Direct Print | Legally Compliant | Privileged Correspondence

LIAM Legal is our patent pending legal and privileged mail platform, designed and developed to answer the safety challenges faced by correctional staff nationwide. Modern encryption technology combined with our proprietary direct print software, ensures secure delivery of all privileged communications.

## How It Works

- Legal or privileged documents & materials are uploaded, encrypted and transmitted directly to the correctional facility. At the direction of staff, all legal/privileged mail content is accessed by the incarcerated individual, utilizing a LIAM Legal kiosk.
- All pending legal or privileged documents & materials remain encrypted until the incarcerated individual enters their confidential PIN number at the LIAM Legal kiosk, ensuring full privacy.
- Following the completion of all direct print legal or privileged documents/materials, the incarcerated individual and staff member sign individual confirmations via separate touchscreens.
- Immediately following the submission of two signed acknowledgements, all information is purged from the system and proof of delivery is digitally remitted to the incarcerated individuals legal counsel or privileged sender.

## KEY FEATURES

- Eliminates deadly contraband from entering correctional facilities
- 100% encrypted from upload to print
- Fulfills county, state and federal legal statute requirements
- Maintains stringent confidentiality
- Legal and privileged mail is received and printed directly at your facility
- Law offices are vetted and verified through EIN and state bar association credentials
