Subject: Trooper Lock visit

Major Stone,

As a FBI Forensic Canine Operations Specialist that worked and trained with Trooper Lock at our invitational cadaver dog training September 13-15, I would like to extend our thanks and appreciation for your trooper's time, and your willingness to allow Trooper Lock to attend our training seminar.

We were tremendously impressed with Trooper Lock's performance and comprehensive knowledge in the field of detection. His hard work and dedication was clearly presented in his team's ability and consistency. Furthermore, in our yearly progress of observing and/or assessing over 150 K9 teams nationwide, Trooper Lock and his K9 have far exceeded our expectations, and have well surpassed all those we have trained and worked with. It is our hope that Trooper Lock also benefited from this training, as it is our intent to help increase skill-sets of law enforcement teams and organizations nationwide, and to help achieve optimal success in the field.

Trooper Lock's information was sent to us by one of our field agents, and he is an ideal recommendation for any of our field offices should they request such assistance. Trooper Lock has an open invitation to attend any advanced training he wishes here at the Evidence Response Team Unit- Forensic Canine Service, and it is our hope that we may build upon this relationship in the future, as we believe it will be mutually beneficial. We strive to forge strong relationships with our law enforcement partners around the world, and to create an open exchange of information, training, and resources when available. Trooper Lock is a great example of this vision and we applaud the efforts of your department and his individual efforts thus far. We look forward to training with him in the future.

Sincerely,

Jan J Topoleski
