrastructure.
- **Public Sector & Commercial Developments** – Groundworks, foundations, and external works.
- **Retaining & Reinforced Structures** – Sheet piling, gabions, and reinforced concrete walls.
- **Access & Haul Roads** – Temporary and permanent solutions for construction sites and developments.
- **Turnkey Project Delivery** – End-to-end management, including design and value engineering.

We ensure the highest standards in safety, sustainability, and efficiency for every project.

DIGITAL & MISSION-CRITICAL INFRASTRUCTURE

We specialise in delivering robust earthworks and groundworks solutions, ensuring stable foundations for all types of construction projects.

Our services include:

- Supporting technically sensitive and uptime-critical facilities.
- High-load slabs & external infrastructure
- Below-ground services
- Drainage & attenuation
- Phased delivery aligned with commissioning

Structured execution in secure environments.

WATER & INDUSTRIAL CIVILS

Infrastructure works within operational industrial environments.

-
-
-
-
-
-
-
-

Reinforced concrete structures
Treatment plant civils
Clean water and STW experience.
Deep & shallow drainage
Site infrastructure upgrades
Substation base and building construction specialists
Exothermic welding capabilities
EUSR Qualified members of staff.

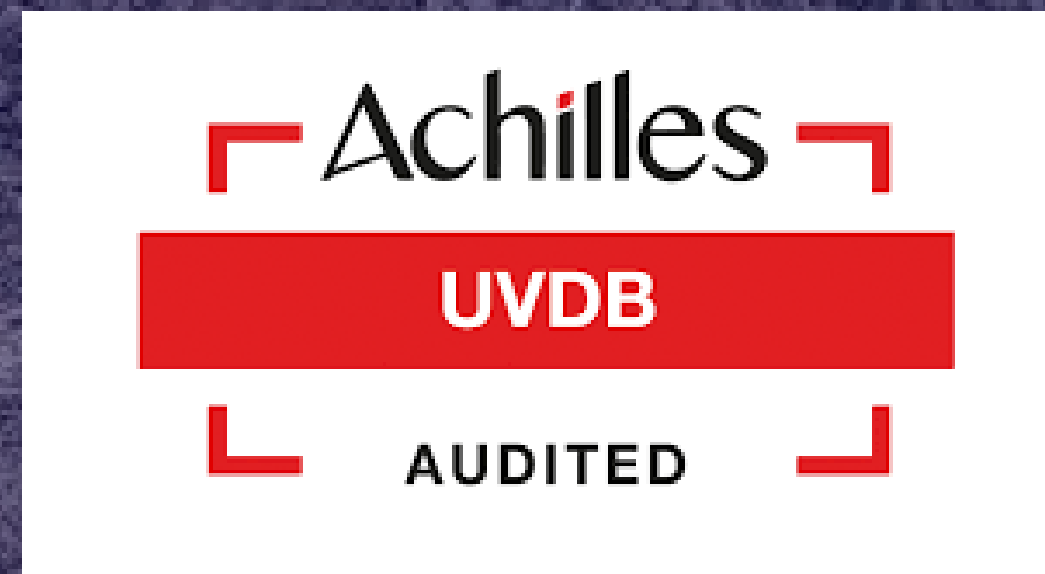

Minimal disruption. Controlled delivery.

ACCREDITATIONS & COMPLIANCE

EBM Civils holds recognised industry approvals:

- ✓ Achilles UVDB – Silver Plus
- ✓ RISQS / Link-Up Approved
- ✓ CHAS Elite

Demonstrating capability to operate within regulated, safety-critical infrastructure sectors.

TRUSTED PARTNERS AND CLIENTS TO DATE

Proud to support leading organisations across Rail, Water, Nuclear and House Building, including:

- Siemens
- Kier Group
- Rolls-Royce
- GEDA
- BT
- SEVERN TRENT

Delivering to Tier One standards in safety, quality and reliability.
If we're trusted by industry leaders, you can rely on us to deliver for you.
