2019 Seed & Clone Varieties & Pricing

OUR STORY

East Coast Genetics, LLC is a large-scale hemp genetics company dedicated to providing licensed hemp growers with superior quality, high-CBD strains. Founded in 2016, ECG obtained the broad licensing rights for the trademarked Cherry Wine strain. Our genetics team has since isolated the top-performing Cherry Wine phenotypes.

Additionally, new, high-performing strains, including Sweetened & Franklin Otto, BaOx, and T1, have been added to our library. Each strain undergoes variety trials at both our indoor facility and outdoors at The NC Hemp Farm Research & Innovation Campuses. All strains are evaluated on plant structure, cannabinoid content, flowering cycles, and pest resistance. We believe that providing research-backed genetics sets us apart from the competition.

ECG and our network of distributors in NC and VA pride ourselves on providing organically grown, reliable strains guaranteed to ensure the grower the highest CBD yields with natural resistance to pests and mold.

2019 Clone Varieties

Strain Name	Description	Average CBD Content
 <p>Early Girl</p>	<p>This phenotype of high-CBD Cherry Wine finishes in 60 days and grows dense, sweet buds with a sweet & sour aroma. Early Girl allows growers to harvest up to two weeks earlier than late varieties.</p>	<p>15-17%</p>
 <p>Late Summer</p>	<p>A true Indica/Sativa hybrid, leaning 60/40 sativa/Indica, this variety is the result of nearly two years of phenotype trials. These bubblegum/sour smelling plants grow well in many climates & typically see 500 to 1000 grams per plant.</p>	<p>13-16%</p>
<p>T1</p>	<p>A popular variety for its' short, stocky stature and sweet, dense buds. This Indica-dominant variety is time tested and reliable for greenhouse & outdoor production and averages 100 to 200 grams per plant.</p>	<p>13-14%</p>
<p>Sweet Otto</p>	<p>Our best & strongest Otto variety with tight node spacing & a pungent, sweet fragrance. A sativa-dominant, mold-resistant variety averaging 300 to 400 grams per plant.</p>	<p>13-15%</p>
<p>BaOx</p>	<p>With dense, sticky buds and high CBD content, this Indica-dominant strain has built a great reputation for itself in North Carolina.</p>	<p>13-17%</p>

East Coast Genetics, LLC is a licensed distributor of the trademarked Cherry Wine genetics.

Cherry Wine lineage; “The Wife” used in this high-grade hemp hybrid was bred by our good friends at 303 seeds. The phenotype of “The Wife” we isolated for this project practically drips resin and was the first phenotype we saw that had no detectable THC with a whopping 25% CBD! Paired with our CBD rich Charlotte’s Cherries male, which tested for non-detectable THC via leaf analysis, this hybrid brings farmers and medical growers alike a true connoisseur CBD hemp cultivar.

Palate- Expect a complex cherry floral frame layered with pine skunk undertones.

Potency- 15%-25% CBD. 0-.3% THC (depending on time of harvest and climate variables).

Harvest- 9 weeks indoor. Mid October outdoor.

2019 Clone & Seed Pricing

QUANTITY	PRICE PER CLONE
504 or less	\$8.00
576-1512	\$7.00
1584-3024	\$6.50
3096+	\$5.75

ORDERING PROCESS

Required State Documents and Paperwork

- Copy of state-issued Industrial Hemp Grower's License
- Completed ECG Order Form
- Signed copy of the Cherry Wine Plant or Product Sales & Supply Agreement
- Signed Genetic Transfer Form (due at clone pick-up)
- Signed self-propagation paperwork (if participating in self-propagation program)

A 50% deposit is required to place your order. Once your deposit is received, you will be assigned to a distributor and may begin coordinating pick-up details. Delivery is not included in the quoted price and varies depending on your location.

Initial invoicing is done via QuickBooks. We accept ACH bank transfer, wire transfer, and certified check. The remaining 50% of your balance must be paid via certified check **made out to East Coast Genetics** on the day of pick-up. If you wish to inspect your clones prior to pick-up, you must coordinate this with your distributor on or before your pick-up date. Please allow adequate time for clone inspection. NO clones will be distributed without payment in full. **NO EXCEPTIONS.**

Buyer must sign a Genetic Transfer Form at the time of pick-up or delivery. We encourage all buyers to inspect each clone prior to leaving their distributor as clone sales are final and non-refundable.
